 **30,000** mothers reached with infant and young child feeding services

Current Planning Figures

 **515,013** Total Person of Concern as of 1 September 2013

 **87 M** USD required budget

NEEDS

Clinics and hospitals in the most affected governorates require urgent support to continue to provide services to Syrians as well as affected Jordanian communities. The establishment of a new camp requires construction of new clinics, equipment, drugs and other medical supplies, hiring of staff and establishment of referral mechanisms. There is a need to continue to strengthen primary health care in camp settings and in UNHCR supported clinics including harmonizing protocols and integration into the national system, rational drug use, integration of nutrition into primary health care and reproductive health services, strengthen management of chronic diseases, and building capacity to prevent and respond to diseases of outbreak potential.

OBJECTIVES (as per RRP5)

To ensure access of Syrians in most affected governorates in Jordan to quality primary health, reproductive health, mental health and nutrition services and to life-saving secondary and tertiary care by end of 2013 while minimizing the negative effects on national health systems through strengthening the MoH’s capacity and filling key health sector gaps.

ACTION/OUTPUTS

- 1 Mass measles campaign 8th of June to 4th of July Irbid and Mafrag in 86% children 6m to 15 years
- 2 Mass measles campaign Zaatri April 13th to 25th with 76% of 6 months to 30 years vaccinated
