Multi-Sector Needs Assessment: Hoima District Uganda, August, 2018

Background & Methodology

Due to its proximity to three major humanitarian emergencies in South Sudan, Burundi, and the Democratic Republic of Congo (DRC), its progressive refugee hosting and settlement policies, and the ease of border crossings, Uganda has received a large number of refugees over the past 3 years.

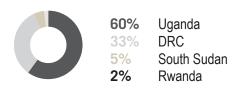

With over 1 million refugees in Uganda¹, humanitarian needs across the country are significant with little capacity for actors to clearly map the landscape of needs across refugee and host communities alike. UNHCR, with support from REACH, conducted a Multi-Sector Needs Assessment with the aim to address this information gap by providing evidence-based analysis to inform the Refugee Response Plan (RRP) for 2019-2020.

A total of 6,809 household (HH) level surveys were conducted across all 30 refugee settlements and 11 refugee hosting districts. Households were randomly sampled with a confidence level of 95% and 10% margin of error and generalisable at the settlement level for refugees and at the district level for the host communities.

326 surveys were conducted in Hoima District between 18 May

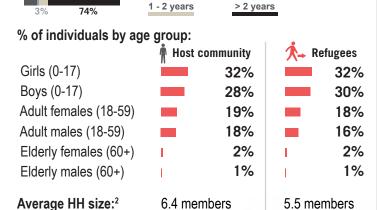

and 8 June 2018.

Demographics % of assessed HHs by area of origin:

% of refugee HHs that have lived in the settlement for: <6 months

7 - 11 months

Gender distribution of the head of the HHs:

Top 3 sectors with most reported HH needs:³

↑ Host community		Refugees	
Education	49%	Food	81%
WASH	45%	Health and nutrition	53%
Health and nutrition	40%	Shelter	37%

Note: For questions asked only to a subset of households, a lower confidence level and a wider margin of error may apply.

Protection

% of HHs with at least one vulnerable member:

Unaccompanied or separated children	∭ 27%	% → 36%
Individuals with chronic illnesses	28%	48%
Individuals with disabilities	19%	30%
Pregnant and/or lactating women	49%	43%

98% of the refugee HHs reported being registered in a settlement in the district.4

% of HHs reporting at least one member with psychological distress:

68% of the host community HHs and 52% of the refugee HHs reported that they had not received/were unable to receive psychological care.

% of HHs that reported being reached by the following protection awareness campaigns:

.W.	X →
64%	36%
62%	26%
49%	22%
	62%

36% of the host community HHs and 30% of the refugee HHs with at least one woman or girl of reproductive age reported that one or more women in the HH could not access sanitary pads.

- 1) OPM RIMS statistics, June 2018, Uganda Comprehensive Refugee Response Portal.
- 2) The MSNA found the average size of refugee and host community HHs to be larger than previous assessments conducted in Uganda. HH was defined as a group of members who regularly share resources, such as water, food, and living space.
- 3) Respondents could select multiple options.
- 4) Refugees are registered in settlements by Uganda's Office of the Prime Minister (OPM).

Multi-Sector Needs Assessment: Hoima District

Livelihoods & Environment

Top 3 reported income source over the 30 days prior to data collection:¹

Host community		Refugees	
Agriculture	66%	Agriculture	68%
Fishing	14%	Casual labour	16%
Small business	13%	Livestock/None	10%

% of HHs that had access to agricultural land in the most recent harvest season:

Top 3 reported ways HHs accessed land for agricultural purposes, for HHs that reported access to land:1

Host community		Refugees	
Owns the land	64%	Free through OPM	90%
Rents the land	28%	Rents the land	3%
Free access	7%	Free access	3%

72% of refugee HHs and **34%** of host community HHs that had access to land reported that it did not provide sufficient food for the entire HH in the most recent harvest season.²

2% of refugee HHs and 3% of host community HHs that had access to agricultural land did not cultivate or plant crops in the most recent harvest season.

Top 3 reported reasons why HHs did not cultivate or plant crops in the most recent harvest season, of HHs that reported no cultivation:¹

Host community		Refugees	
Not a regular activity	40%	Land is inaccessible	50%
Lack of seeds	20%	Other	50%
Land is inaccessible	20%		%

Top 3 reported livelihood coping strategies used by HHs over the 30 days prior to data collection:¹

Host community		Refugees	
None	36%	Humanitarian aid	42%
Spent savings	29%	Sold assets	15%
Borrowed money	20%	Spent savings	14%

% of HHs with access to local markets within walking distance:

37% of refugee HHs and **42%** of host community HHs reported that they faced challenges accessing markets in the 30 days prior to data collection.

% of HHs that reporting the following primary fuel sources:

	Host community	🛵 Refugees
Firewood	93%	90%
Charcoal	7%	10%

26% of refugee HHs and **22%** of host community HHs reported having an improved cook stove.²

Education

33% of refugee HHs with school-aged children and **24%** of host community HHs with school-aged children have at least one child not enrolled in school.

% of HHs with at least one school-aged child not enrolled in school, by age and gender:

Host community			Refu	gees
Ť	•	Age	Ť	^
49%	48%	3 - 5	42%	36%
5%	11%	6 - 12	6%	12%
25%	38%	13 - 18	24%	26%

% of HHs with at least one school aged children enrolled in school by school type:

school, by school type:	Host community		Refugees	
ECD		14%		8%
Primary		52%		67%
Secondary		11%	•	5%
Other ³	1	1%		0%
Not enrolled		24%		33%

Top 3 reported barriers to education for HHs with at least one school-aged child not enrolled in school:1

Host community		Refugees	
The child is too young	48%	The child is too young	42%
High costs	34%	High costs	23%
Early marriage	10%	Children must work in the HH	12%

Of the HHs that reported cost as a barrier to accessing education, 89% of refugee households mentioned **books** while 100% of the host community HHs reported **books** as the most commonly reported cost barrier.

- 1) Respondents could select multiple options.
- 2) Improved cooking stove or energy saving stoves are designed to consume less firewood and produce less fumes.
- 3) Other types of education include accelerated learning programme, non-formal skills training, and vocational training

Multi-Sector Needs Assessment: Hoima District

Health & Nutrition

Top 3 reported health issue among HH members during the 2 weeks prior to data collection:¹

Host community		Refugees	
Malaria	28%	Malaria	58%
Diarrhoea	24%	Diarrhoea	32%
Skin disease	18%	Rapid weight loss	22%

Of the HHs that reported having a member with health issues in the past year and sought treatment, **54%** of refugee HHs and **40%** of host community reported facing challenges when they sought treatment.

Top 3 reported challenges in accessing health care:2

Ì	Host community		Refugees		
	High cost of treatment	35%	No medicine available	54%	
	No medicine available	32%	High cost of medicine	20%	
	High cost of medicine	29%	Distance	17%	

13% of the refugee HHs reported language barriers as a challenge when accessing health care.

% of HHs with pregnant and/or lactating women that received the following services:

	Ň	/
Counselling on infant and young child feeding	62%	78%
Iron and folic acid supplements or micro-	58%	69%
nutrient supplements		
At least 2 doses of fansidar ³	58%	67%

Of the HHs with children, % reporting:4

	Host community	Refugees
Polio vaccination	" 94%	82%
Measles vaccination	59%	44%

% of HHs reporting owning mosquito nets:

Average number of HH members sleeping under nets:

- 1) Respondents could select multiple options.
- 2) The question was asked to HHs that had sought health care treatment in the past year.
- 3) Fansidar is used to prevent and treat malaria. It can be used for pregnant women with less risks to the mother and fetus.
- 4) Polio vaccination is given to children between 0-5 years old. Measles vaccination is given to children aged 15 or younger.
- 5) Basic HH needs include having enough water for drinking, cooking, bathing, etc.

=

Water, Sanitation & Hygiene

Top 3 reported sources of drinking water:

Host community		Refugees	
Surface water	38%	Borehole	56%
Borehole	18%	Protected rainw	ater tank18%
Unprotected well	13%	Public tap	8%

% of HHs, by litres of water/person/day:

Average litres of water/person/day is 18 for refugee HHs and 17 for the host community HHs.

63% of refugee HHs and **80%** of host community HHs reported not having enough water to cover the basic HH needs during the 7 days prior to data collection.⁵

Top 3 reported strategies for coping with insufficient quantity of water during the 7 days prior to data collection:⁶

Host community		Refugees	
Use less for bathing	49%	Use less for bathing	59%
Fetch from further point	32%	Fetch from further point	30%
None	12%	None	15%

% of HHs reported challenges to collecting water:

	Host community		Refugees	
Distance		26%		10%
Queuing		14%		42%
Distance and queuing		10%		21%
None		50%		26%

% of HHs with access to a functioning HH latrine:

50% of the refugee HHs and **14%** of the host community HH did not have soap during data collection.

Top 3 most commonly reported reasons for HHs not to have soap in the HH:¹

↑ Host community		Refugees	
Soap is too expensive	52%	Soap is too expensive	67%
Soap isn't necessary	38%	Waiting for distribution	22%
Other	7%	Soap isn't necessary	5%

 $\,$ 6)The question was asked to HHs that reported not having enough water during the 7 days prior to data collection

Multi-Sector Needs Assessment: Hoima District

Food Assistance

Top 3 reported primary source of food during the 7 days prior to data collection:

Host community		↑ → Refugees	
Own production	59%	Bought with cash	42%
Bought with cash	38%	Own production	26%
Local food charity	1%	Food distribution	22%

The refugee HHs that had been living in the settlement for less than one year relied more on humanitarian aid (50%) than refugee HHs that had lived there for one year or more (17%).

% of HHs with the following Food Consumption Scores (FCS):²

HH average food consumption score:

Host community 6	3 🏌	→ Refugees 47
------------------	-----	---------------

% of HHs FCS by time spent in the settlement:1

	<6 months	7 - 11 months	1 - 2 years	>2 years
Acceptable	89%	100%	82%	85%
Borderline	11%	0%	9%	13%
Poor	0%	0%	9%	2%

% of HHs who reported having access to sufficient food for all members over the 7 days prior to data collection:

% of HHs reported using food coping strategies during the 7 days prior to the data collection:

	Host community		Refugees	
Reduce # meals / day		16%		27%
Limit meal size		25%		35%
Buy cheaper food		10%		28%
Debt/Borrowing	T.	3%		6%
Skip days of eating	1	2%		7%
Only children eat	T.	2%		6%
Exchange food		0%		7%
None		52%		10%

Shelter & NFIs

% of HHs with the following shelter types:3

% of HHs that reported owning their shelter:

% of HHs reporting their shelters are vulnerable to leakage from rain:

15% of the host community HHs and 19% of the refugee HHs reported that their shelter experienced flooding in the year prior to data collection.

Top 3 most commonly reported NFI priorities:

Host community		Refugees		
" Bedding	67%	Bedding	81%	
Water storage	47%	Mosquito nets	49%	
Kitchen tools	36%	Kitchen tools	49%	

- 1) Disaggregation by time spent in settlement only applies to refugee households, as host community households do not live in settlements.
- 2) The FCS is used as proxy for HH food security and is a composite score based on 1) Dietary diversity 2) Food frequency and 3) Relative nutritional importance of the various food groups consumed by HHs. The FCS is recorded from a 7-day recall and is based on 9 weighted food groups. The FCS is used to classify households into three groups: poor, borderline or acceptable food consumption. In the Ugandan context the thresholds used are as follows: ≥ 31 Acceptable; 28 30 Borderline; ≤ 27 Poor.
- 3) Permanent shelters includes mudbrick, tukul and concrete brick. Temporary shelters includes emergency tent and makeshift shelter.
