Refugee Access to Livelihoods and Housing, Land, and Property

May 2019 UGANDA

CONTEXT

Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi.¹ Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods. In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 to collect baseline data on refugees' access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

METHODOLOGY

A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as select divisions of Kampala (Makindye, Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3,165 households were interviewed for this assessment. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of refugee households living in Oliji refugee settlement. A total of 88 refugee households were interviewed in Oliji.

POPULATION PROFILE OF REFUGEES IN UGANDA

Female-headed households (HHs): 67%

Average household size:

Displacement demographic

Top countries of origin:1

- 1 South Sudan (65%)
 - 2 DRC (27%)
 - 3 Burundi (3%)
 - 4 Somalia (2%)

BRIEF OVERVIEW OF OLIJI IN ADJUMANI DISTRICT

Oliji settlement was established on 1 January 1991 in Adjumani district hosting primarily South Sudanese refugees fleeing the Second Sudanese War that broke out in the 1980s as well as the newer wave of South Sudanese refugees fleeing civil war in South Sudan since 2013. Oliji hosts over 1,500 refugees.

REACH

HOUSING

UGANDA **DISTRICT: ADJUMANI**

SETTLEMENT: OLIJI

TENURE ARRANGEMENTS

% of HHs by shelter tenure:

or legal occupancy of shelter.

83% Owned by the head of the household 9% Owned by the spouse

8% Owned jointly between household members

SHELTER CHALLENGES

83% of HHs reported shelter damage. Of those, the most commonly reported parts of the shelter damaged are:³

Damage to roof	92%
Damage to windows and/or doors	15%
Damage to wall material	10%

34% of HHs reported not being able to conduct repairs. Of those, the most commonly reported reasons include:³

Nature	82%
Purchased	69%
Friend	15%

0% of HHs have documentation proving ownership

LAND

ACCESS TO LAND

% of HH reporting:³

Accessing land where shelter is located	99%
Accessing land in a separate plot	23%

Method of accessing land around shelter plot:

8% Accessing someone else's land for free 1% Use of land where access has not been granted

23% of HHs reported accessing land outside their shelter. Of those, the most commonly reported methods of accessing that land are:3

Accessing someone else's land for free	45%
Renting to access someone else's land	45%
Use of land where access has not been granted	10%
OPM/UNHCR allocation	5%

USE OF LAND FOR CULTIVATION

97% of HHs reported using their shelter plot for cultivation. Of those, the following reported on sufficiency of the land to provide food for the HH in the most recent harvest.

FORMAL AGREEMENTS

Of the 8% that access land around shelter plot through renting, free access, or ownership, 0% of HHs that have a formal agreement to access the land

Informing more effective humanitarian action

Of the 90% of land accessed outside of shelter plot through renting, free access, or ownership, 17% are accessed through formal agreement

REA

⁴ The Government of Uganda allocates land for residential and agricultural purposes, to refugees, irrespective of ethnicity and origin. This is done via OPM with the support of UNHCR.
