### 1. DEMOGRAPHIC AND SOCIAL PROFILE

*NB: Figures and values in the profile only represent the population surveyed in household survey, not the total Afghanistan population, unless stated otherwise.*

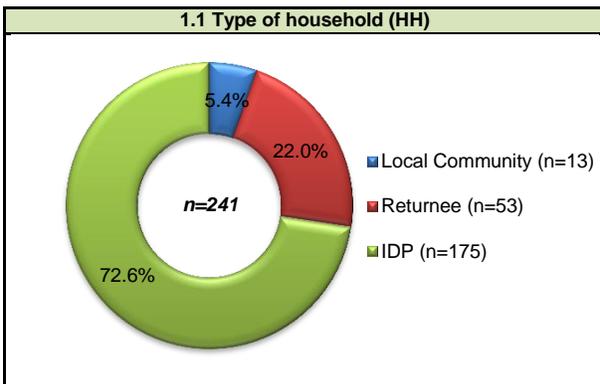

#### Summary

Bordering Saighan District, Aqarbat is located approximately 25 km northeast of Bamyan City. It is one of the most rural parts of Bamyan District and is situated close to the Baba Mountain range, a western extension of the Hindu Kush.

Of the 241 households surveyed in Aqarbat, 175 (73%) were IDP households, 53 (22%) were returnee households and 13 (5%) were local community households. The households encompass a combined total of 1,546 individuals with a gender ratio of 1.1 females to each male.

The average household size was revealed by the survey to be 9.5 persons among the local community, 6.3 persons among IDPs and 6.2 persons among returnees. Children (0-17 years) represent over half the average household size across all three groups with a gender ratio of 1.1 girls for each boy.

The elderly (aged 60+) were found to constitute 2%-6% of the population across all three household types. Approximately 3% of the population reported to be widowed with twice as many widows as widowers.

#### 1.2 Household size and composition

## 2. MIGRATION PROFILE

### Summary

Among the households surveyed, the year 1384 (2005/06) witnessed the largest number of returnee arrivals in HRA with 14 returnee households choosing to settle in Aqarbat. Also, the year 1382 (2003/04) witnessed the largest number of IDP arrivals with 51 IDP households choosing to settle in different HRAs. Since 1384 (2005/06), on average, approximately 3 returnee households per year have chosen to settle in the area. Since 1382 (2003/04), an average 14 IDP households per year have chosen to settle in Aqarbat.

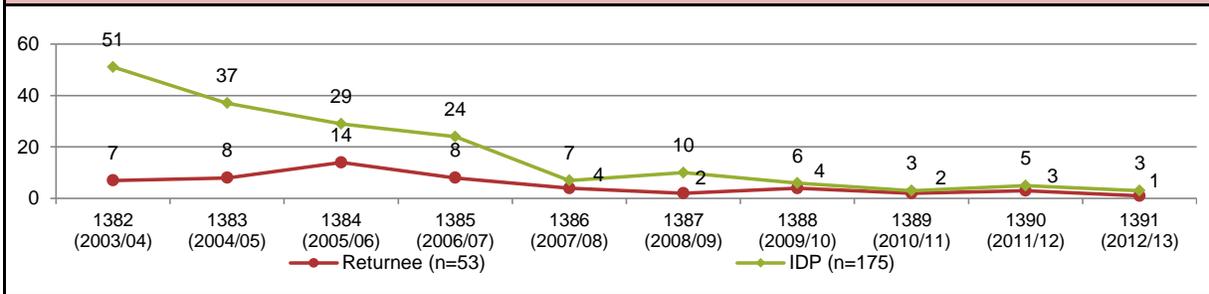

Of returnee and IDP households that have settled in Afghanistan in the last two years, all of returnee and 87.5% of IDP households stated that they did so voluntarily. Of these, all of returnee and IDP households stated that they intend to remain in the area.

All returnee households had sought asylum in either Pakistan (24.5%) or Iran (75.5%) with 98.1% stating that they did so to escape personal violence. Four-fifths also cited harassment/discrimination reasons and two-quarters cited economic reasons. A further, over one-quarter of returnee households stated that they sought asylum due to Family reasons.

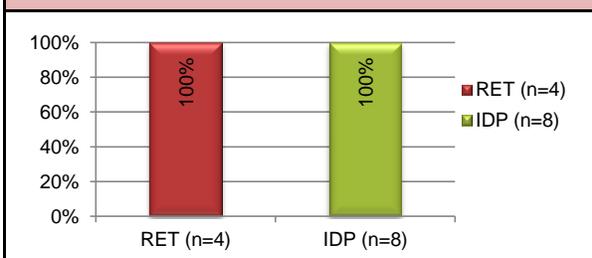

Among IDP households, 95.4% cited safety reasons due to conflict and over four-fifths stated harassment/discrimination reasons as the main reasons for having fled their districts of origin. Two-fifths also cited family reasons as having influenced their decision to move. A further, 17.7% stated that they have fled their districts of origin because of economic reasons.

Approximately three-quarter of households stated that legal difficulties and two-quarter cited safety were the main reasons of returning back to Afghanistan. Further, two-quarters stated place of origin as having influenced their decision to return. A further approximately two-fifths of households returned to Afghanistan because of harassment/discrimination.

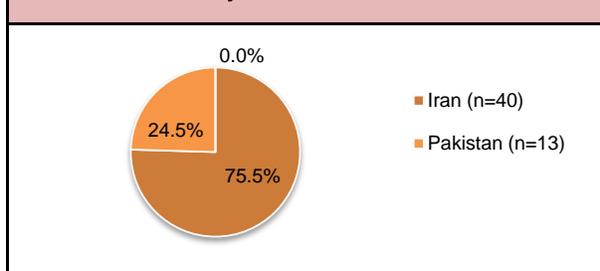

### 2.1 Year households settled in current location

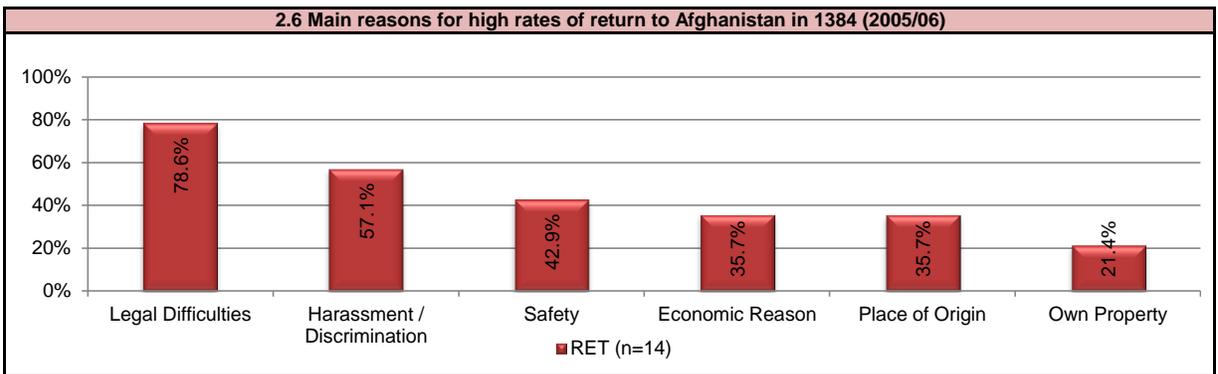

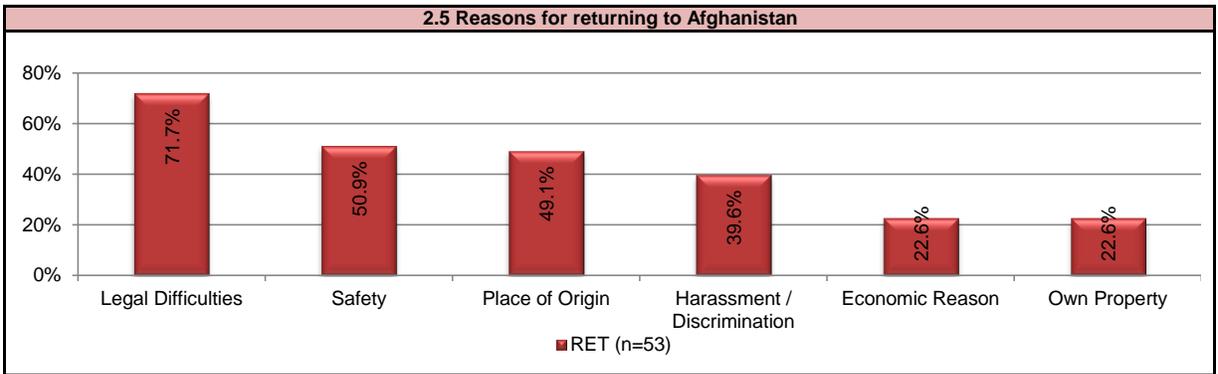

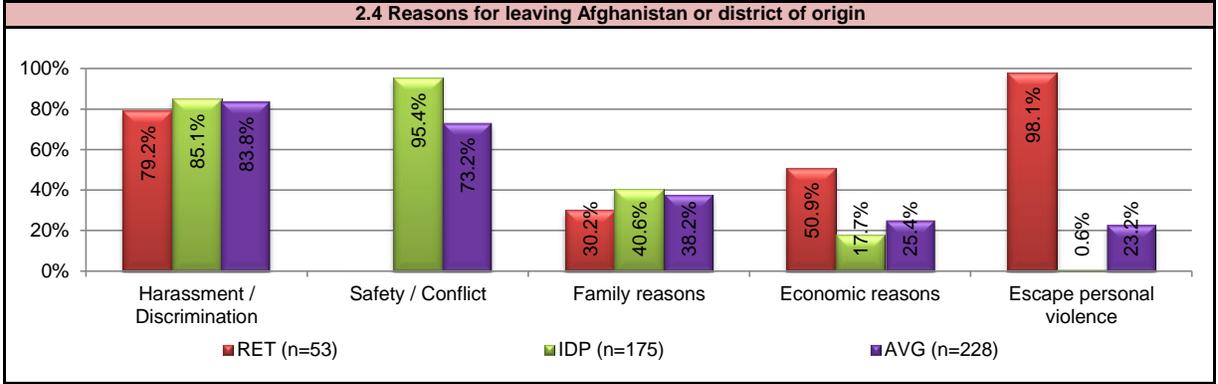

### 2.2 Percentage of HHs that settled in last 2 years and intend to remain

### 2.3 Countries of asylum from which HHs have returned

**3. HOUSING STATUS PROFILE**

**Summary**

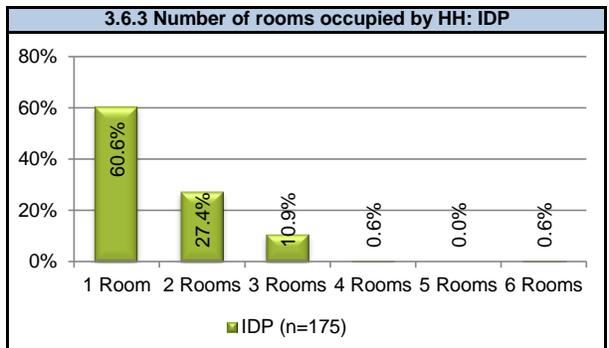

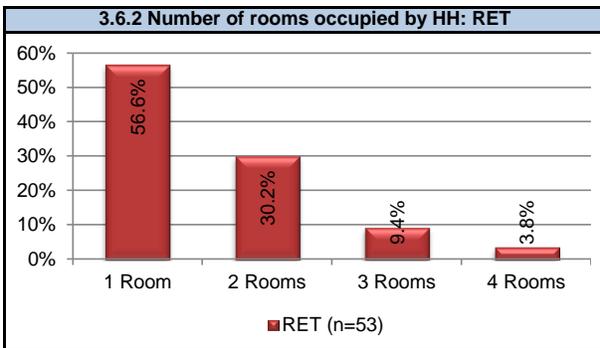

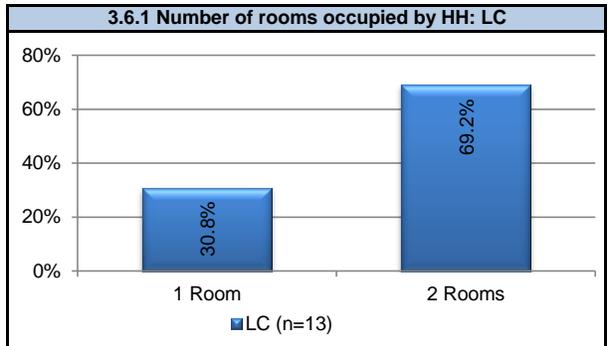

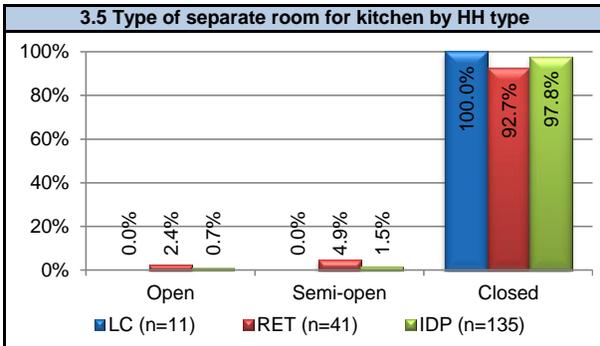

Survey findings reveal that 85% of local community households, 62% of returnee households and 55% of IDP households currently occupy single family homes. The vast majority of remaining households reside in either a separate apartment or shared apartment. All dwellings across the three household types were mud-brick or mud constructions. Similarly, almost all roofs were reported to be wood constructions.

Among local community households, over two-thirds occupy two-room dwellings with remaining households currently occupying dwellings with a single room. In contrast, 61% of IDP households and 57% of returnee households occupy dwellings with only one room, with approximately 30% of remaining households across both groups occupying two-room dwellings. In the region of 10% of returnee and IDP households were found to be residing in three-room dwellings.

With regard to cooking facilities, 85% of local community households and 77% of both returnee and IDP households have a separate kitchen. The kitchen takes up part of a room within the home for the majority of remaining households. A small number of returnees (4%) and IDPs (2%) cook in the open.

**4. WATER, ELECTRICITY, FUEL AND SANITATION**

**Summary**

**Water:** Piped water source is the main source of water for 61.5% of local community households and 66.0% of returnee households. It also provides water for 39.1% of IDP households and it is located on average 12 minutes away from both local community households and IDP households and 9 minutes away from returnee households. Proportionally more IDP households (47.7%) use open body of water which is located 17 minutes away from local community households and 12 minutes away from both returnee and IDP households, compared to local community households (23.1%) and returnee households (15.1%). A further, 7.5% of returnee and 7.5% of IDP households have access to unprotected spring. Proportionally more local community households (7.7%) have access to open well than 1.7% of IDP households and 3.8% of returnee households.

**Electricity:** Of the 241 households surveyed, a total of 191 (79.3%) reported to have had access to an electricity supply in the 30 days prior to being surveyed. Solar was the most important source of electricity among 81.8% of local community households, 90.2% of returnee households and 96.4% of IDP households. Proportionally less IDP households (3.6%) have access to battery electric source compared to 9.1% of local community and 9.8% of IDP households. A further, 9.1% of local community households use electric grid.

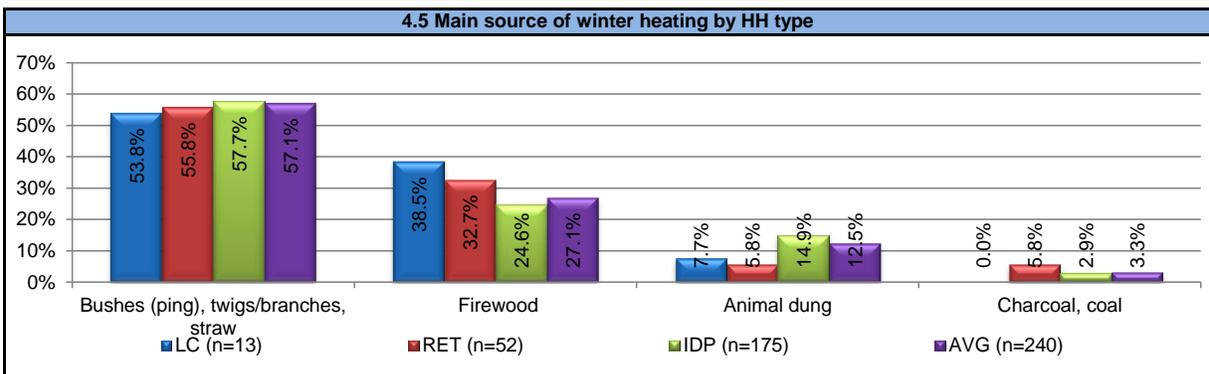

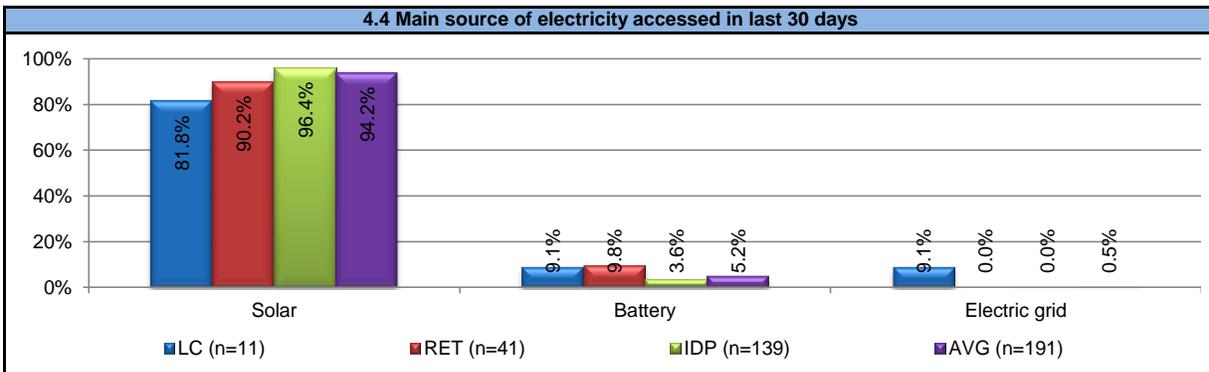

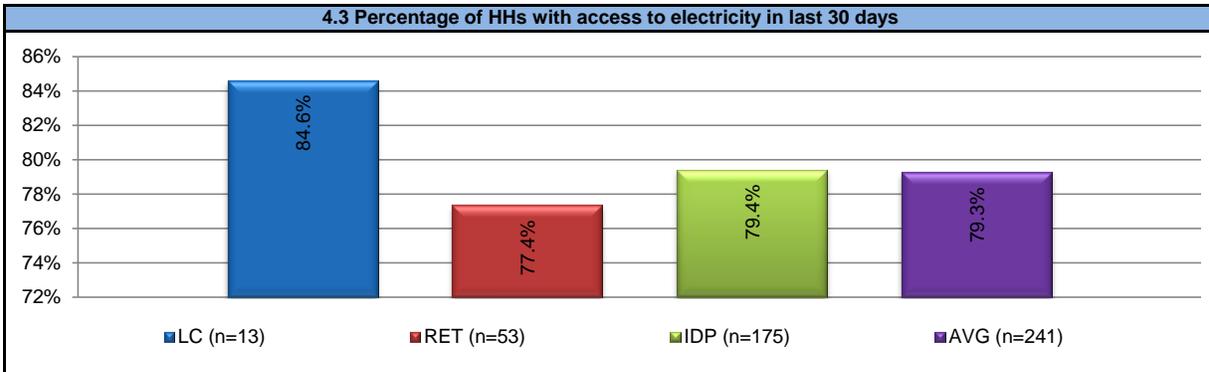

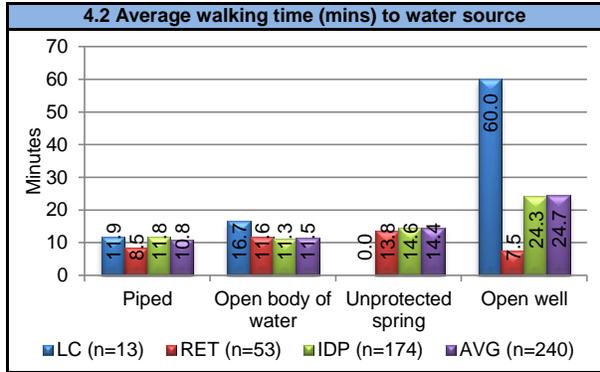

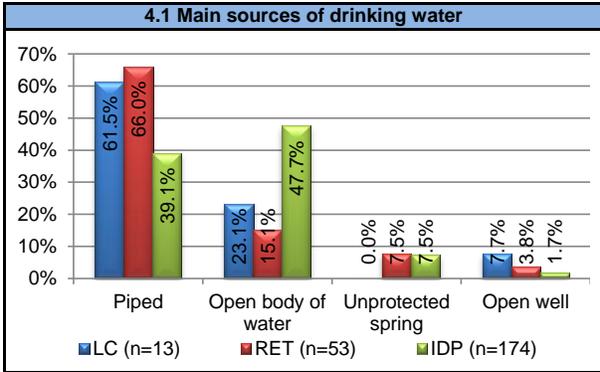

**Fuel:** During the winter months, approximately three-fifths of all three households types use bushes, twigs/branches and straw for heating. A further, 38.5% of local community, 32.7% of returnee and 24.6% of IDP households use firewood for heating. 14.9% of IDP households use animal dung which is higher than local community (7.7%) and returnee households (5.8%). Furthermore, only 5.8% of returnee and 2.9% of IDP households use charcoal/coal for heating.

Bushes, twigs/branches and straw provide cooking fuel for 69.2% of local community, 86.8% of returnee and 92.6% of IDP households. A further, 15.4% of local community households, 5.7% of returnee households and 4.0% of IDP households use animal dung for cooking fuel. Firewood is mostly used by local community households (15.4%) compared to 7.5% of returnee and 3.4% of IDP households.

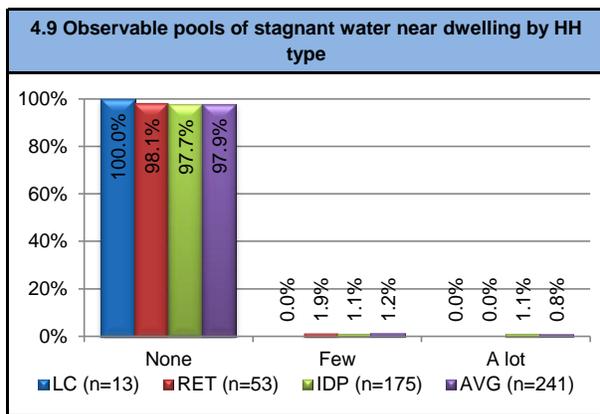

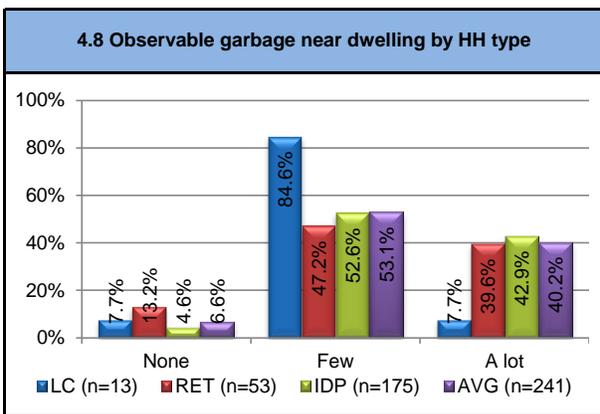

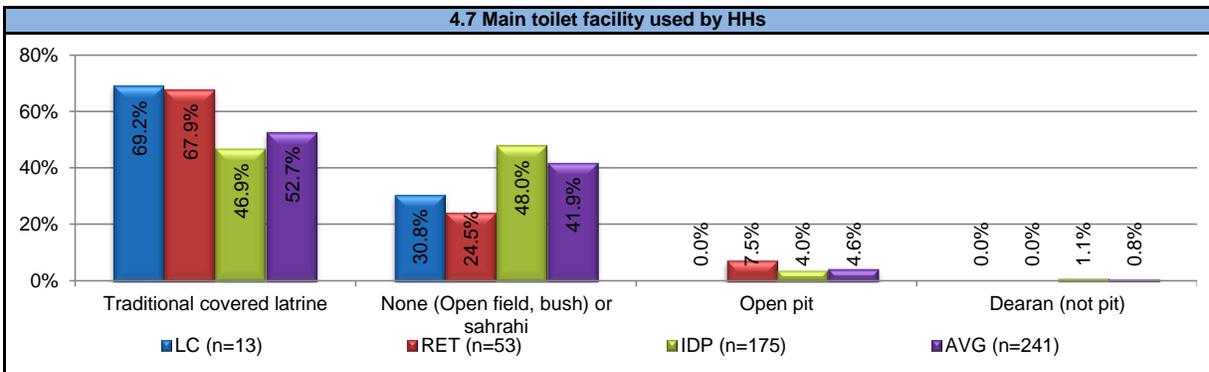

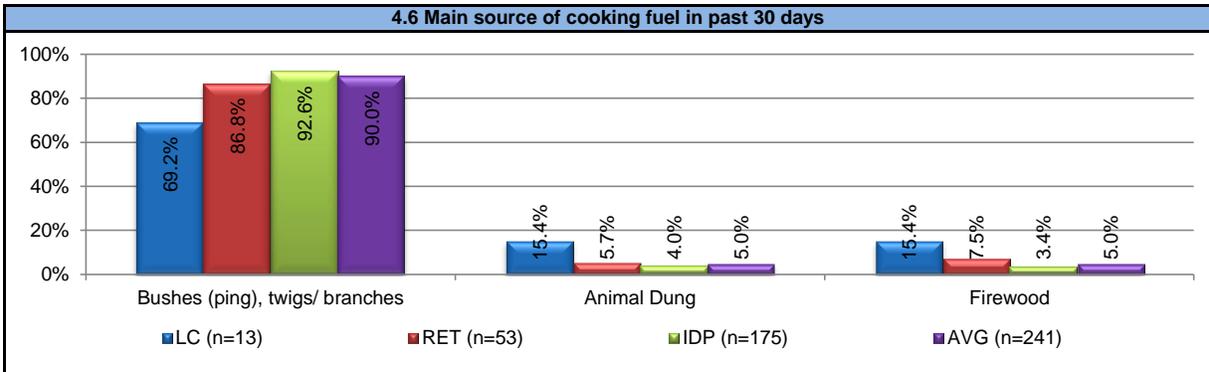

**Sanitation:** 69.2% of local community, 67.9% of returnee households and 46.9% of IDP households have access to a traditional covered latrine. Proportionally more IDP households (48.0%) have access to open field, bushes, and sahrahi for toilet compared to local community households (30.8%) and returnee households (24.5%). A further, 4.0% of IDP and 7.5% of returnee households use open pit latrines. Moreover, only 1.1% of IDP households use dearan (not pit).

Surveyors took note of whether any garbage or pools of stagnant water were observed in close proximity to the households they interviewed. 7.7% of local community households, 13.2% of returnee households and 4.6% of IDP households didn't have any garbage near their dwellings. A further, 84.6% of local community households, 47.2% of returnee households and 52.6% of IDP households had little garbage near their dwellings. Furthermore, 7.7% of local community households, 39.6% of returnee households and 42.9% of IDP households had a lot of garbage near their dwelling. Also, all of the local community, and over 97% of both returnee and IDP households didn't have any stagnant water near their dwellings. In addition, 1.9% of returnee households and 1.1% of IDP households had little stagnant water near their dwellings. Moreover, only 1.1% of IDP households had a lot of stagnant water near their dwellings.

**5. LABOUR & LIVELIHOODS**

**Summary**

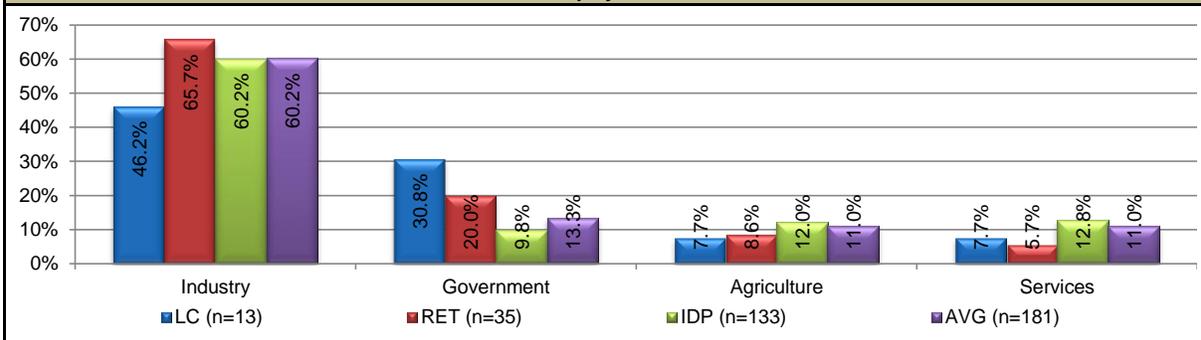

According to survey findings, 38.8% of IDPs, 38.4% of returnees and 34.1% of local community members are engaged in work for the family, with females accounting for approximately three-fifths. A further 12.1% of IDPs, 10.7% of returnees and 11.4% of local community members reported to be working for a salary. Of those in gainful employment, all returnee members, 92.9% of local community members and 94.7% of IDPs, are male. Industry represents the main employment sector for 65.7% of returnees, 60.2% of IDPs and 46.2% of local community members. A larger proportion of local community members (30.8%) work in the government sector compared with returnees (20.0%) and IDPs (9.8%). Similarly, IDPs were found more likely to be working in the service sector and in agriculture than their local community and returnee counterparts.

Seven IDPs and one local community member aged 12-17 years were also reported to be employed.

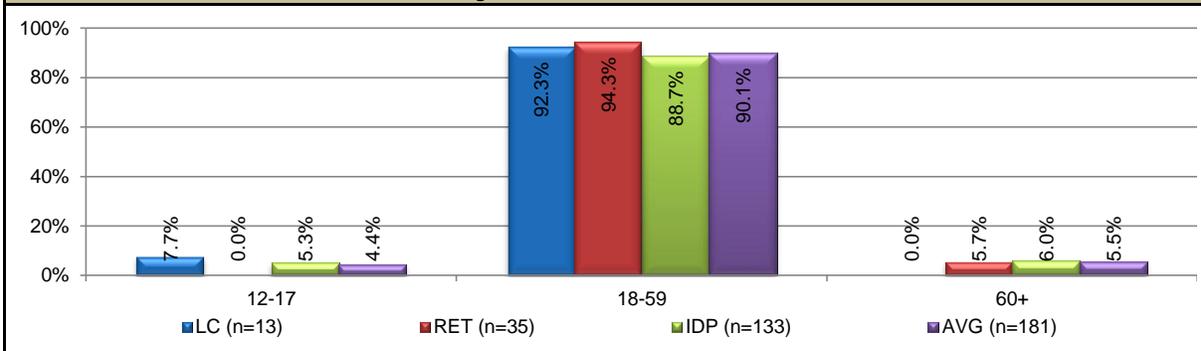

**5.1 Percentage of household members working**

**6. HOUSEHOLD INCOME, DEBT, ASSETS AND EXPENDITURES**

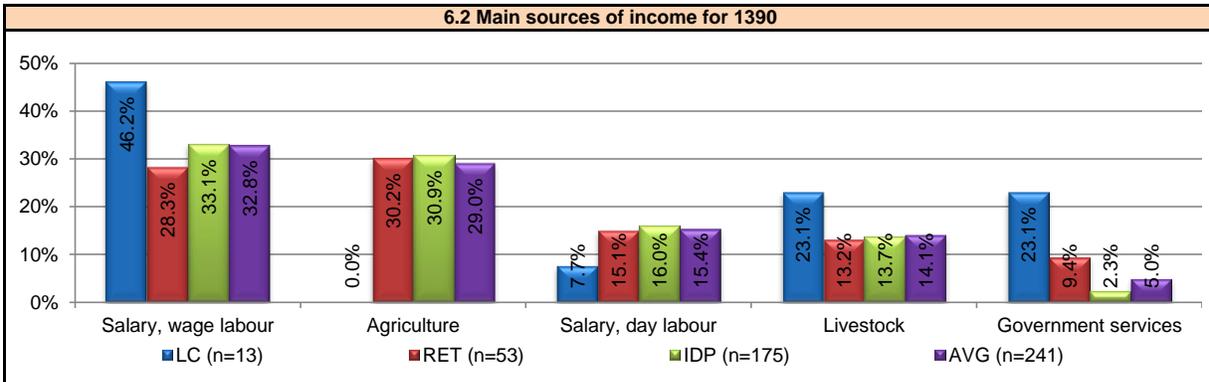

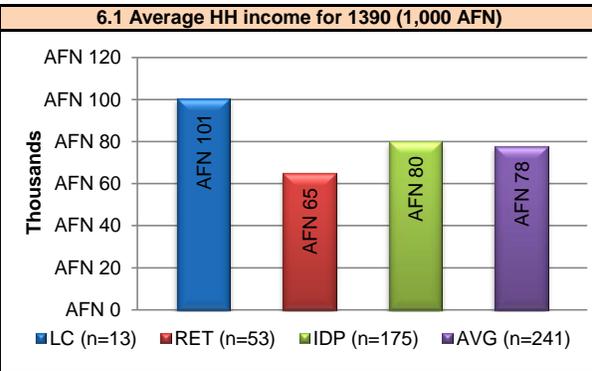

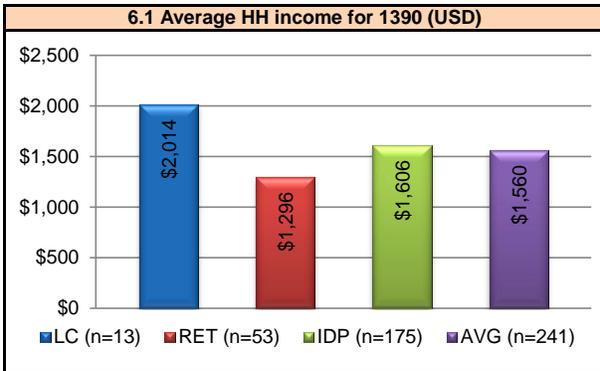

**Summary**

**Income:** Average household income in 1390 was USD 2,014 among local community households, USD 1,606 among IDP households and USD 1,296 among returnee households. Among local community households, the majority of annual income was derived from wage labour (46.2%), livestock (23.1%) or the government sector (23.1%). Comparable proportions of both returnee and IDP households derived annual income from wage labour (30.0% approx.), agriculture (30.0% approx.), day labour (15.0% approx.) and livestock (13.0% approx.).

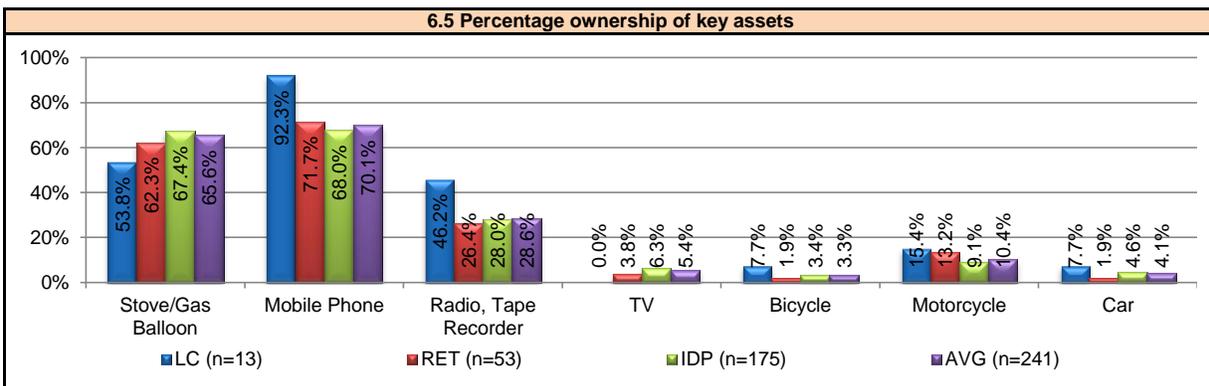

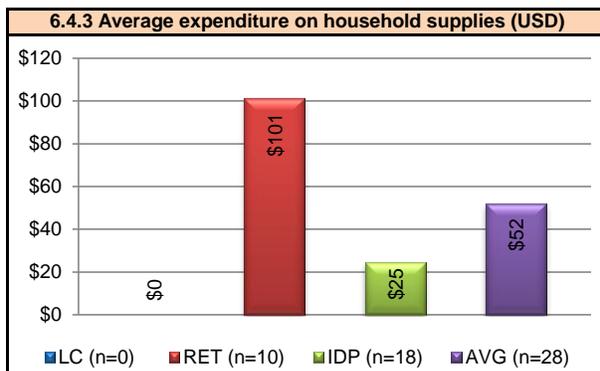

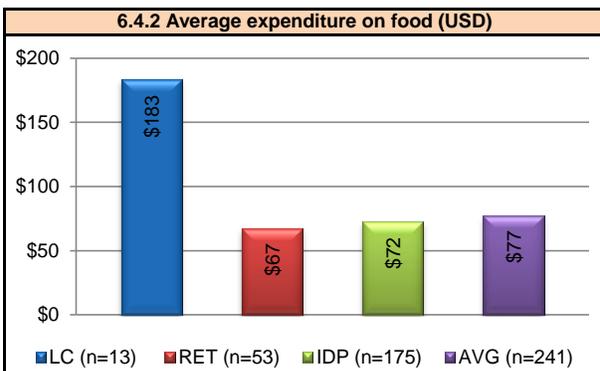

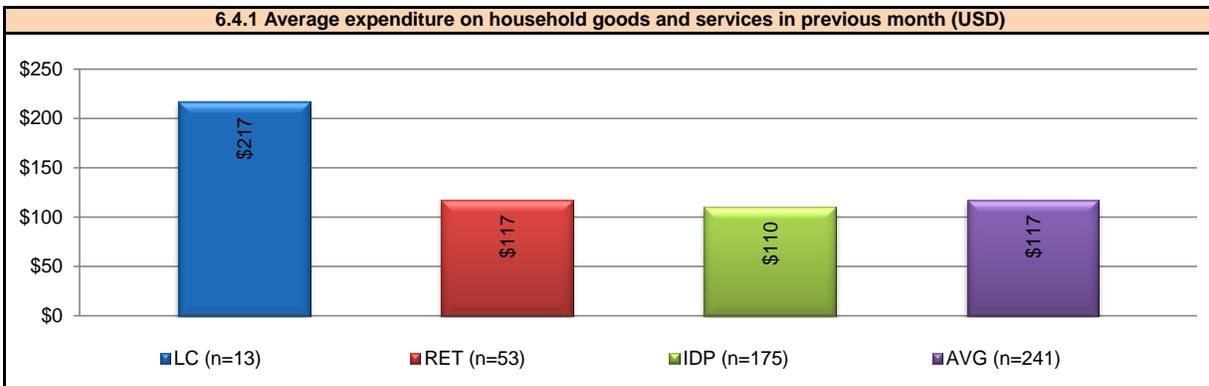

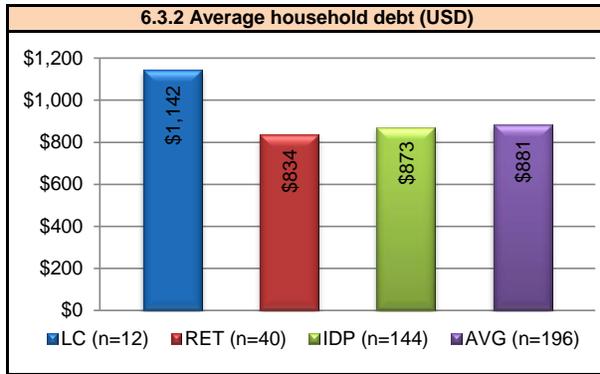

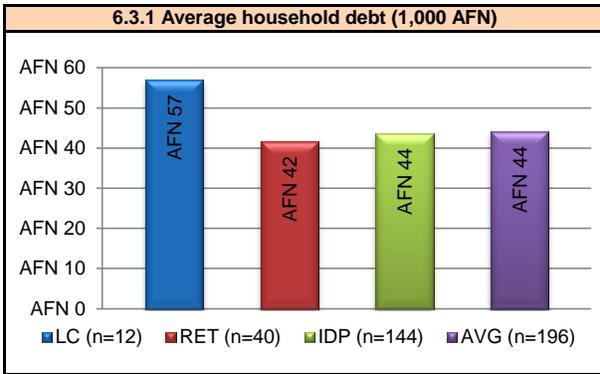

Average household debt was revealed to be USD 1,142 among local community households, USD 873 among IDP households and USD 834 among returnee households.

**Expenditure:** Average household expenditure in the month prior to being surveyed was USD 217 among local community households, USD 117 among returnee households and USD 110 among IDP households. Food supplies constituted a larger proportion of monthly expenditure for local community households (84.3%) than for IDP (65.5%) and returnee (57.3%) households.

**Assets:** With regard to ownership of key household assets, 67.4% of IDP households, 62.3% of returnee households and 53.8% of local community households own a stove/gas balloon. Local community households (92.3%) were more likely to own a mobile telephone than returnee (71.7%) and IDP (68.0%) households, and almost twice as likely to own a radio. Local community households were also more likely to own a motorcycle, and significantly more likely to own a bicycle or a car.

**7. AGRICULTURE & LIVESTOCK**

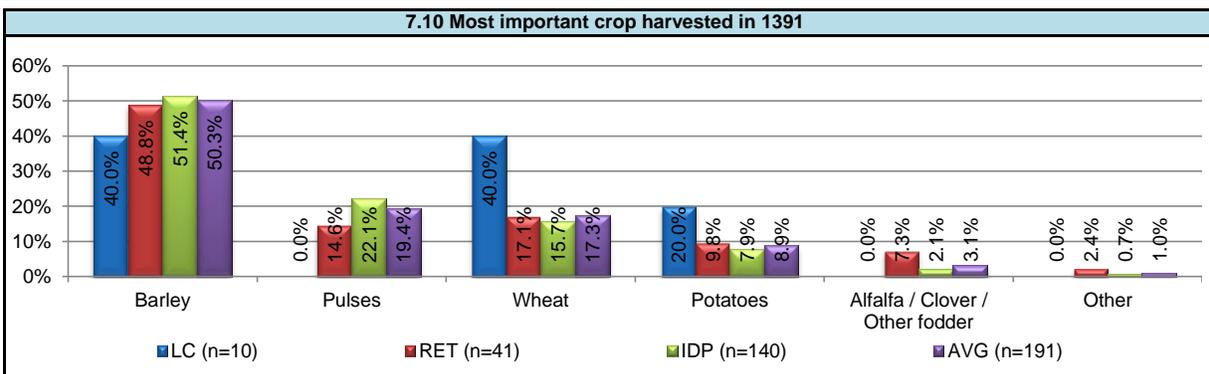

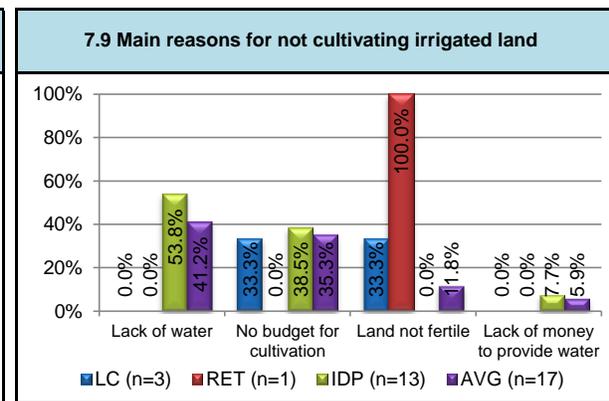

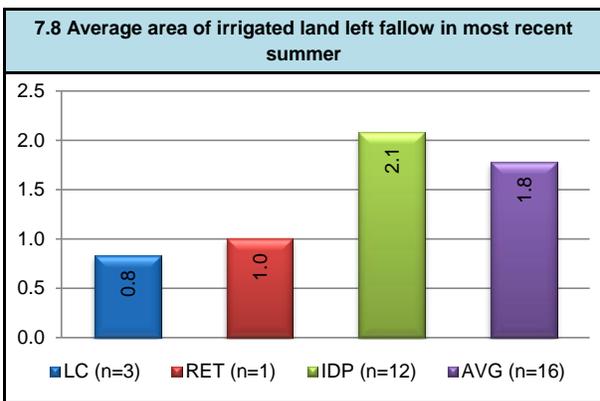

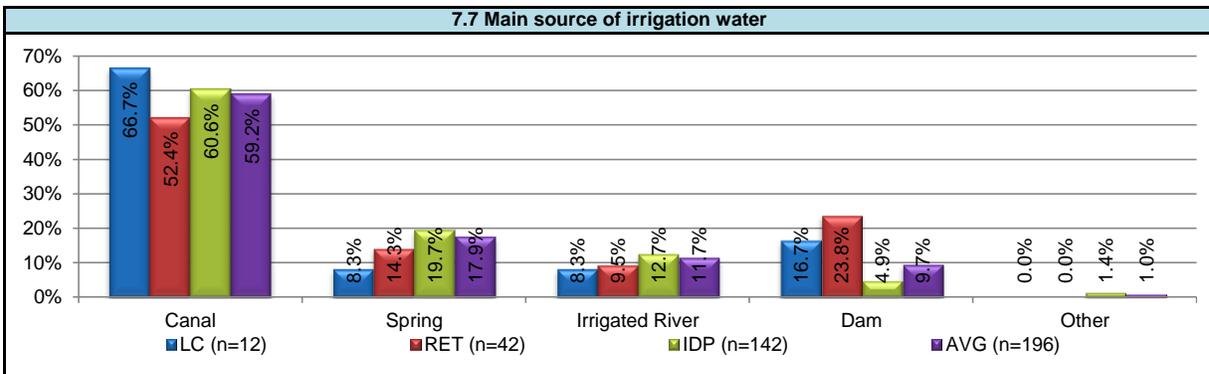

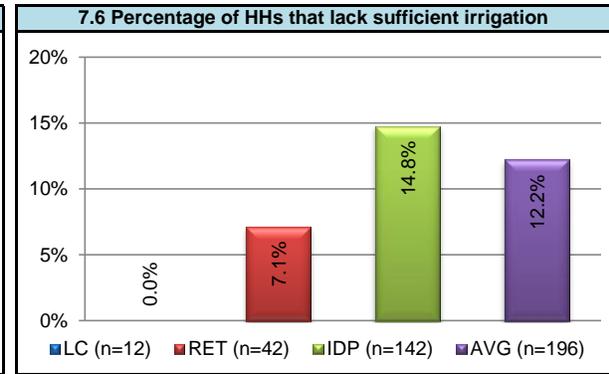

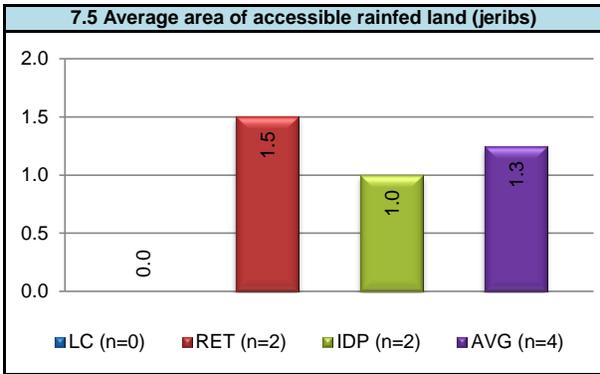

**Summary**

**Agriculture:** Of surveyed households, 92.3% of local community households, 81.1% of IDP households and 79.2% of returnee households have access to agricultural land. In 1391, on average, 2.4 jeribs of land were cultivated by local community households, 2.1 jeribs by returnee households and 1.6 jeribs by IDP households. Barley was the most important crop harvested by 51.4% of IDP households, 48.8% of returnee households and 40.0% of local community households. Wheat was the second most important crop for local community (40.0%) and returnee (17.1%) households, while pulses were the second most important crop for IDP households (22.1%). A lack of money and seed were the main reasons for not cultivating more land. Of all households surveyed, only one returnee households has access to a garden plot.

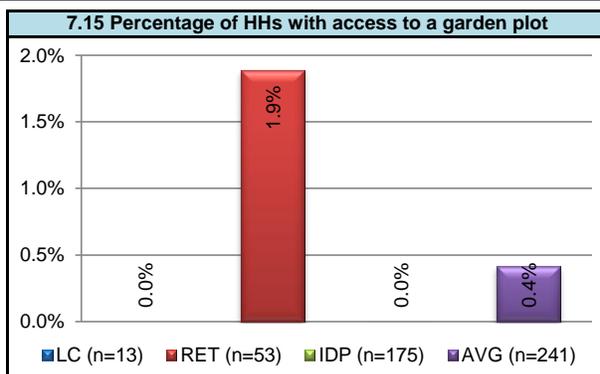

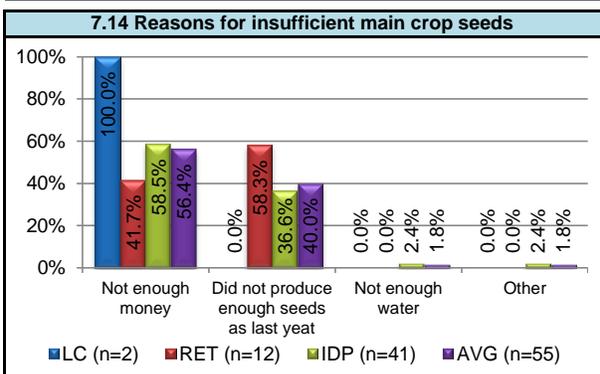

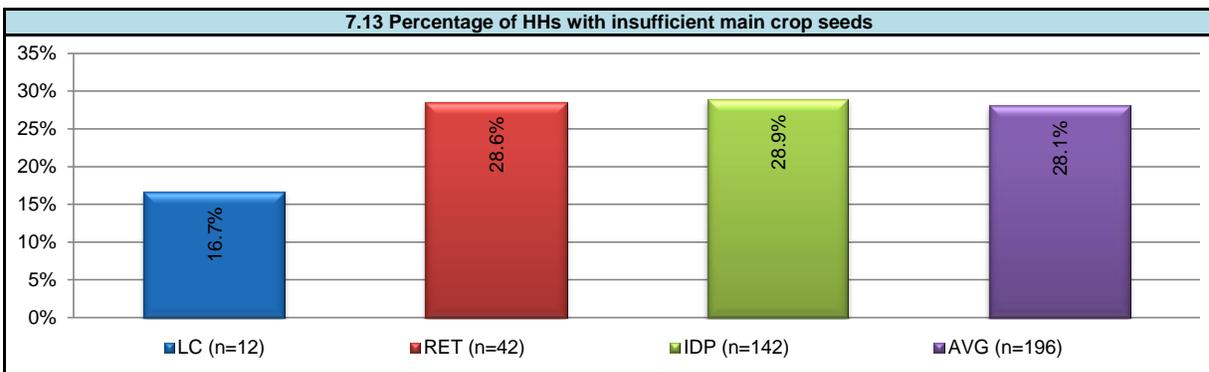

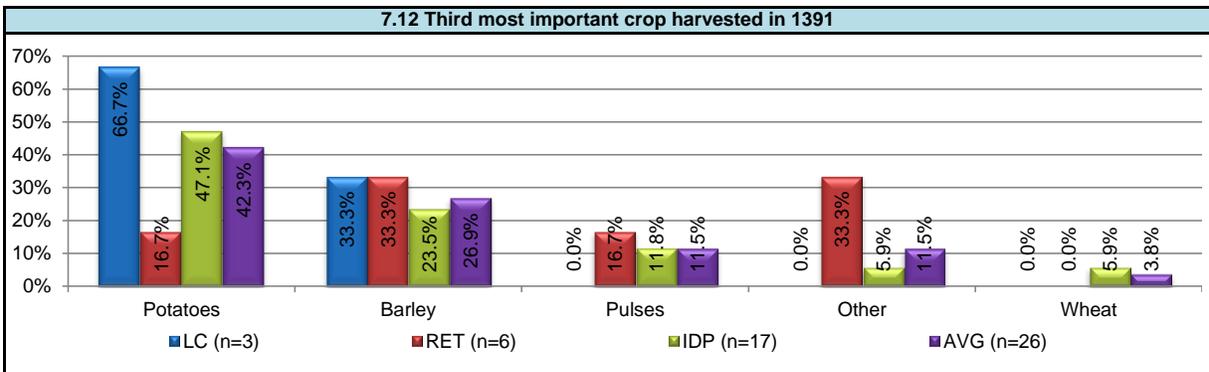

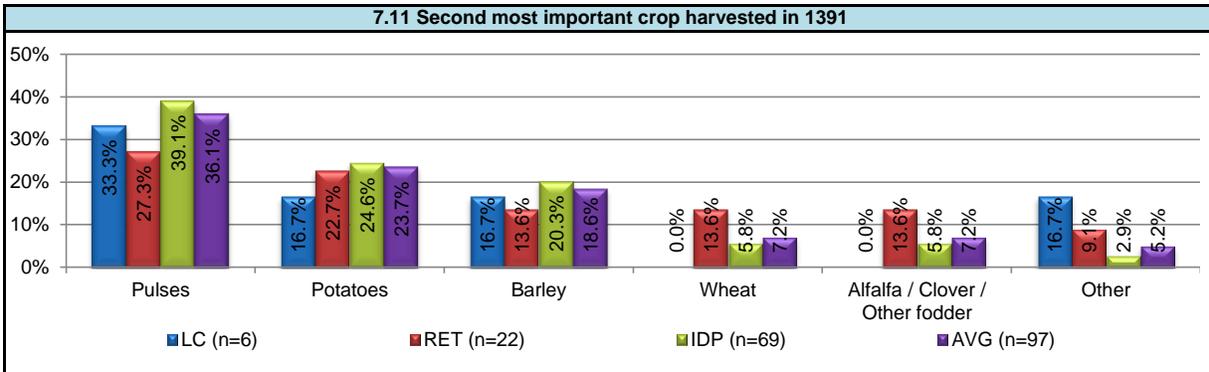

**Livestock:** Some form of livestock is owned by all local community households, 88.6% of IDP households and 62.3% of returnee households. Among households that do, donkeys are owned by 92.3% of local community households, 89.0% of IDP households and 75.8% of returnee households. Two-thirds of returnee households own goats and are marginally more likely to do so than other household types. Comparable proportions (52.0%-58.0%) in all three groups own sheep. Proportionally more IDP households (47.1%) own cows than do returnee (36.4%) and local community (23.1%) households. Comparable proportions of returnee and IDP households own cattle (21.0% approx.) and oxen (15.0% approx.).

**8. ACCESS TO SERVICES PROFILE**

**Summary**

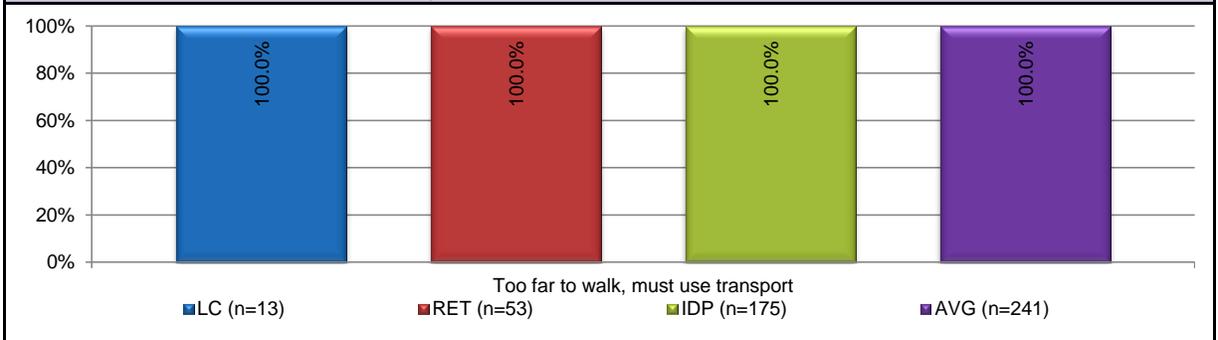

All of three household types stated that the Provincial Centre is too far to walk to. In the last three months, the main reasons for travelling to the Provincial Centre for returnee and IDP households were to purchase goods or services or to go to hospital while for local community households, the main reasons were to purchase goods or services or to work. Moreover, all three household types stated that the nearest police station is too far to walk, must use transport.

Over one-third (38.5%) of local community households and two-fifths (39.6%) of returnee households stated that public health Centre is 15-60 minutes away while for two-thirds (65.7%) of IDP households, it is more than 1 hour away. For the vast majority in all three community groups, the nearest private health clinic is too far to walk. The nearest hospital is too far to walk for all household types.

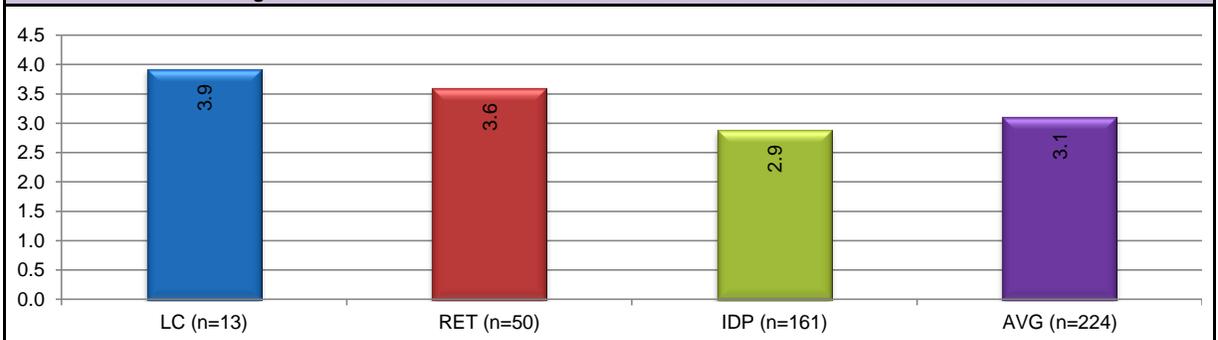

Over two-quarter (53.8%) of local community, two-thirds (64.2%) of returnee households and over two-quarters (56.0%) of IDP households stated their employment area is less than 15 minutes. Over 80% of three household types stated their access to transport is less than 15 minutes away.

For all community households, the nearest primary and secondary schools for both boys and girls are located 15-60 minutes away on foot. In addition, the nearest high schools for both boys and girls are too far to walk, must use transport.

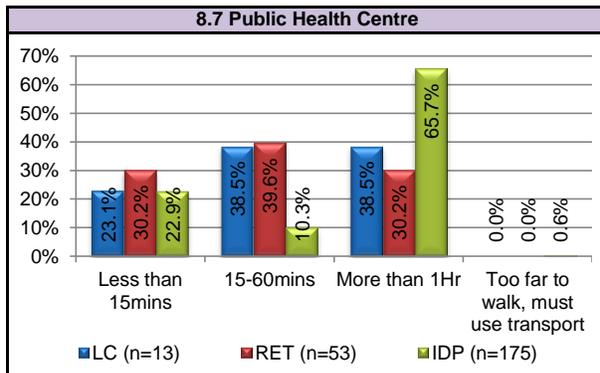

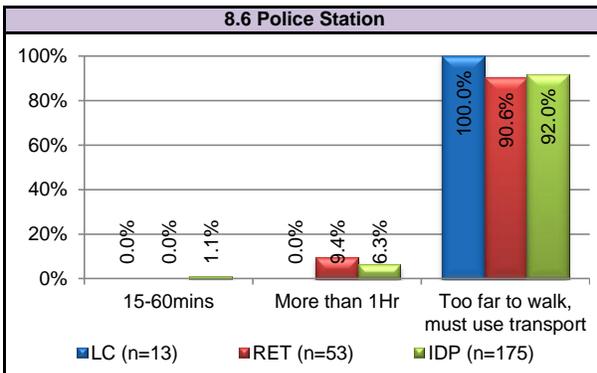

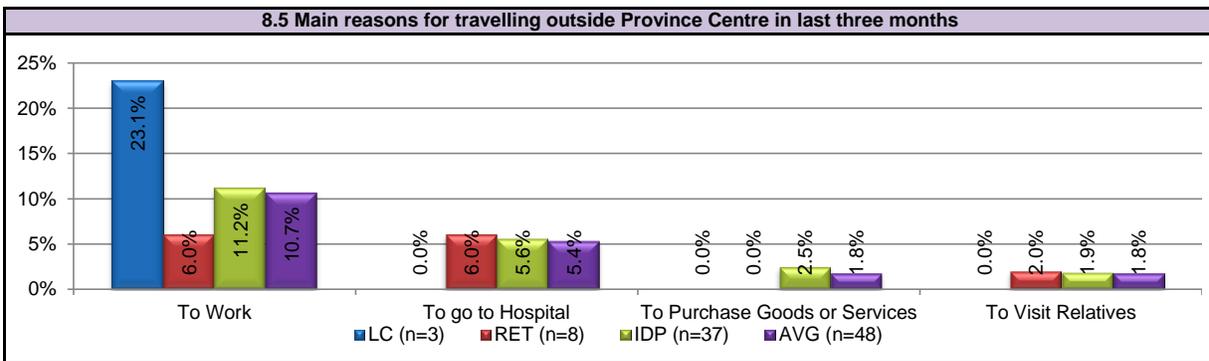

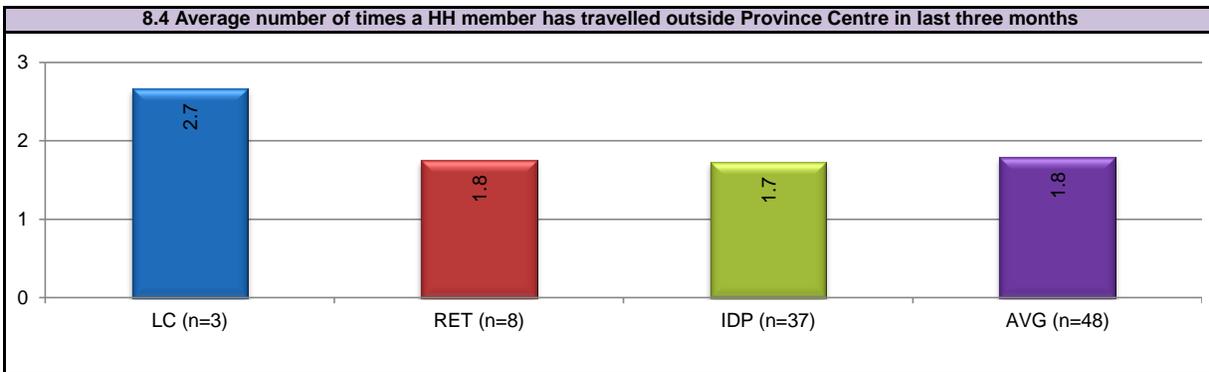

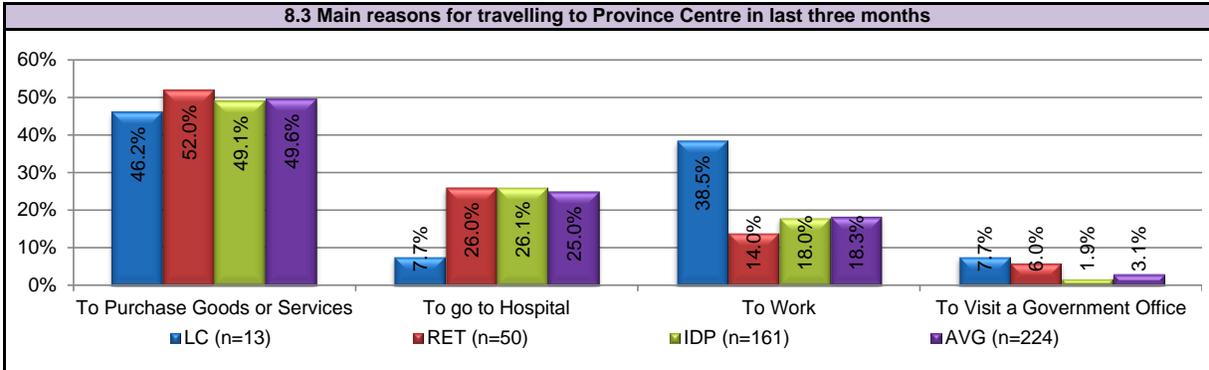

**8.1 Average time taken to walk one way to Province Centre**

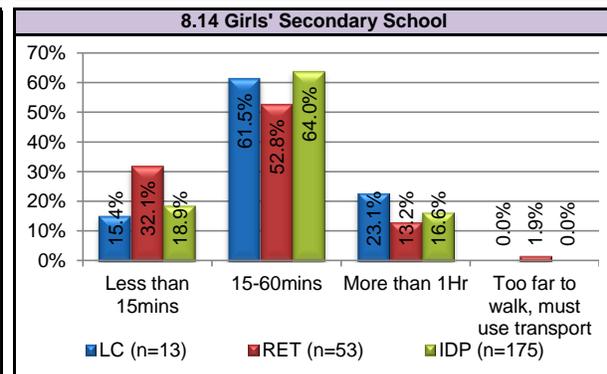

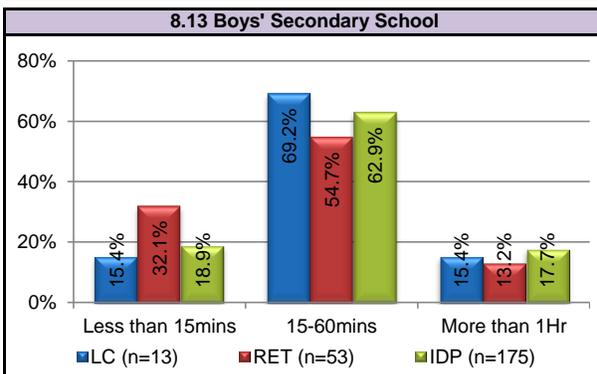

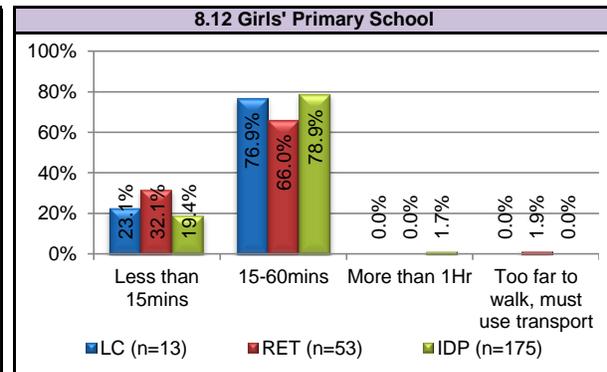

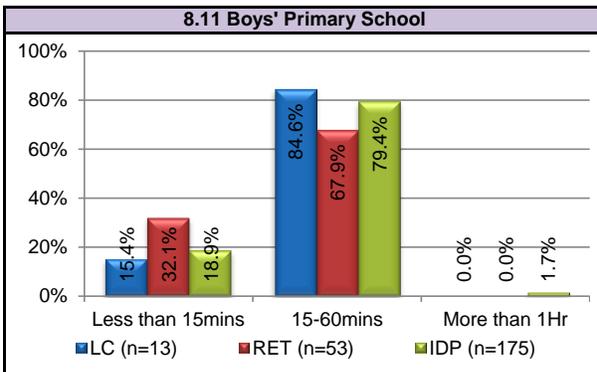

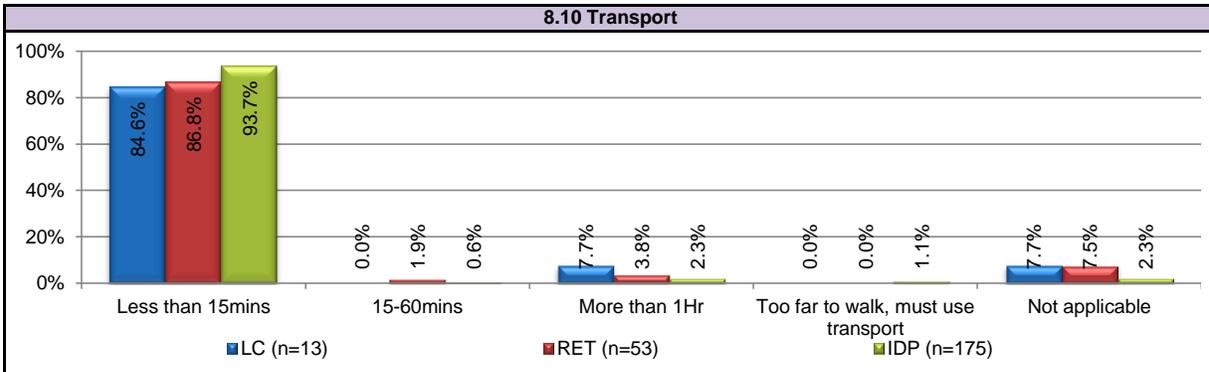

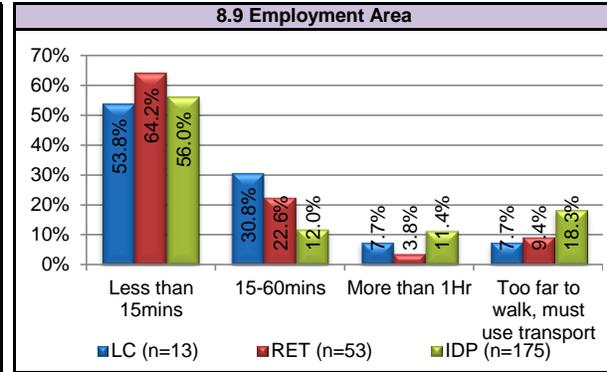

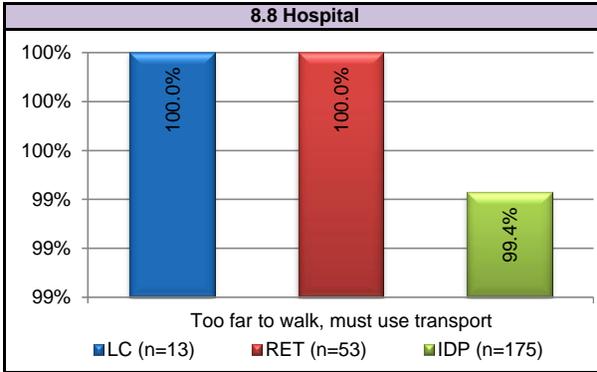

**8.2 Average number of times a HH member has travelled to Province Centre in last three months**

**9. EDUCATION PROFILE**

**Summary**

Among those aged five years and over, 54.2% of the local community, 42.1% of returnees and 40.7% of IDPs reported to be literate. Of these, 69.6% of local community males, 48.6% of returnee males and 49.6% of IDP males reported to be literate. Similarly, 40.0% of local community females, 36.3% of returnee females and 32.6% of IDP females reported to be literate.

Among adults aged eighteen years and over, 84.6% of local community males, 88.9% of returnee males and 86.2% of IDP males did not achieve any school grade. Similarly, 93.3% of local community males, 94.9% of returnee males and 95.1% of IDP males had not achieved any school grade.

Among males aged 6 to 24 years, 78.6% of local community males, 66.7% of returnee males and 57.4% of IDPs males reported to be currently attending school. Among females aged 6 to 24 years, 42.1% of local community females, 50.7% of returnees and 45.8% of IDP females reported to be currently attending school. The main reason for not attending school given by those aged 6 to 24 years across all three groups was because their families didn't allow them. Proportionally more IDP members (20.6%) of those aged 6 to 24 years didn't attend school because they needed to work to help family compared to returnee (11.1%) and local community (10.7%). A further, 12.0% of those aged 6 to 24 years across all three groups didn't attend school because of marriage.

**10. HEALTH PROFILE**

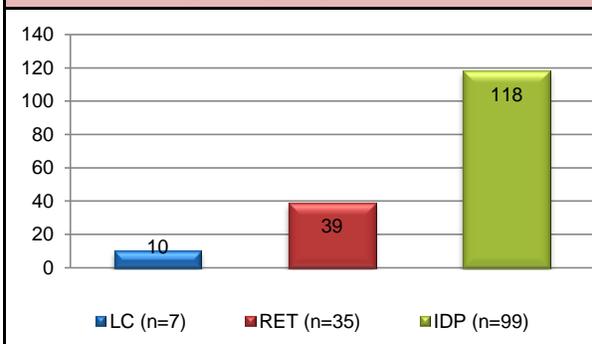

**Summary**

53.8% of local community households, 66.0% of returnee households and 56.6% of IDP households had between one and two household members admitted to a health facility as an inpatient over the course of the previous month. 61.5% of local community, 60.4 of returnee and 50.3% of IDP households also had at least one member receive care from a health provider, a pharmacy or traditional healer without having to stay overnight. The comprehensive health center was visited most by all three household groups, followed by the Regional Hospital and the private health facility. The most common reasons for seeking medical treatment by local community households were respiratory problems (50.0%), digestive problems (20.0%), communicable problems (10.0%) and psychological problems (10%). Similarly, for returnee households the most common reasons were respiratory diseases (20.9%), digestive problems (18.6%), and treatment of infectious problems (14.0%). Among IDP households, the main reasons for seeking medical treatment were respiratory diseases (29.2%), infectious problems (20.0%), and digestive problems (14.2%).

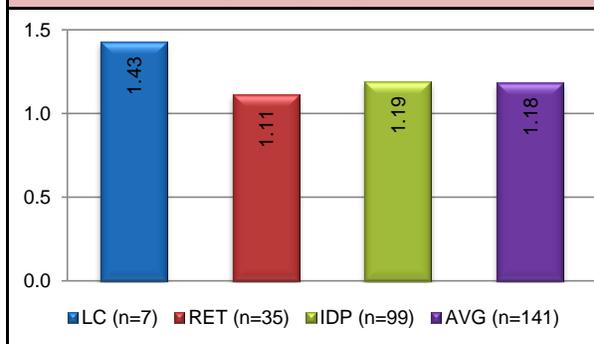

Of the 365 females aged 13-49 years that were included in the survey, a total of 97 were reported to be married among local community households (n=3), returnee households (n=27) and IDP households (n=67). Based on this data, the average number of births stands at 3.0 for local community females, 3.7 for returnee females and 5.0 for IDP females. Correspondingly, the average number of infant/child deaths is 0.5 for local community females, 0.9 for returnee females and 1.4 for IDP females. Of the 78 females aged 13-49 years that have given birth, 50.0% of local community females, 50.0% of returnee and 27.3% of IDP females received antenatal care during their last pregnancy with an average of 3.86 antenatal care visits per mother, and 31.7% had the assistance of a midwife during delivery.

With regard to children under the age of five, 83.3% of local community children, 76.2% of returnee children and 81.2% of IDP children have been registered with the civil authorities. Over the course of the previous month, 50.0% of local community under-fives, 73.8% of returnee under-fives and 84.1% of IDP under-fives have received a Vitamin A capsule, and one-third of local community, 21.4% of returnee and 23.2% of IDP children have suffered from diarrhea. Furthermore, 16.7% of local community children, 7.1% of returnee children and 10.1% of IDP children have a persistent cough.

**11. HOPUSEHOLD SHOCKS AND COPING STRATEGIES**

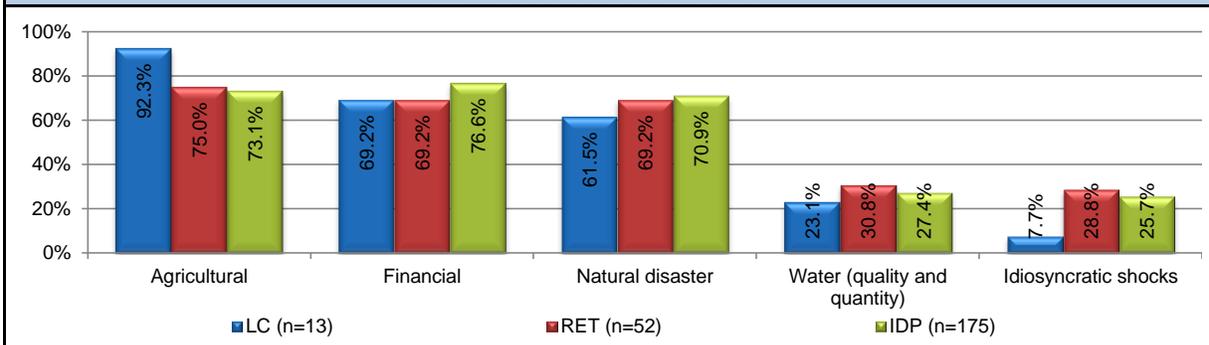

**Summary**

Over three-fifths (61.5%) of local community households have faced unusually high increases in food prices. A further, over four-fifths (84.6%) of local community households were affected by reduced agricultural water quality or quantity, two-fifths (38.5%) by severe winter conditions, one-quarter (23.1%) by unusually high level of crop pests or diseases and 7.7% of local community households were affected by late damaging frosts. Over four-fifths (84.6%) responded to these shocks by decreasing expenditures and purchased food on credit from traders. A further, three-quarters (76.9%) of local community households took loans, 30.8% reduced quantity of diet and over two-quarters (53.8%) reduced quality of diet for coping with shocks faced.

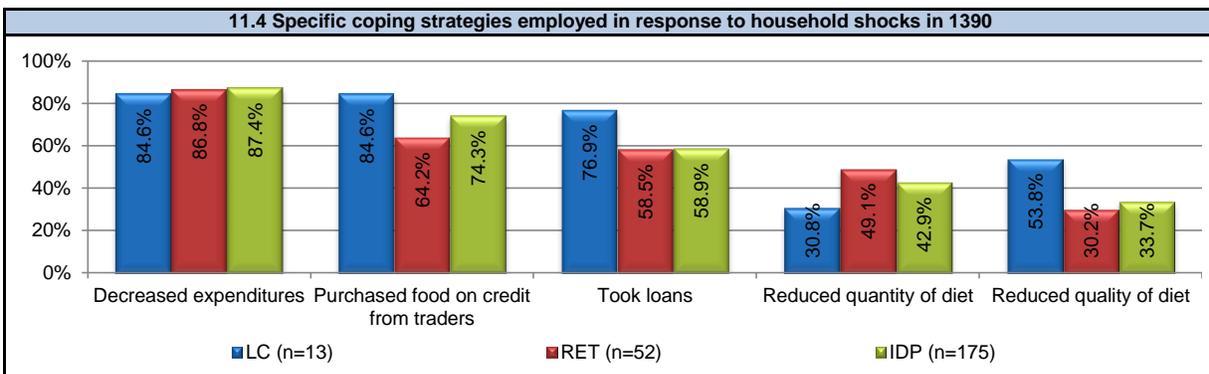

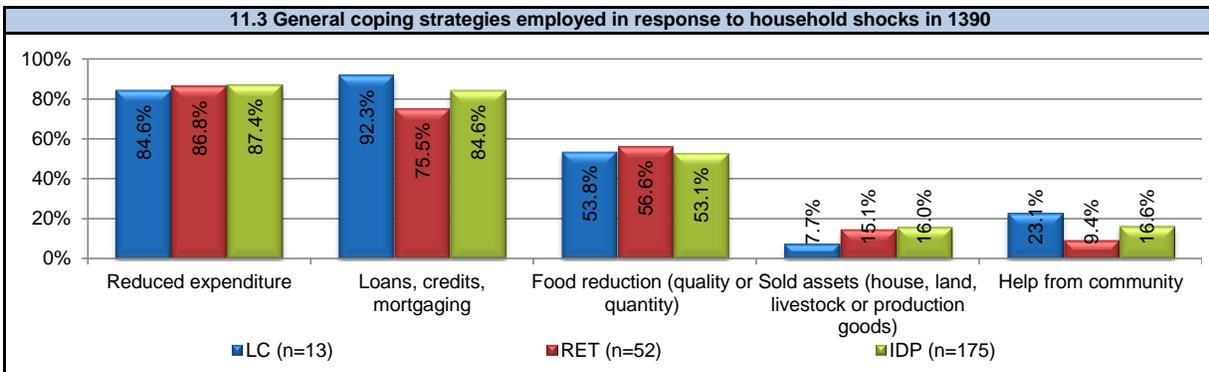

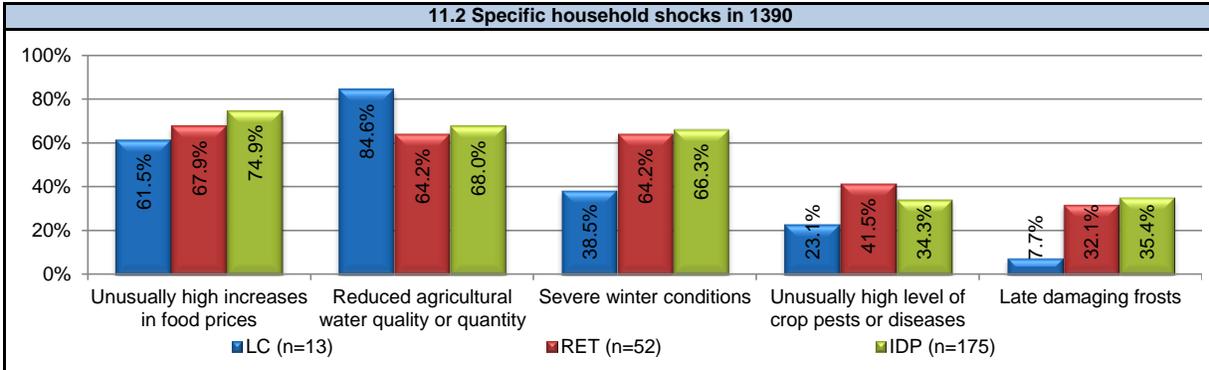

Over three-fifths (67.9%) of returnee households have faced unusually high increases in food prices. A further, over three-fifths (64.2%) of returnee households were affected by reduced agricultural water quality or quantity, over three-fifths (64.2%) by severe winter conditions, two-fifths (41.5%) by unusually high level of crop pests or diseases and one-third (32.1%) of returnee households were affected by late damaging frosts. Over four-fifths (86.8%) responded to these shocks by decreasing expenditures. A further, over three-fifths (64.2%) of returnee households purchased food on credit from traders, three-fifths (58.5%) took loans, two-quarter (49.1%) reduced quantity of diet and one-third (30.2%) reduced quality of diet for coping with shocks faced.

Three-quarters (74.9%) of IDP households have faced unusually high increases in food prices. A further, over three-fifths (68.0%) of IDP households were affected by reduced agricultural water quality or quantity, over three-fifths (66.3%) by severe winter conditions, one-third (34.3%) by unusually high level of crop pests or diseases and one-third (35.4%) of IDP households were affected by late damaging frosts. Over four-fifths (87.4%) responded to these shocks by decreasing expenditures. A further, three-quarters (74.3%) of IDP households purchased food on credit from traders, three-fifths (58.9%) took loans, over two-fifths (42.9%) reduced quantity of diet and one-third (33.7%) reduced quality of diet for coping with shocks faced.

**12. PROTECTION PROFILE**

**Summary**

Of the 241 households surveyed, 81.5% had an adult male aged 18-59 years as head of household. The head of household of one IDP households were a male aged 12-17 years. Moreover, seven IDP households have an adult female aged 18-59 years as head of household. A total of 43 households had an elderly (aged 60+) head of household of whom 2.3% were female. Two returnee households and 19 IDP households were headed by a widow or widower.

One returnee female and five IDP females aged 16-17 years was reported to be married. Among married adults, a total of three local community females, 10 returnee and 18 IDP females reported to have been under-18 years of age at the time of marriage.

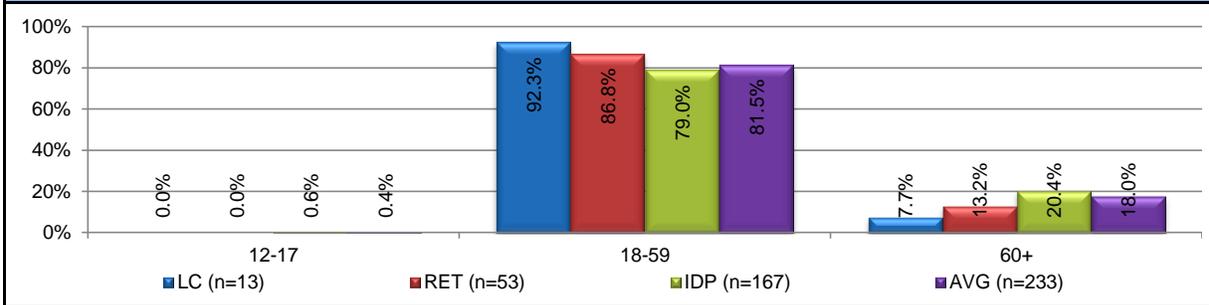

Two of local community households, three of returnee households and five of IDP households contained more than one wife.

The survey found 66 people living with a disability of which 66.7% were male. The most common disabilities were reported to be either physical (54.5%) or sensory (21.2%) in nature. 60.0% of disabled local community, 66.7% of disabled returnees and 50.0% of disabled IDPs were adults aged 18-59 years. 28.2% of disabled people in IDP households and 6.7% of disabled people in returnee households were aged 60 years and over.

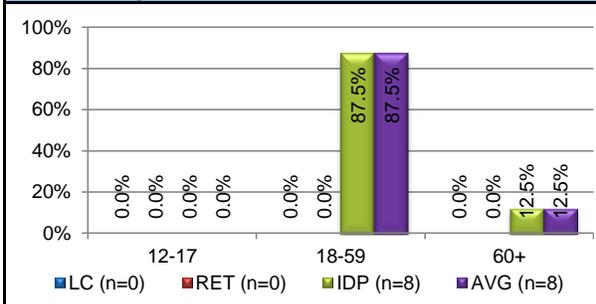

Of the 254 females aged 6-17 years, 33.5% of IDP females, 20.8% of local community females and 20.8% of returnee females are currently not attending school.

**14. SAFETY AND SECURITY**

**Summary**

The security situation in the district was described as “moderately secure” by 73.6% of returnee households, 69.2% of local community households and 62.3% of IDP households. Local community households (23.1%) were more likely to describe the district as “very secure” than IDP households (8.6%) and returnee households (7.5%). Similarly, IDP households (22.9%) were more likely to perceive the district as “not secure, not insecure” than returnee (11.3%) and local community (7.7%) counterparts. A further 7.5% of returnee households and 6.3% of IDP households consider the district to be “moderately insecure.”

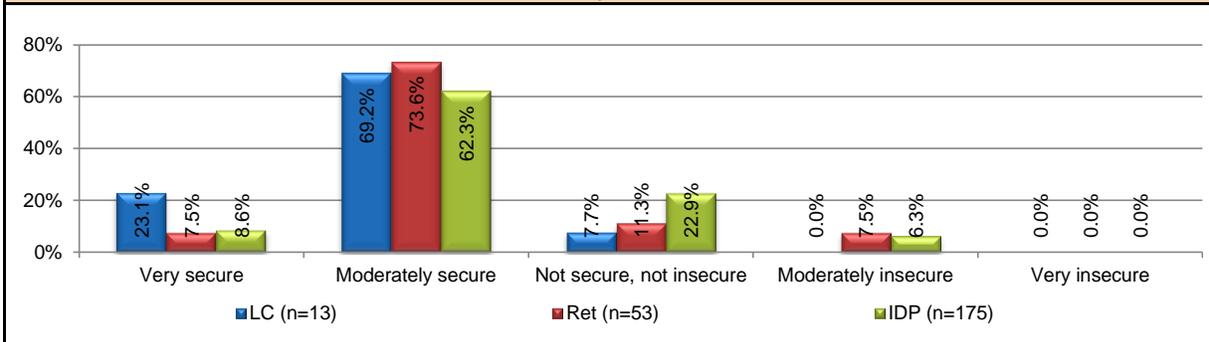

With regard to safety, 60.4% of returnee households, 51.4% of IDP households and 38.5% of local community households “sometimes” fear for their personal safety and security or that of their family. A further 20.8% of returnee households, 20.6% of IDP households and 15.4% of local community households “rarely” do so. Local community households (46.2%) were more likely to “never” fear for their safety than IDP households (19.4%) and returnee households (13.2%). Only IDP households (6.3%) and returnee households (5.7%) stated that they “mostly” fear for their safety.

On the subject of policing in the district, 77.4% of returnee households, 74.3% of IDP households and 61.5% of local community households are “moderately satisfied” with the police. Local community households (38.5%) were significantly more likely to be “very satisfied” with the police than IDP households (8.6%) and returnee households (7.5%). A further 5.7% of returnee households and 5.1% of IDP households are “moderately dissatisfied” with policing in the district.

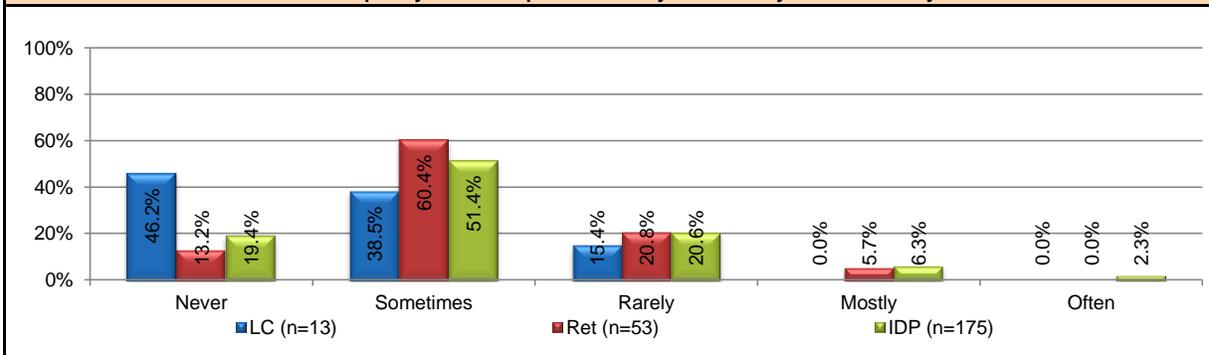

Of all households surveyed, one local community household had experienced some form of violence in the three months prior to being surveyed.

**14. Safety and Security**

**14.1 Views on security situation in the district**

**14.2 Frequency of fear for personal safety and security or that of family**
