

AI Za'atari Camp: OVERVIEW

Number of active WASH centres: 365
 Number of WASH centres assessed: 356*
 #Female: 187 #Male: 178
 Population coverage: 86,040
 # of households: 15,364
 # of children: 49,842

*All active centres were assessed, except those that were locked and could not be accessed

MINIMUM STANDARDS INDEX**			
	This week	2 weeks ago	
STRUCTURAL INTEGRITY	1.96 / 4	1.83	↑
HYGIENE	1.62 / 2	1.64	↓
ACCESS & PROTECTION	2.41 / 3	2.38	↑
OVERALL	5.99 / 9	5.85	↑

TOILETS & SHOWERS

(MS) = minimum standard

	This week	2 weeks ago
At least min standard of functional toilets are present ¹	93 (26%)	90 (25%)
There are at least 2 functional shower stalls ²	213 (60%)	175 (49%)
There are doors on 100% of all toilet and shower stalls	170 (48%)	155 (44%)
There are locks on 100% on all toilet and shower doors	216 (61%)	179 (50%)
Female centres contain at least 1 lockable toilet and shower stall	137 (73%)	117 (63%)

TAPS

	This week	2 weeks ago
There are at least two internal taps	191 (54%)	148 (42%)
There is at least one external tap	135 (38%)	116 (33%)
There are no leaking internal taps (only centres with running water)	39 (74%)	45 (74%)

SEWAGE

If there is a septic tank, there are no signs of overflow	157 (100%)	156 (99%)
---	------------	-----------

LIGHT

WASH centres with internal or external lighting	154 (43%)	149 (42%)
Female WASH centres with internal or external lighting	112 (60%)	115 (61%)

ALL CENTRES

	This week	2 weeks ago
Total number of functioning toilets	1922	1863
Total number of functioning showers	1537	1509
Total number of doors on toilet and shower stalls	2843	2731
Total number of locks on toilet and shower doors	2144	1956
Total number of internal taps	632	529

PUBLIC ACCESS

	This week	2 weeks ago
Centre is not locked	356 (98%)	353 (97%)
There are no locked toilet and shower stalls	162 (46%)	146 (41%)
There is an unlocked stall for disabled persons	179 (50%)	179 (50%)

PRIVATE CONNECTIONS

	This week	2 weeks ago
There are no private connections to water tanks	280 (79%)	258 (73%)
There are no private connections to the taps	332 (93%)	320 (90%)
There are no visible private connections to WASH centre septic tanks	138 (88%)	126 (80%)

CLEANLINESS

	This week	2 weeks ago
There is no faeces inside the facility	261 (73%)	248 (70%)
No faeces outside the centre within a 2m radius	N/A (-)	N/A (-)
No stagnant water inside and outside the facility	332 (93%)	349 (98%)

SANITARY WASTE DISPOSAL

	This week	2 weeks ago
Female centres with disposal arrangements for menstrual hygiene materials and diapers ³	N/A (-)	N/A (-)

1. A) See below for min. standard calculation. B) Functioning toilet means one that is intact, and not blocked, overflowing, or destroyed
 2. A functioning shower means one that has a door and an internal lock
 3. This disposal arrangement may include a bin or bag inside the hallway of the WASH centre

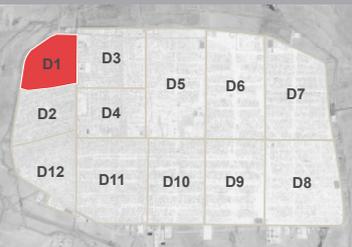

A. STRUCTURAL INTEGRITY INDEX
 1. In Districts 4-11, there is at least 1 toilet per 50 individuals that is functional; i.e. intact and not blocked/overflowing. In Districts 1/2/3/12 there are at least 2 functioning toilets per centre.
 2. There are at least 2 functioning shower stalls; including an intact basin and door with lock.
 3. There are at least 2 functioning taps inside the centre
 4. There are no signs of sewage tank overflow

B. HYGIENE INDEX
 1. The centre does not contain faeces inside the WASH facility
 2. There is no stagnant water inside or outside the facility
 3. There is an arrangement for the disposal of diapers or menstrual hygiene materials (bag or bin in the hallway) [To be assessed from 21 Sep 2014 onwards]

C. ACCESS & PROTECTION INDEX
 1. The centre is open and free of charge
 2. The centre is sex-segregated
 3. There is internal or external lighting

Doors on 100% of stalls	Locks on at least 1 latrine & 1 shower	Lighting in- or outside	Female WASH centre
Doors not on 100% of stalls	Did not comply on locks	No lighting in- or outside	
No faeces inside centre	Disposal arrangements for female hygiene items	Septic tank not overflowing	Male WASH centre
Faeces inside centre	Did not comply on disposal arrangements	Septic tank overflowing	

1. A) See below for min. standard calculation. B) Functioning toilet means one that is intact, and not blocked, overflowing, or destroyed.
 2. A functioning shower means one that has a door and an internal lock
 3. This disposal arrangement may include a bin or bag inside the hallway of the WASH centre

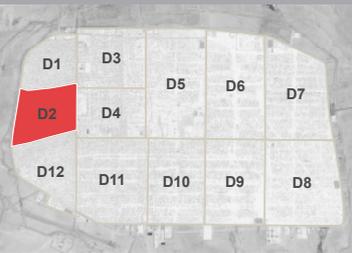

A. STRUCTURAL INTEGRITY INDEX
 1. In Districts 4-11, there is at least 1 toilet per 50 individuals that is functional; i.e. intact and not blocked/overflowing. In Districts 1/2/3/12 there are at least 2 functioning toilets per centre.
 2. There are at least 2 functioning shower stalls; including an intact basin and door with lock.
 3. There are at least 2 functioning taps inside the centre
 4. There are no signs of sewage tank overflow

B. HYGIENE INDEX
 1. The centre does not contain faeces inside the WASH facility
 2. There is no stagnant water inside or outside the facility
 3. There is an arrangement for the disposal of diapers or menstrual hygiene materials (bag or bin in the hallway) [To be assessed from 21 Sep 2014 onwards]

C. ACCESS & PROTECTION INDEX
 1. The centre is open and free of charge
 2. The centre is sex-segregated
 3. There is internal or external lighting

****Minimum Standards Index indicators**

Al Za'atari Camp: DISTRICT 12

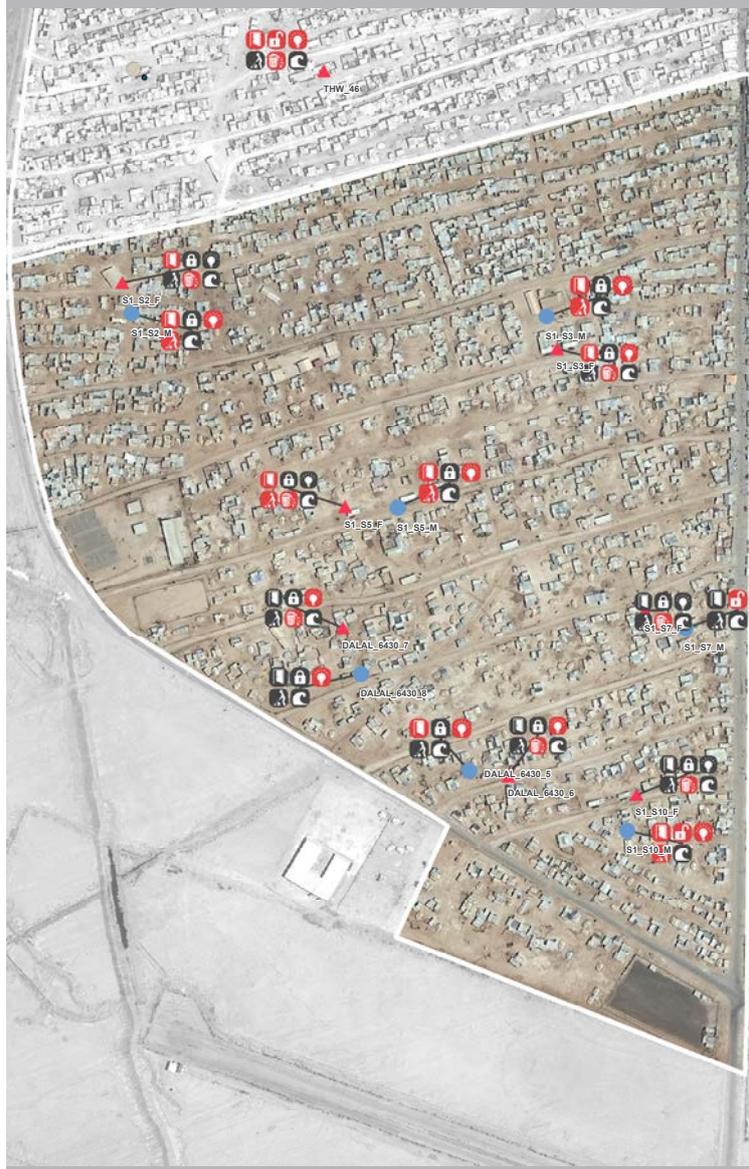

Number of active WASH centres: 14
 Number of WASH centres assessed: 14*
 #Female: 7 #Male: 7
 Population coverage: 6,576
 # of households: 1,125
 # of children: 3,825

*All active centres were assessed, except those that were locked and could not be accessed

MINIMUM STANDARDS INDEX**			
	This week	2 weeks ago	
STRUCTURAL INTEGRITY	2.36 / 4	2.21	↑
HYGIENE	1.85 / 2	1.92	↓
ACCESS & PROTECTION	2.29 / 3	2.50	↓
OVERALL	6.50 / 9	6.64	↓

	This week	2 weeks ago
TOILETS & SHOWERS (MS = minimum standard)		
At least min standard of functional toilets are present ¹	10 (71%)	10 (71%)
There are at least 2 functional shower stalls ²	11 (79%)	1 (7%)
There are doors on 100% of all toilet and shower stalls	6 (43%)	5 (36%)
There are locks on 100% on all toilet and shower doors	11 (79%)	1 (7%)
Female centres contain at least 1 lockable toilet and shower stall	7 (100%)	2 (29%)
TAPS		
There are at least two internal taps	9 (64%)	8 (57%)
There is at least one external tap	2 (14%)	1 (7%)
There are no leaking internal taps (only centres with running water)	0 (N/A)	0 (N/A)
SEWAGE		
If there is a septic tank, there are no signs of overflow	10 (100%)	9 (100%)
LIGHT		
WASH centres with internal or external lighting	4 (29%)	7 (50%)
Female WASH centres with internal or external lighting	4 (57%)	5 (71%)
ALL CENTRES		
Total number of functioning toilets	71	71
Total number of functioning showers	63	62
Total number of doors on toilet and shower stalls	102	99
Total number of locks on toilet and shower doors	87	36
Total number of internal taps	31	27
PUBLIC ACCESS		
Centre is not locked	14 (100%)	14 (100%)
There are no locked toilet and shower stalls	4 (29%)	3 (21%)
There is an unlocked stall for disabled persons	4 (29%)	2 (14%)
