

IRAQ: RRP6 MONTHLY UPDATE - NOVEMBER 2014

WASH

95,336 Syrian refugees living in camps in Iraq were reached with WASH services

NOVEMBER HIGHLIGHTS:

Duhok governorate: DMC distributed water tanks to 800 families, which will be used to heat water for shower units.

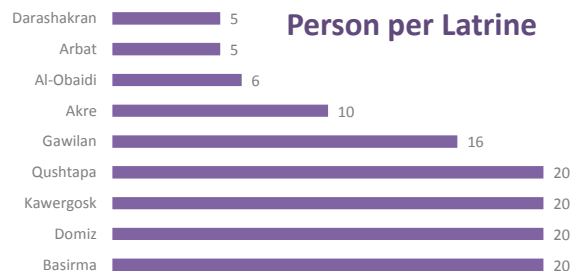

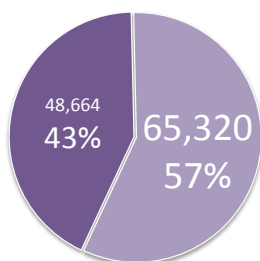

Erbil governorate: in **Qushtapa** camp 96 households' sanitation facilities including sewage systems were completed by UNICEF and its partners.

WASH improvement works at the primary health centers in **Darashakran** and **Kawergosk** camps have been completed.

In Al-Obaidi camp in **Anbar** governorate, ISHO has successfully addressed the water shortage. One water pump station is again operational, ensuring that sufficient water is available in the camp.

WASH in schools in refugee camps in KR-I

- Through Sustainable Sources
- Temporary Sources

NEEDS ANALYSIS:

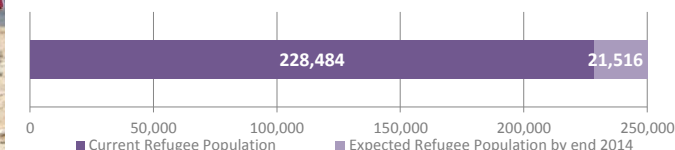

As the capacities of Basirma and Kawergosk camps have been exhausted, all new arrivals to Erbil governorate were directed to Qushtapa and Darashakran camps.

The authorities decided to cancel the construction of Qushtapa 2 camp, further aggravating refugee shelter limitations.

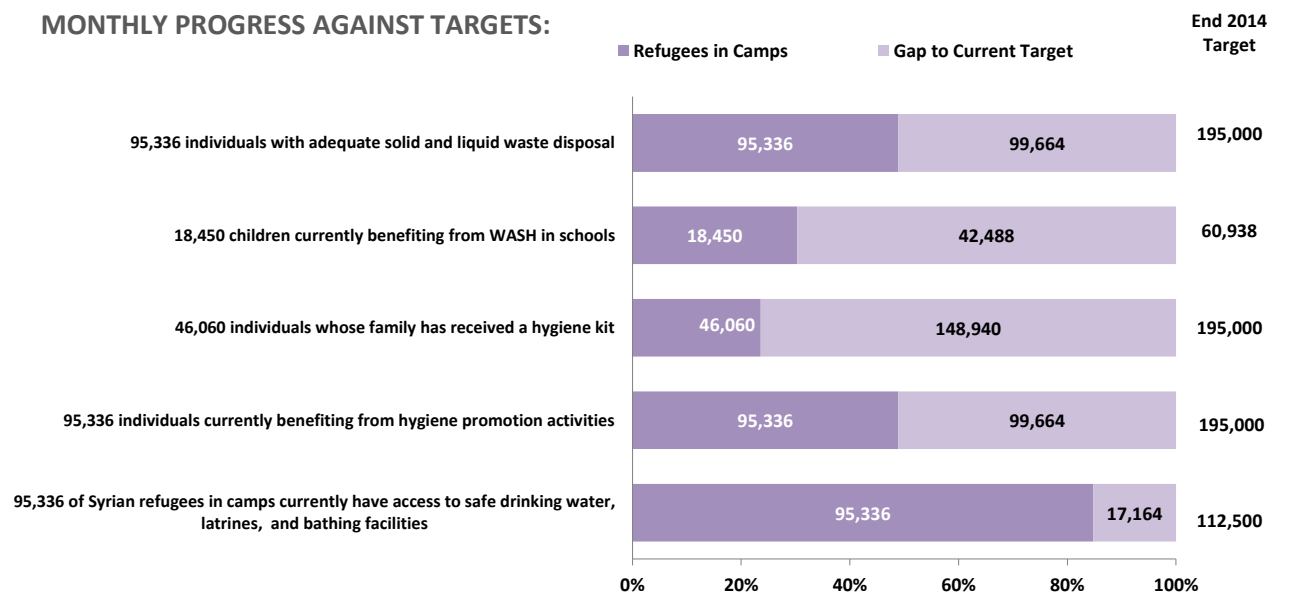

With all factors above, the construction of WASH facilities to meet the immediate demands of the newly arrived refugees from Kobane remains high priority

Need to develop a new site at Darashakran camp for about 400 refugees' families for Kobane Experienced vandalism of sanitation facilities in Kawergosk camp after construction and maintenance.
