UNHCR Hotels in islands ⁵	Units	Current places	Current population
Lesvos	10	259	260
Chios	4	117	125

¹UNHCR and Operational Partners.

²Actual capacity is calculated as the subtraction of current places minus 14.5% which is this week's estimated average natural loss for mainland and 4% for islands. Natural loss is the number of places that cannot currently be used because of damages/repairs, protection issues, family size, etc. The formula applies to all type of accommodation. Actual capacity is a close estimate of available places to be used as reference.

³Occupancy rate is calculated as the percentage of current population over actual capacity.

⁴Agia Eleni facility is included in the UNHCR Buildings section. There are also 54 available places in Agia Eleni facility.

⁵The additional 376 places provided by UNHCR in hotels in the islands have been set up as an interim winterization solution.

The actual available capacity is estimated to be at 595. This derives from 149 places on islands and 446 places on mainland. It can be used for immediate planning.
