

# IRIS SCAN

## Why is UNHCR doing iris scanning?

Every person has a unique iris. By using the iris measure, UNHCR avoids registering anyone more than once and discovers false identities. This enables us to use our resources better.

## How is it done?

A UNHCR registration staff takes a picture of your iris with a camera. It only takes few seconds.

## Who will be included in the iris scan?

All Syrians registered with UNHCR. Iris scanning will take place during registration or verification.

## Who will have access to the image of my iris scan?

The iris images will be saved on UNHCR's database and will not be shared without your consent.

**United Nations High Commissioner for Refugees**

Address: 5 Michel Lotfallah Street, Zamalek, Cairo
