

POPULATION

**105,583** declared by local authorities in Diffa region

**1,400** transferred to Sayam Forage camp

**2,420** transferred to Kablewa camp

Together with IRC protection monitoring continues in N'Guigmi to identify protection cases. Since the last *refoulement* incident no further cases were reported.

HIGHLIGHTS

- Since the Prime Minister's visit to Diffa, there are more armed escorts available for humanitarian workers in the Eastern part of the Diffa region. However, access to Bosso is still restricted and the south Eastern part, where only ICRC and MSF are working, remains nearly inaccessible in Bosso/Yebi.
- Food insecurity and sanitation are serious issues in the Diffa region. Needs concerning shelter will soon become another serious issue in view of the rapidly approaching rainy season.
- Registration of displaced persons from Lake Chad is ongoing in N'Guigmi with the deployment of CNE (government entity). A total of 2,420 individuals representing 760 households have been transferred to Kablewa on a voluntary basis.

Sanitary assistance continues in N'Guigmi on the displaced site Kimegana by APBE. Also through the funding of UNHCR, APBE is distributing essential drugs to the displaced population in need.

FUNDING

47%\*

**USD 81,430,664** RRRP Financial requirements

The United Nations World Food Programme (WFP) have welcomed in-kind and cash donations from USAID (US\$40 million) to support WFP's assistance to very poor households including more than 60,000 Nigerian refugees with life-saving food.

PRIORITIES

- Regaining access to certain areas. The security situation still prevents humanitarian actors from assisting the displaced population.
- The relocation process to Sayam Forage refugee camp which was stopped after the last attacks is re-starting.
- Construction and/or rehabilitation of shelters in view of the upcoming rainy season.

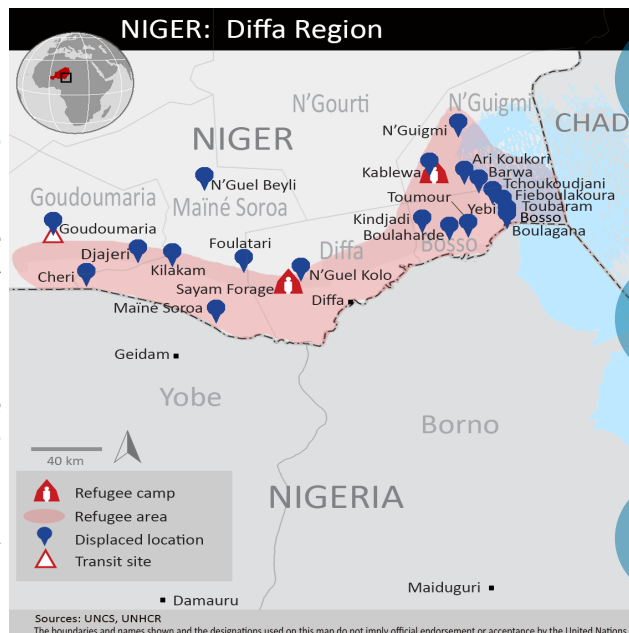

Care International is continuing water trucking with a UNHCR tanker truck of 16,000 L capacity. The extraction is done through a private forage in Sayam to distribute 16,000 L a day in the camp. Another tanker truck of 16,000 L capacity is set up in Kablewa camp.

A first stock of 600 shelters was pre-positioned in Kablewa camp by the Luxembourg Red Cross in view of the upcoming relocation process.

Distance learning centers have re-opened and teachers and pupils are slowly coming back. The distance learning education program has been suspended after the February attacks. The security is being reinforced in those centers.

\* Funds received by UNHCR as of 29th June
