# Refugee Access to Livelihoods and Housing, Land, and Property

## May 2019 UGANDA

## CONTEXT

Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi.<sup>1</sup> Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods. In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 2019 to collect baseline data on refugees' access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

### **METHODOLOGY**

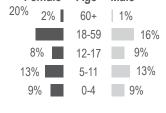

A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as select divisions of Kampala (Makindye, Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3,165 households were interviewed for this assessments. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of households living in the 3 selected neighbourhoods of Kampala District. A total of 354 refugee households were interviewed in Kampala District.

## POPULATION PROFILE OF REFUGEES IN UGANDA

## **BRIEF OVERVIEW OF KAMPALA DISTRICT**

Kampala, capital of and largest city in Uganda, is home to approximately 1.5 million inhabitants and hosts around 61,399 refugees, composing 5% of Kampala's population. Refugees are primarily from DRC, South Sudan, Somalia, Burundi and Rwanda. Kampala district is divided into 5 divisions and the assessment focused on Kawempe, Central Division and Makindye.

NRC

<sup>1</sup> Figures based on United Nations High Commissioner for Refugees (UNHCR) and Office of the Prime Minister (OPM) population figures updated as of April 2019. <sup>2</sup>This question was only asked to the 15% of respondents facing HLP challenges. The level of confidence may thus be lower than 95%. <sup>3</sup>Respondents could answer more than one option for this question.
