As per workplan, ESWG and WASH SWG will start tightening the collaboration aiming at finding innovative practical solutions that fit the Jordanian context and challenges, bearing in mind that WASH facilities should be appropriately available both in schools and in “alternative” education centres. A smaller group of ESWG members will work in close collaboration with the WASH WG to come up with minimum standards in camp and Host community for the education centres. Jamal also introduced to ESWG members Reem (UNICEF) who is focal point for the project “WASH in schools”.
