October 2014 Explanatory Notes

This Indicator Report provides a monthly snapshot of the regional response to the South Sudan Situation. The indicators included report on the Post 15 December 2013 South Sudan caseload only. The report is prepared through collaboration with the reporting country and the Regional Support Hub, Nairobi.

The notes below provide further contextual information on various sector indicators. Please note that Kampala is an urban area where refugees are not directly supported by UNHCR and its partners, so many of the indicators are not applicable to Kampala.

SGBV

SGBV reporting among the South Sudanese population remains low with activities to increase sensitization and reporting ongoing across all hosting areas.

WASH

Figures are based on UNHCR's Water Monitoring System. As Uganda moves out of the initial emergency phase water yield is being monitored at every individual handpump rather than taking an average to increase accuracy.

NUTRITION

Currently only new arrivals are being screened and numbers of these are decreasing. The following numbers were screened in October:

- Adjumani – 401
- Arua – 349
- Kiryandongo – 111

A comprehensive nutrition survey is expected to be release in December which will provide more complete nutritional data.

EDUCATION

The school age population in Uganda is as follows:

- Pre-primary: 3 - 5 years
- Primary: 6 - 12 years
- Secondary: 13 - 17 years

In Uganda primary education in public institutions is free of charge while fees are paid for secondary education.

SHELTER / SITE

Uganda does not report on average dwelling floor size per person as the refugees build their own dwelling of various sizes on their own plot. Uganda reports on plot area per person rather than camp area as the refugees live in settlements and not camps. In Uganda, emergency shelter refers communal shelter in the Transit and Reception Centres. The semi-permanent structures has been defined as HHs who have been moved in the settlement and have constructed shelters through the use of plastic sheeting and poles creating mudwall huts (similar to those of Ugandan nationals in the area.) Kampala is an urban area where refugees would rent accommodation so the indicators are not applicable.

ACCESS TO ENERGY

The Uganda operation is not currently funded to distribute domestic fuel to households.
