Places of Origin of Syrian Refugees

Water Sources in Informal Settlements

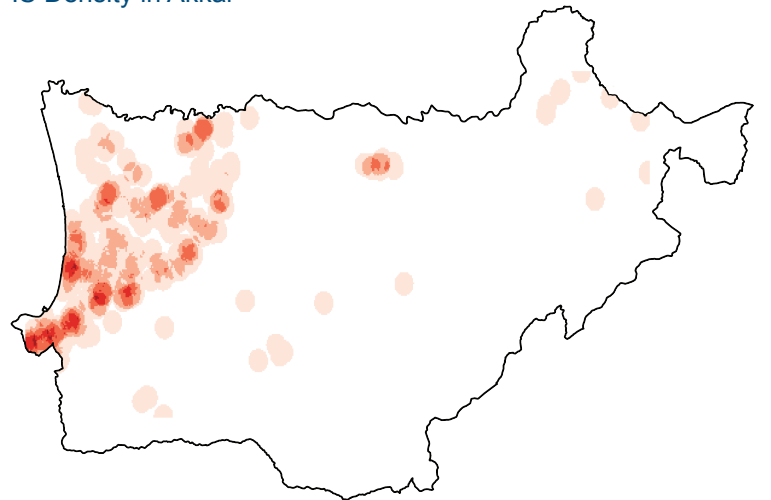

Refugee Renting* Lands

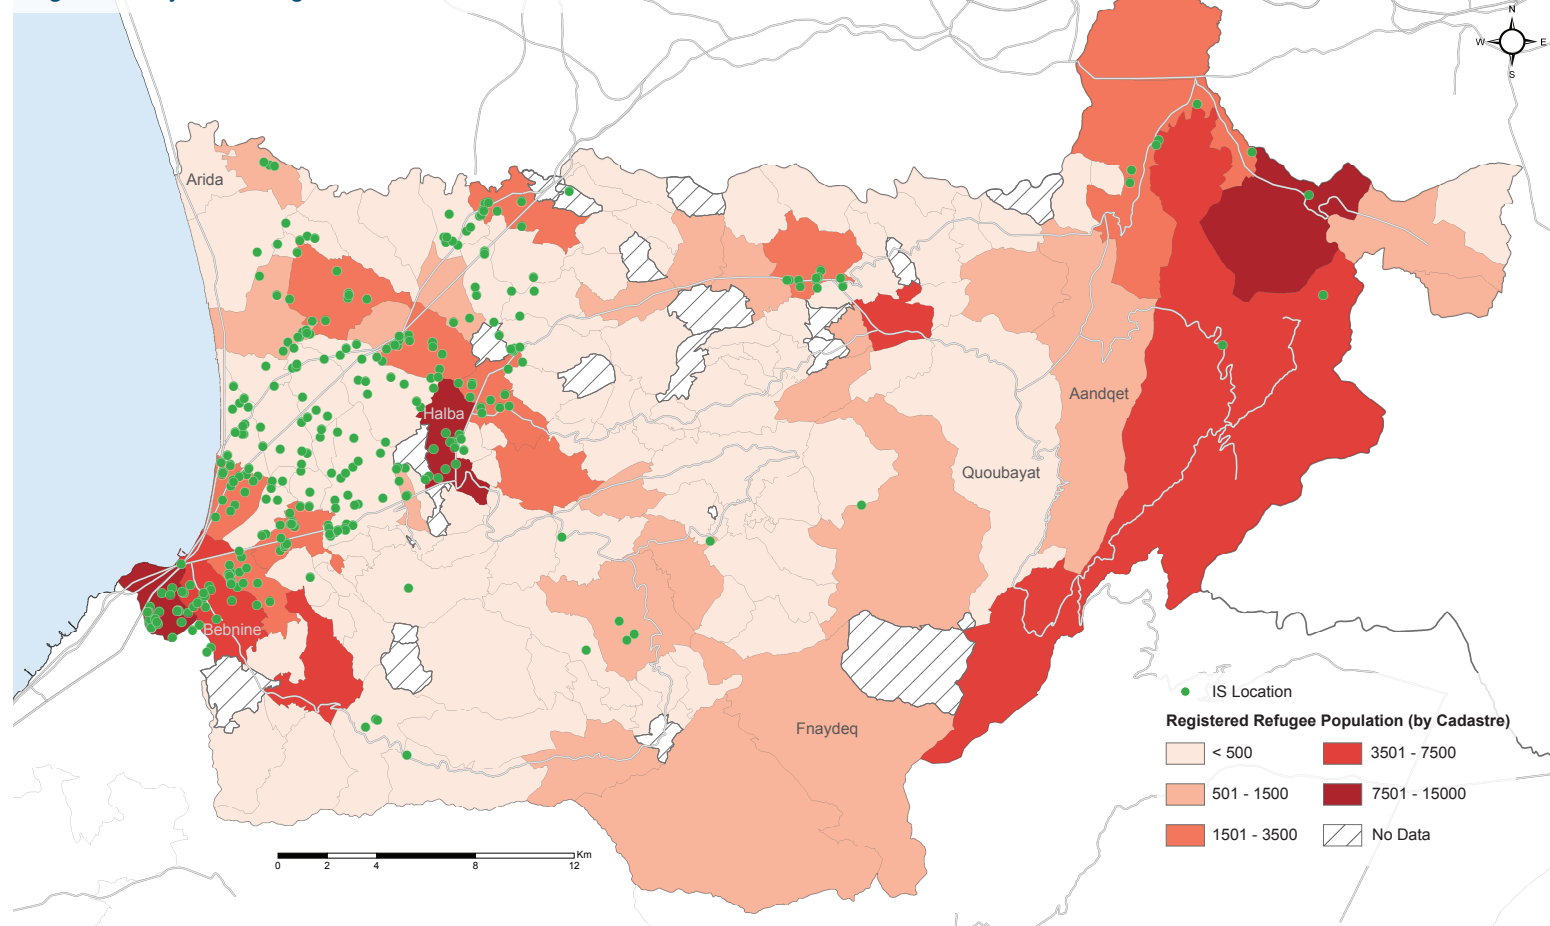

*Note: there were no specific questions concerning the data about basic needs and renting. The Shawish was given the freedom to add any comments/complaints at the end of the survey

IS Density in Akkar

Registered Syrian Refugees in Akkar and IS Locations

REACH began implementing the third sweep of IS on June 23, 2014. Using the geographic sweep approach agreed upon by Interagency Mapping Platform (IMAP) partners, REACH identified, geo-referenced, and collected key data on all IS in Akkar over a 6 week period. Data on IS in Akkar is updated on a continuous basis by REACH field teams who collect data on demographics, registration status, settlement leadership, landlords, date of establishment, rental costs, and place of origin.

Data on informal settlements is from the REACH IS Mapping Assessment (3rd Sweep) conducted between June and July 2014. Informal settlements (IS) are commonly established on either rented or unauthorized public or private land on the outskirts of population centers, and in many cases lack access to basic utilities and services. Shelters in informal settlements are predominately handmade with a combination of plastic sheeting, timber, and various other materials sourced by displaced persons.
