

# **Syrian American Medical Society**

## **28 June 2018**

SAMS Foundation is a nonpolitical, nonprofit, professional and medical relief organization that was found in **1998** as a professional society, working to provide physicians with networking, educational, cultural, and professional services.

When the conflict of Syria began in **2011**, SAMS expanded its capacity significantly to meet the growing needs and challenges of the medical crisis.

SAMS has since supported healthcare throughout Syria, sponsoring the field hospitals and ambulances, training and paying the salaries of Syrian medical personnel who are risking their lives to save others.

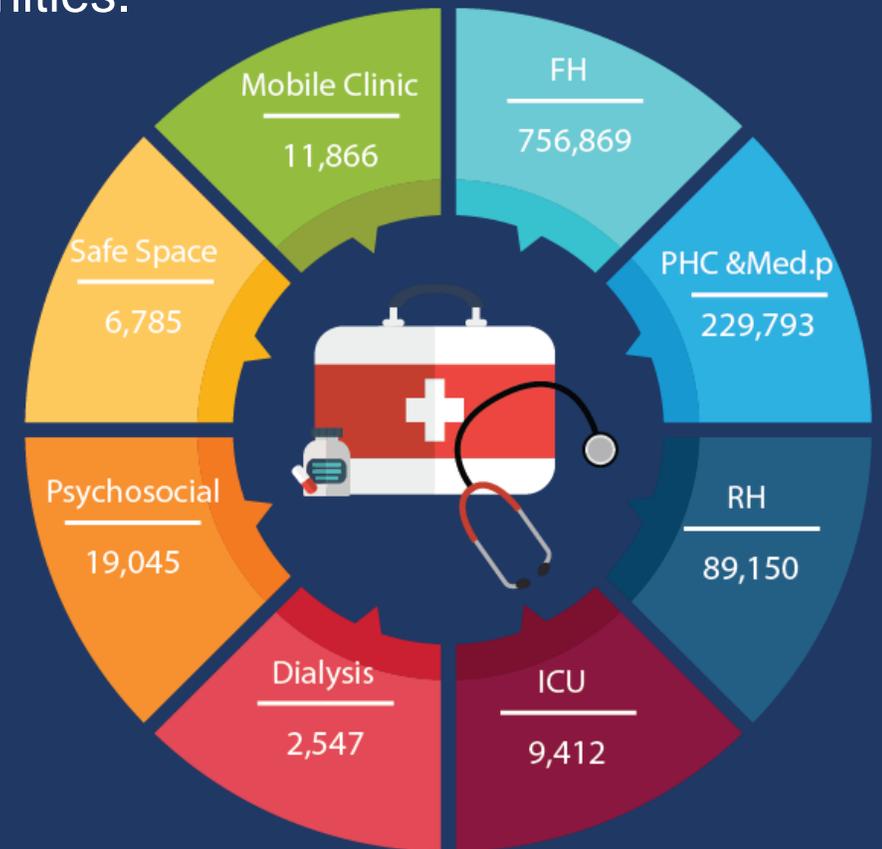

SAMS provides refugees with medical and dental care, winterization support, and psychosocial programs.

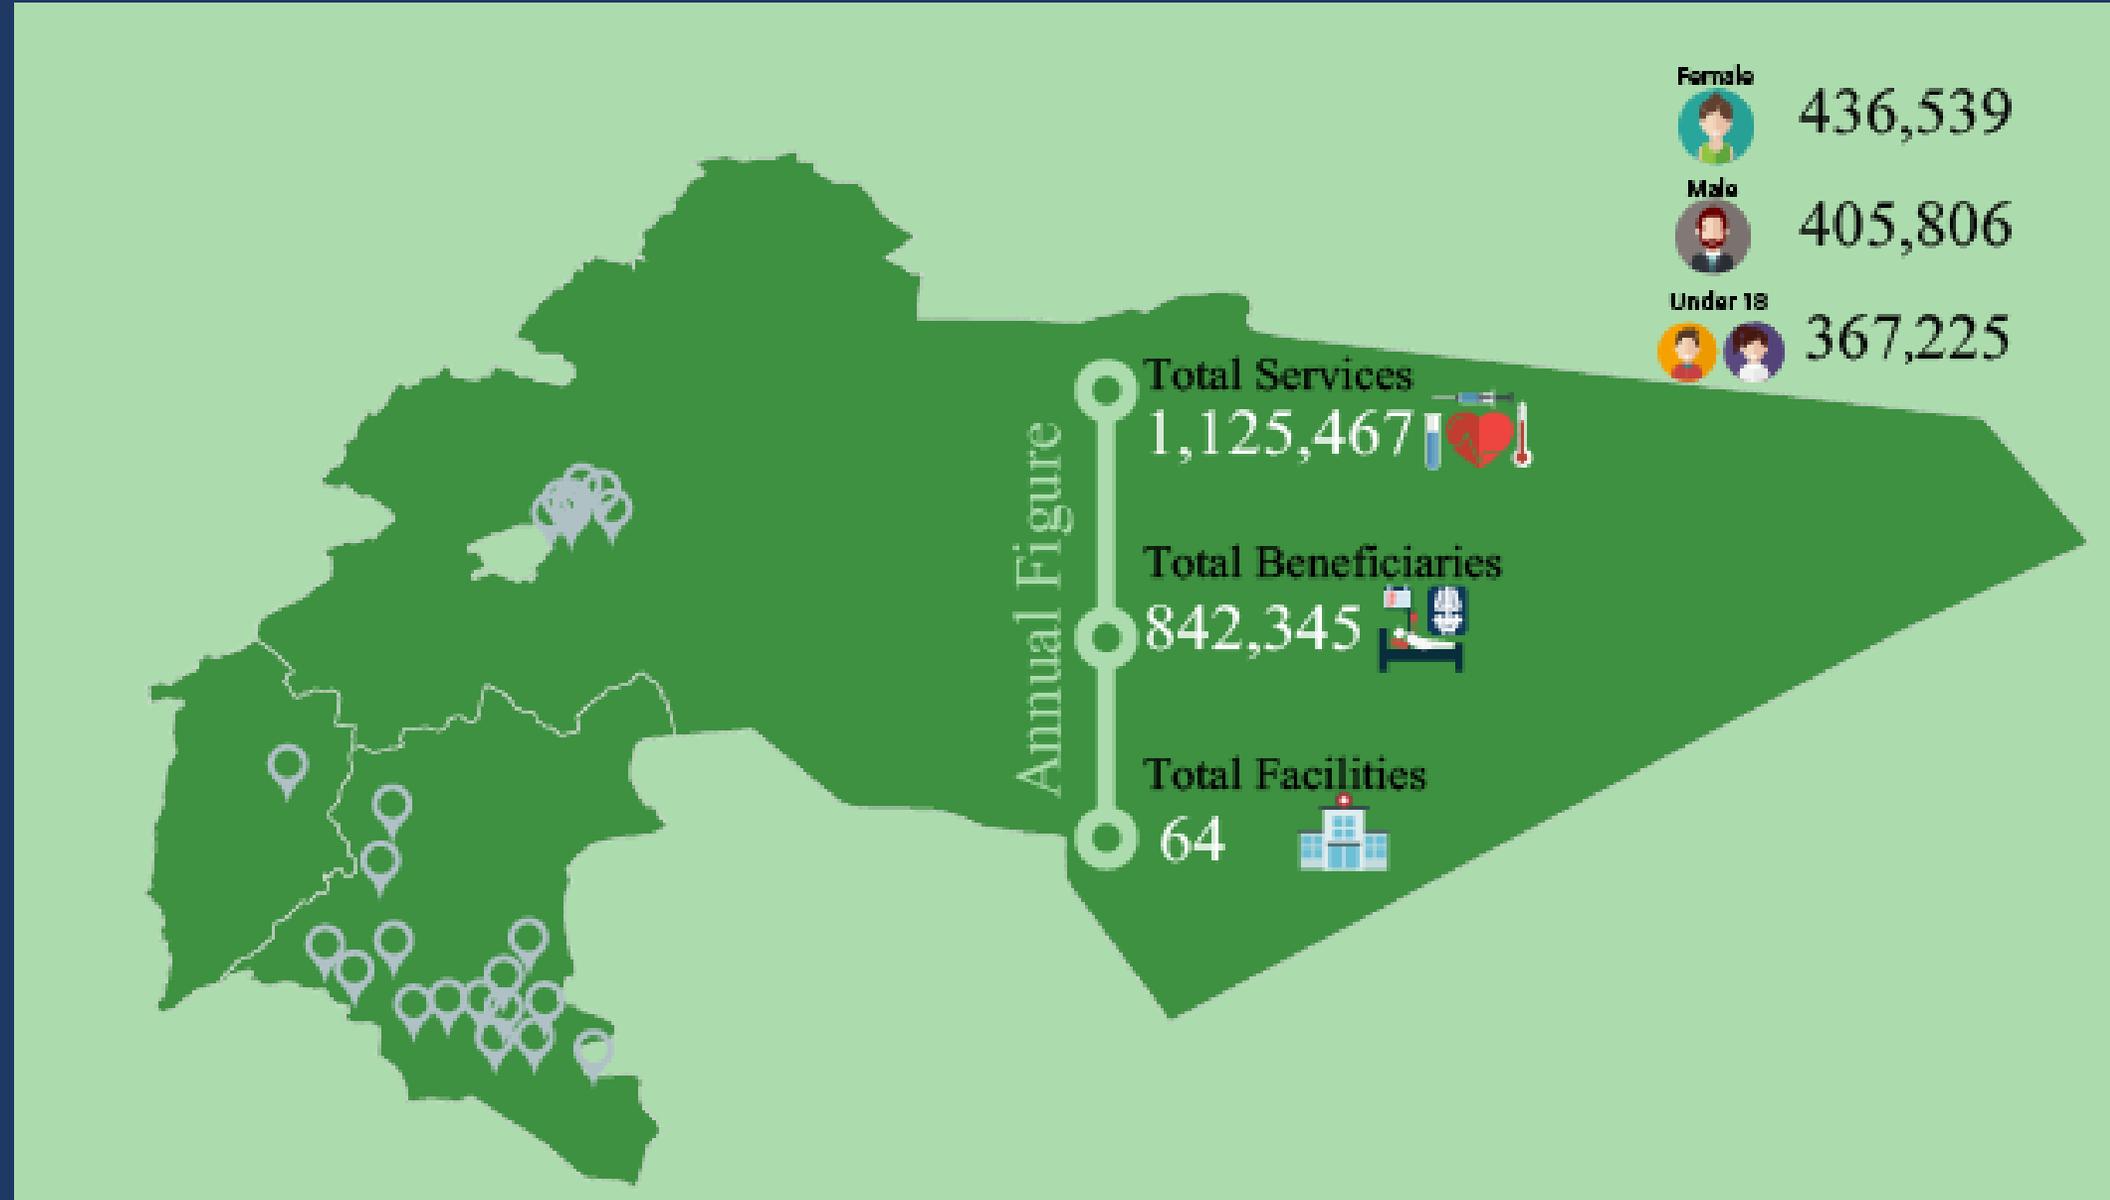

**In 2017, SAMS provided over 3.5 million medical services to vulnerable individuals in seven countries.**

Through 2017, SAMS Jordan office supports and operates **64** medical facilities in southern Syria from primary health care to specialized care and these facilities Served **842,345** beneficiaries in three governorates inside southern Syria Daraa ,Qunetira and Eastern Ghouta. **51%** Females; **49 %** Males IDPs and host communities.

Those beneficiaries; had around **1,125,467** medical services differed between primary health care and specialties treatment. In addition to supported services like laboratory and radiology.

SAMS operates the **largest** medical facility in Za'atari Camp in Jordan, and SAMS's members lead frequent medical missions to volunteer their skills for refugees

**Our Mission** is to save lives and work to ensure a healthier future for all through medical relief and healthcare development on behalf of Syrian American healthcare professionals.

**Our Vision** is to be a leading humanitarian organization, harnessing the talents of Syrian-American healthcare professionals, and channeling them toward medical relief for the people of Syria and the United States.
