Mahmoud Mosque Hospital, UNHCR/Shawn Baldwin

SECTOR FUNDING STATUS January - December

* Funding received as of May 2014

NEEDS ANALYSIS:

Syrian refugees are scattered in 230 districts. Access to healthcare remains a challenge because of distance and cost. Public preventative primary healthcare is accessible and free while curative care is not always available. Referral to secondary and tertiary level healthcare needs support for life saving treatment.

Monitoring referrals, and ensuring a cost-effective secondary and tertiary health care in the refugees areas of residence remains a challenge to Geographical coverage and expansion of service delivery.

The sector objective is to improve access, quality and coverage to health services for Syrian refugee in Egypt by focusing on supporting the Ministry of Health facilities, strengthening UNHCR's health providers' capacity and awareness raising among Syrians through community health outreach program.
