■ During the month ■ Daily average*

*Based on days on which patients attended the clinic

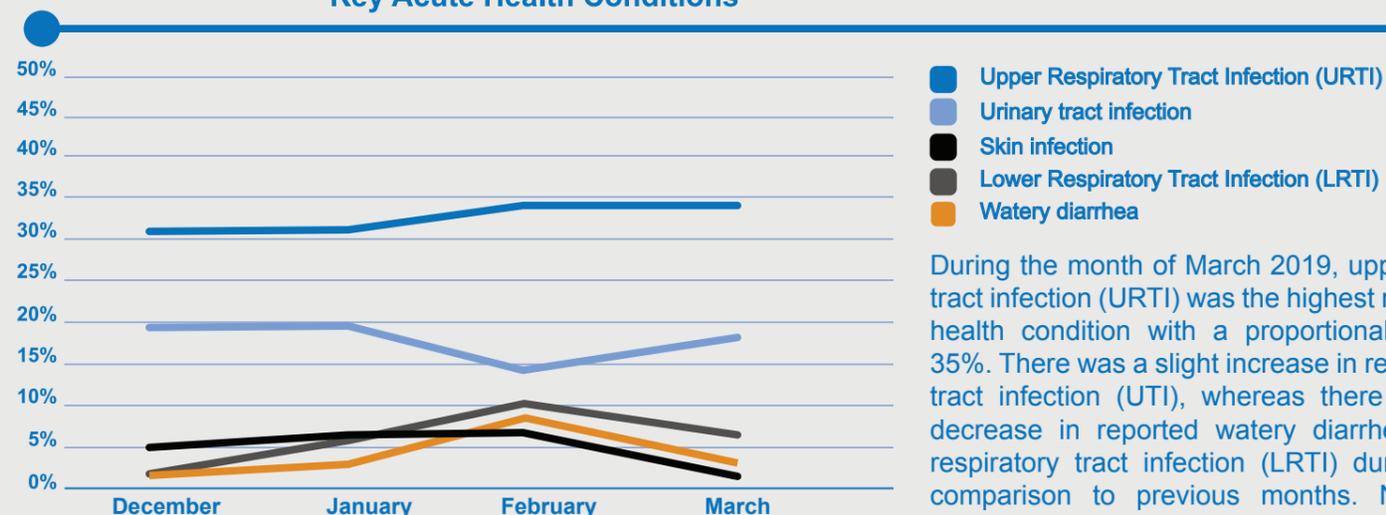

■ Below 5 ■ 5 to 18 ■ 18 to 59 ■ Above 60

■ Male ■ Female

2 Diseases & trends

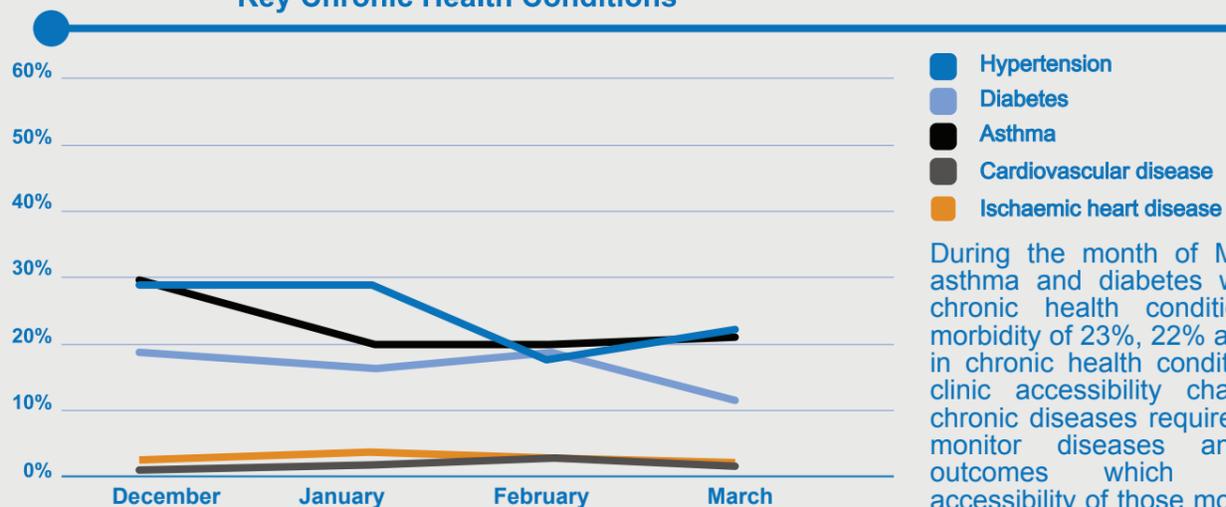

Key Acute Health Conditions

- Upper Respiratory Tract Infection (URTI)
- Urinary tract infection
- Skin infection
- Lower Respiratory Tract Infection (LRTI)
- Watery diarrhea

During the month of March 2019, upper respiratory tract infection (URTI) was the highest reported acute health condition with a proportional morbidity of 35%. There was a slight increase in reported urinary tract infection (UTI), whereas there was a slight decrease in reported watery diarrhea and lower respiratory tract infection (LRTI) during March in comparison to previous months. No significant changes in the trends of other acute health conditions.

Key Chronic Health Conditions

- Hypertension
- Diabetes
- Asthma
- Cardiovascular disease
- Ischaemic heart disease

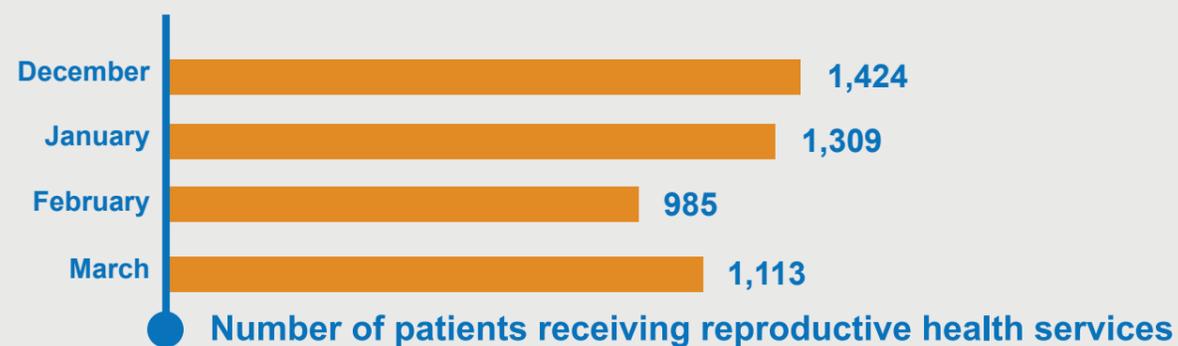

During the month of March 2019, hypertension, asthma and diabetes were the highest reported chronic health conditions with a proportional morbidity of 23%, 22% and 11% respectively. Trend in chronic health conditions varies as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate therapeutic outcomes which necessitates enhanced accessibility of those morbid diseases to the health care facility.
