

## I. Overview of Key Principles

- 1- Components of the standard package: blankets, heater, gas bottle, gas refills.
- 2- Assisting on a cases basis and coordinate the intervention through the winterization module in RAIS for avoiding duplications).
- 3- Case management trumps the system (i.e. there may be cases of “necessary” duplication).
- 4- Eligibility criteria.
- 5- Entitlement is based on a tiered system.
- 6- Preparation and early beneficiary identification and early data sharing of ration of tier 1 & tier 2 among beneficiary groups. For Budgetary purposes it is suggested to assume 15 % of cases are Tier 1, and 85% of cases are Tier 2.
- 7- Prioritization.
- 8- To maximize coverage with a conservative minimum standard as opposed to providing comprehensive or expanded package to few beneficiaries.

## II. Winterization Standard

- The Two tiered system is rooted in the notion, assumption and previous experience that families who received heaters and bottles in previous winterization rounds should not and do not need to get a priori new items. For this group only the replenishment component will be offered.
- Winterization partners agreed that, while monetised assistance must be based on the in-kind standard package, it is acceptable and at times even necessary for refugees (based on previous PDM) to spend the money on what they perceive as their most urgent needs in winter.
- Winterization partners agreed that the maximum number of persons that one heater can serve is 5. Therefore, for families above 5 a second heater should be offered. Two heaters is the maximum that should be offered to a case irrespective of the family size.
- Evidence-based decisions for the choice between cash and in-kind assistance should be always provided.
- Four organisations (UNHCR, NRC, IOCC and ACTED) carried out market research to determine the cost in JOD of the items, which make up the winterization standard package. The results were as follows:

Market Survey in JOD					
Organization	MTB	Heater (Local)	Heater (Imported)	Gas Bottle	Gas Refill
<b>UNHCR</b>	4.25 - 20	90	35-90	35.5	7.5
<b>NRC</b>	8	40- 90	39-40	42	7
<b>IOCC</b>	10	40-85	110-120	45	7
<b>ACTED</b>	8	110	60	45	7.5
<b>Proposed</b>	<b>8</b>	<b>80</b>		<b>45</b>	<b>8</b>

Based on findings outlined in the above table and using the inter-agency MEB approach regarding family size, the table below gives an estimate of the cost of a standard Winterization package, depending on the case size.

Cost of Winterization (in JOD) – AMPLE VALUES										
Item	Unit Cost	Qty	Entitlement	Family Size						
				1	2	3	4	5	6	7
Blanket	8	1	1 piece per person.	8	16	24	32	40	48	56
Heaters*	80	1	1 heater per case.	80	80	80	80	80	80	80
Bottle**	45	1	1 bottle per case.	45	45	45	45	45	45	45
Refill	8	1	On a family size basis.	48	48	64	80	96	112	128
				1.5 ref/month	1.5 ref/month	2 ref/month	2.5 ref/month	3 ref/month	3.5 ref/month	4 ref/month

\* Family of size 6 and 7 might be entitle to a second heater. The approach proposed in this table is conservative in the view of providing assistance to a larger number of cases.

\*\*Family of size 6 and 7 might be entitle to a second bottle. The approach proposed in this table is conservative in the view of providing assistance to a larger number of cases.

## Cash package calculation

Heater and bottles are calculated on a pro-rated system.

### Tier 1 FULL PACKAGE (JOD)

	Family Size						
	1	2	3	4	5	6	7
Heater+ Bottle+ prorated gas refill	73	98	139	180	221	262	303
Blanket	8	16	24	32	40	48	56
<b>Tier 1 FULL package</b>	<b>81</b>	<b>114</b>	<b>163</b>	<b>212</b>	<b>261</b>	<b>310</b>	<b>359</b>
<b>Suggested adjusted package for ATM purposes</b>	<b>80</b>	<b>115</b>	<b>165</b>	<b>215</b>	<b>260</b>	<b>310</b>	<b>360</b>

### Tier 2 PARTIAL PACKAGE

	Family Size						
	1	2	3	4	5	6	7
Gas refill	48	48	64	80	96	112	128
Blanket	8	16	24	32	40	48	56
<b>Tier 2 PARTIAL package</b>	<b>56</b>	<b>64</b>	<b>88</b>	<b>112</b>	<b>136</b>	<b>160</b>	<b>184</b>
<b>Suggested adjusted package for ATM purposes</b>	<b>55</b>	<b>65</b>	<b>90</b>	<b>115</b>	<b>135</b>	<b>160</b>	<b>185</b>

The average family size is currently estimated to be 4.6<sup>1</sup>.

<sup>1</sup> UNHCR – based on the analysis 32,000 vulnerable cases
