----------------------	---	--------------------------	---	--------------------

This Indicator Report provides a monthly snapshot of the regional response to the South Sudan Situation. The indicators included report on the Post 15 December 2013 South Sudan caseload only. The report is prepared through collaboration with the reporting country and the Regional Support Hub, Nairobi.

The notes below provide further contextual information on various sector indicators:

POPULATION

Since the influx of Dec 2013, 28,831 SSD children have been received, making up over 64% of the total population received.

CHILD PROTECTION

Every week, the child protection data changes as new arrivals come in; some UAMS are later reunified with their families hence changing their status. This causes either a reduction or increase in number of UASC. As at end of January 2015 there were 2,735 registered UAMs and 11,884 separated children in Kakuma.

EDUCATION

In Kakuma the education coverage at all levels is very low: pre-primary are only 25% of eligible children (those aged between 3-5 years), primary education coverage for the age group of 6 –13 is at 65% and 2% for secondary education. Primary coverage has increased due to the completion of construction and renovation of 40 classrooms. There are only 4 secondary schools in the camp hence the low coverage.

SEXUAL AND GENDER BASED VIOLENCE

Only 12 SGBV cases were reported in January 2015. 138 survivors were supported through physical protection, shelter and nutritional support, cash assistance, provision of psychosocial counselling and NFIs.

WATER, SANITATION AND HYGIENE

On average, the per capita water distribution for SSD arrivals has been 18.3l/p/d. Latrine to user ration has been 1 to 19 individuals for the month.

HEALTH

The health status of refugees has remained consistently stable. Under-five Mortality Rate (U5MR) and Crude Mortality Rates (CMR) remained within UNHCR /Sphere standards (<1/10,000 /day and <2/10,000/day respectively).

ENERGY

Only 20% (4kgs) of the required ration of firewood (20kgs) is distributed to beneficiaries due to lack of sufficient firewood.

NUTRITION

A total of 196 children were admitted into the nutrition programmes for SAM and 352 for MAM in January 2015. The recovery rate was 78.5% and 95% respectively.

SHELTER AND SITE

8 % of households live under emergency shelters vis a vis 92 % housed under durable/semi-permanent shelters.
