

Standard Operating Procedures for Emergency Response to Unaccompanied and Separated Children in Jordan

I. BACKGROUND

These standard operating procedures (SOPs) establish the roles and responsibilities of government agencies (Family Protection Department (FPD), Ministry of Justice (MOJ) and Ministry of Social Development) and UN agencies (UNHCR, UNICEF, UNRWA) and other case management national and international agencies (IRC, IMC, JRF, IFH/NHF) regarding the working procedures for the care and protection of unaccompanied and separated children (UASC) as part of the refugee response in Jordan.

These SOPs were developed as a result of a consultative process, between November 2013 to November 2014, involving participating members of the UASC Task Force (TF) under the Child Protection Sub Working Group in Jordan.

This document along with several supporting annexes form the UASC SOPs document. These SOPs will be updated every 12 months by the TF unless otherwise required due to significant changes in the overall framework related to child protection in Jordan. These UASC SOPs should be read in conjunction with the Interagency Emergency Standard Operating Procedures for prevention of and response to Gender-Based Violence and Child Protection in Jordan.

II. TERMINOLOGY

Separated Child: A separated child is a child who is separated from both parents or from his/her previous legal or customary primary care-giver, but not necessarily from other relatives. This may, therefore, include children accompanied by other adult family members.¹

Unaccompanied Child: An unaccompanied child is a child who has been separated from both parents and other relatives and is not being cared for by an adult who, by law or custom, is responsible for doing so.²

Orphan child: An orphan is a child, both of whose parents/caregivers are known to be dead. In some countries, however, an orphan is defined as a child who has lost one parent/caregiver.³

Family Tracing and Reunification: Tracing in the case of UASC is the process of searching for family members or primary legal or customary care-givers. The term also refers to the search for children whose parents are looking for them. The objective of tracing is reunification with parents or other close relatives.⁴

Verification: Verification is the process of establishing the validity of relationships and confirming the willingness of the child and the family member (s) to be reunited.⁵

² *Inter-agency Guiding principles on Unaccompanied and Separated Children, 2004*

⁴ *Inter-agency Guiding principles on Unaccompanied and Separated Children, 2004*

⁵ *Inter-agency Guiding principles on Unaccompanied and Separated Children, 2004*

“Verification must be carried out for every child. When tracing is successful, an assessment should verify that family reunification is in the best interests of the child. In cases where there are serious concerns, it may be necessary to involve the appropriate local authorities [...] local communities for any further action or future support required.”

Best Interest Assessment (BIA):⁶ Is the UNHCR’s assessment tool for protection of individual children. Individual casework with children at risk, including unaccompanied and separated children, must be based on an assessment of protection needs with recommendations for interventions and referrals. A BIA is essential before any action affecting an individual child of concern to UNHCR is taken, unless a BID is required. Overall, a BIA should be seen as an essential element of case management and general child protection work. It supports child protection actors in any decision or action taken on behalf of a child in line with Article 3 of the Convention on the Right of the Child (CRC).

A BIA should be conducted as soon as a child has been identified to be at risk. The identification of a child at risk can happen at arrival, but more often occurs during the course of displacement through UNHCR or partners, or through community-based protection mechanisms.

Best Interests determination (BID)⁷ describes the formal process with strict procedural safeguards designed to determine the child’s best interest for particularly important decisions that affect him or her. It needs to facilitate adequate child participation and involve decision-makers with relevant areas of expertise, who can identify and balance all relevant factors in order to assess the best option. The process must be documented. UNHCR uses this procedure for particularly important decisions affecting the child that require stricter procedural safeguards in order to identify his or her best interests (cf. page 10 when BID is required).

Alternative Care:⁸ Alternative care is the care provided for children by caregivers who are not their biological parents. This care may take the form of informal or formal care. Alternative care may be kinship; foster care; other forms of family-based or family-like care placements; residential care; or supervised independent living arrangements⁹ for children.

Key Guiding Principles

Best interests of the child: Decision making regarding care arrangements and family reunification should always be guided by a holistic and comprehensive assessment of the child’s situation and what will be in his/her best interests. It should be conducted by competent and trained child protection staff.

Preventive Care for Children: “Support efforts to keep children in, or return them to, the care of their family or failing this, to find another appropriate and permanent solution.”¹⁰

Family-based care: Family-based care is preferable to the use of residential care, particularly over the long-term.

⁷ UNHCR, *Guidelines on the Formal Determination of the Best Interests of the Child*, 2007

⁸ *United Nations Guidelines for the Alternative Care of Children*, Article 29 (b) & (c), 2009

⁹ *In the context of Jordan, the independent living arrangements are called “supervised groups”, with the support of a mentor from the community.*

¹⁰ *United Nations Guidelines for the Alternative Care of Children*, Article 2 (a), 2009

Community-based care: The core approach of alternative care in emergency and refugee settings is ‘community-based.’ Refugee children should be cared for within the refugee community not with host country caregivers to prevent loss of their refugee status and identity.

Standard case management principles for SOPs¹¹

- Promote the child’s best interest
- Ensure the safety of the child
- Comfort the child
- Ensure appropriate confidentiality
- Involve the child in decision-making
- Treat every child fairly and equally (principle of non-discrimination and inclusiveness)
- Strengthen children’s resiliencies

Key Relevant Rights of Separated and Unaccompanied Children

- The right to non-discrimination (art. 2 and art 22 for refugees CRC)
- The right to life and survival (art. 6 CRC)
- The right to health and development (art. 6 CRC)
- The right to a nationality, legal identity and birth registration (art. 7CRC)
- The right to not be separated from their parents (art. 9 CRC)
- The right to participate in decisions about their future (art. 12 CRC)

III. OBJECTIVES

The overall objectives of the Standard Operation Procedures (SOPs) are to:

- i. Standardise and summarise procedures for UASC that all organisations working with UASC should adhere to; ensure compliance with the internationally agreed standards described in the Inter Agency Guiding Principles on Unaccompanied and Separated Children;¹² and ensure compliance with relevant national laws and procedures.
- ii. Clarify roles and responsibilities of agencies working within the spirit of complementarity and cooperation so that each member knows the role for which the agency stands accountable for in the process of (i) case management through Best Interest Procedures (BIA/BID) and follow-up; ii) family tracing and reunification (iii) alternative/interim care arrangements ; and (iv) durable solutions.
- iii. Ensure that UASC receive the care and protection they need.

IV. PROCEDURES

The detailed procedures for each step for responding to separated and unaccompanied children are described below.

4.1 Prevention of Separation

Prevention of separation within Syria is currently not within the scope of these SOPs. However, there are separations occurring within Jordan that needs to be addressed as described in the table;

Service Provision

Aside from the specific services of family tracing and reunification, alternative care placement and determination of the best interests of the child that will be outlined in these SOPs, the UASC may need other support services required by other children at risk to be tailored to their specific needs. These services are outlined here in summary and more detail is included in the national SOPs.

Types and timelines for alternative care

Every child will benefit from a BIA as a minimum requirement, BID will be completed as explained above.

The following types of alternative care are available for UASC:

1. Formalisation of existing family care arrangements
 - This includes existing family care arrangements for separated children (also known as ‘kinship care’) and unaccompanied children living in informal foster care
 - These arrangements should be maintained when found to be in best interest of the child (that is safe, stable and suitable)

2. Placement of the child into care of family member
 - If in the best interests of the child, the child may be placed with a family member who is willing and capable of providing care arrangement for the child
 - It will usually be in a child’s best interests to be placed with a family member unless protection concerns are identified

3. Temporary hosting
 - Hosting families will be identified to provide temporary care for children who are unaccompanied. This arrangement is to provide emergency care for unaccompanied children who arrive in camps,

CP Sub Working Group Jordan – UASC Task Force

while relatives are traced or alternative caregivers can be identified, so that children can be accommodated in family based care rather than temporary shelters

- Hosting families will be pre-screened and selected using standard criteria to be able to host children for a temporary period of time. If the care arrangement continues for more than 3 weeks then procedures for formal foster care for unaccompanied children will be implemented
4. Formal fostering
- Foster families will be selected from among the refugee population (Syrians in the case of Syrians, Iraqis in the case of Iraqis) or for a specific child from among the child's existing social network.
 - Foster families will be screened to develop a pool of standby hosting parents
 - Foster families can be used for those UAC who cannot be reunified with parents or family members or UASC for whom their current care arrangements are not in their best interest
 - For individual children, the foster family must be matched with the child²⁶
 - Formal foster arrangements must be reviewed by BID and forwarded by MOSD for MOJ's approval. A foster family will be provided with temporary guardianship for a child. The family will be responsible to provide care for the child. Further, the family will be able to take day-to-day decisions regarding medical care, school enrolment, legal decisions etc. MOSD will supervise this arrangement and must authorise international travel during this period
 - A review of the care arrangements will be conducted after 6 months by BID panel. Long-term legal guardianship may be transferred to the foster family on a case by case basis based on the BID Panel recommendation. Such an arrangement must always be in child's Best Interest. At this stage, the family may apply for a passport for the child to travel with them

5. Supervised Group Living

This could be the best option for UAC for whom family based care is not possible and who are accustomed to significant independence. The appropriateness of this type of care arrangement will be carefully considered on a case by case basis and should only be considered for boys 15 years old or older. This option is not appropriate for adolescent girls who should be placed in family in the current context. Child headed households where the head of the household is an adolescent boy may be placed under the supervision of a community mentor where placement in foster family is not possible.

- This arrangement involves maximum 3 adolescent boys living in tent/caravan (for camps) or apartment (in communities), supported by a 'mentor'
- The mentor should be someone who lives nearby and who could visit the place every day
- The case worker will select and screen and match the 'mentor' using the same process as for foster families, including using criteria, checking their references and providing training
- Placement would be approved/formalised in same process as foster families
- A case worker from the case management agency would provide on-going support to the mentor
- Supervision of this arrangement will be provided by the MOSD Behavioural Monitors
- For legal purposes, the unaccompanied children while in supervised group living should remain under the supervision of the MOSD Behavioural Monitors. In addition, significant decisions (e.g. legal and major medical related) will be made by the MOSD Behavioural monitors. Mentors will be given responsibilities for the daily decisions of the child (e.g. school enrolment) based on recommendations by case worker, and approved by BID panel.

4.9 Monitoring/Follow up

²⁶ The matching process takes into consideration both the child and the foster family's background, which include cultural customs, religious beliefs, place of origin, tribes (etc.) to ensure the placement of the child within the family will be in the best interests of the child.

CP Sub Working Group Jordan – UASC Task Force

Follow-up visits are designed to:

- Provide support and guidance to both the child and the caregiver on developing and maintaining a healthy and protective relationship
- Monitor and detect any problems arising between the child and the caregiver or if the care plan is being followed as planned
- Ensure the child and the family are accessing services and community resources in line with the care plan
- Frequently, update the child and the caregiver on the progress made towards long-term care solutions, specifically around family reunification
- Monitor for and mitigate the risk of abuse, neglect, violence or exploitation of the child
- Update the child and the caregiver on the family tracing efforts and exchanging information on the issue which might have emerged since the last visit

Monitoring visits for the first three months for the case worker should be for:

- Separated children at least 1 visit per month during this period
- UAC at least 2 visits per month and phone call every month (2 weeks after the home visit)

If protection concerns are identified, monitoring should be more regular as per the recommendations of the BID and care plan.

Following the 12 week period, the monitoring may be reduced to every 12 weeks thereafter, unless there are protection concerns and no further pending referral actions that are more urgent than the 12 week monitoring timeframe allows for.

If it is not possible to:

- Trace the child's relatives after two years of active tracing
- Or the relatives are located and after mediation are unwilling or unable to take the child
- Or the child is unwilling to be reunified with the relatives

Then the Caseworker will need to prepare and present a BID report to the BID panel (See 4.7) to guide the consideration of long-term care options available to the child. This process should follow the BID Guidelines²⁷ and Handbook for the Implementation of BID procedures.²⁸

For unaccompanied children or separated children placed in formal fostering the initial placement order will be for maximum of 6 months. The caseworker must provide written reports to the designated MOSD Behavioural Monitor after 3 months and facilitate a home visit to the child after 6 months.

After six months the care arrangements must be reviewed by the BID panel and returned to MOJ for extension of the placement order. At this point the length of placement will be at the discretion of the court, based on recommendation from the BID panel. A written report must be provided to the MOSD Behavioural Monitors at 9 and 12 months during the first year. After the first years, the frequency of the written should set in the individual care plan.

4.10 Case Closure of UASC

The child's case may be closed when most of the following have been achieved:

- a. The child has been placed in long-term care and this care arrangement has been formalised
- b. A minimum of 2 years have gone by since the placement and approval of the BID panel
- c. Follow up has been conducted as a minimum every 12 weeks
