Source: Water networks data from the final Data Master Plan 2015 with updates from the BWE 2016. Only completed Projects where GIS data provided to WE have been mapped. Calculation of Most vulnerable Localities are based on following data sets.

1- Multi-Dprivation Index

2-Lebanese population dataset

3- Refugee population figures

The top quintile of the vulnerability mapping includes 251 localities

This map has been produced by the WATER Sector information Management officer UNICEF based on maps and material provided by the Government of Lebanon for operational purposes.
