

**WHO delivered 45 medical devices to fully equip the hospital in Suruc Refugee Camp, which currently accommodated around 28 thousand people.**  
**IOM continues with its support to DWWT – Primary Health**

### APRIL HIGHLIGHTS:

**UNFPA** launched new Youth Center in cooperation with CVF (Community Volunteers Foundation), in April, at Diyarbakir.

EmOC Training was held on 31 March-1 April, in Adana for Turkish service providers who provides services to both Turkish and Syrian community in their provinces. They came from Adana, Hatay, Kahramanmaraş, Kilis, Mersin, Niğde, Osmaniye .Total number of participants was 38 ( 6 nurses and 32 midwives)UNFPA Team organized a Workshop on the Usage of New Tool for Data Collection with the participation of 41 people in Ankara on 20 April. The participants were our partners and UNFPA team. Our all partners attended to this Workshop. Ms. Rebecca Sonntag from Amman Office participated in the Workshop and led to the relevant sessions. On 21 April, we realized an interactive Workshop on their field and data collection experiences of our partners. Some partners had some questions since we started to work with them in this year. Our experts shared the important information on the SRH and GBV with them and answered the questions. We completed a Workshop which brought close together our all partners. Almost all partners provided positive feedback after the Workshop.

### NEEDS ANALYSIS:

- Syrian refugees, especially those living in local communities are exposed to vaccine-preventable diseases such as measles and pertussis.
- Though not a general challenge at the moment, malnutrition is expected to become a challenge among newly arriving refugees.
- There are major concerns for the increasing mental and psychosocial problems of Syrian refugees.
- Surgical trauma and intensive care of large number of severely injured patients from the conflict areas and their long term post-operation rehabilitation require enormous inputs of human and financial resources and equipment.
- The large population of women in the reproductive age and life-threatening reproductive health risks are a matter of priority.
- Continued and expanded support to partners to participate in the healthcare provision of Syrians to enable equitable access, specifically to primary and chronic disease healthcare service is needed.
- Focusing on the primary healthcare provision is needed to be continued so that the patient load on secondary and tertiary healthcare and respective costs can be reduced.
- The role of the family and community healthcare centres as primary care providers for Syrian refugees needs to be strengthened, including mental health for the impacted communities.
- For better planning, Health Information System of the family and community health centres to register and report on Syrian refugees needs to be expanded.

From the World Health Day 2016. diabetes awareness event, Malumat
