

# Child Protection Working Group Real time monitoring March 2020

A total of 36 Child Protection focal points (out of 49) from the 8 governorates representing 17 I/NGOs were sent a survey to provide information on the situation of children in their area. Data collection was done in the first week of March 2020, and captures the situation of children in February 2020. Key findings are presented below.

**89% of child protection partners reported gaps in services over the past 30 days - with the major gap identified being within the Health Sector and followed by Child Protection and Education**

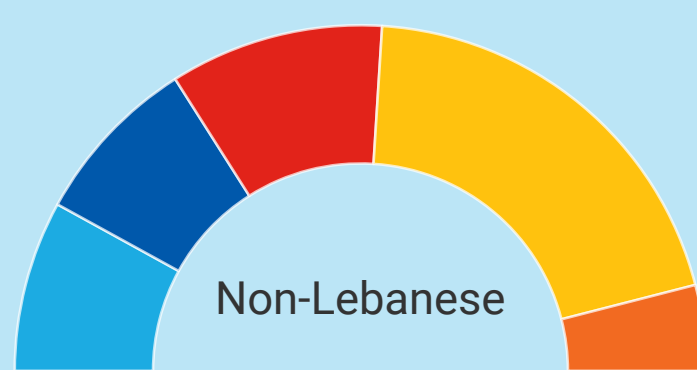

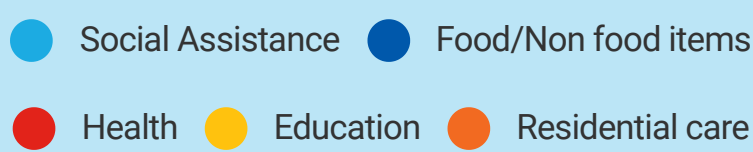

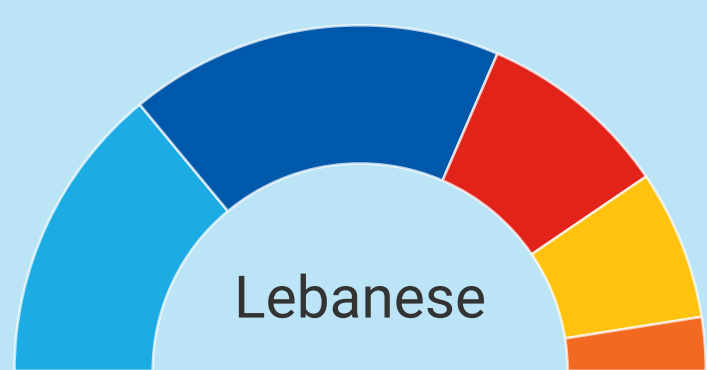

**Only 24% Reported gaps in access to services in the last 30 days**

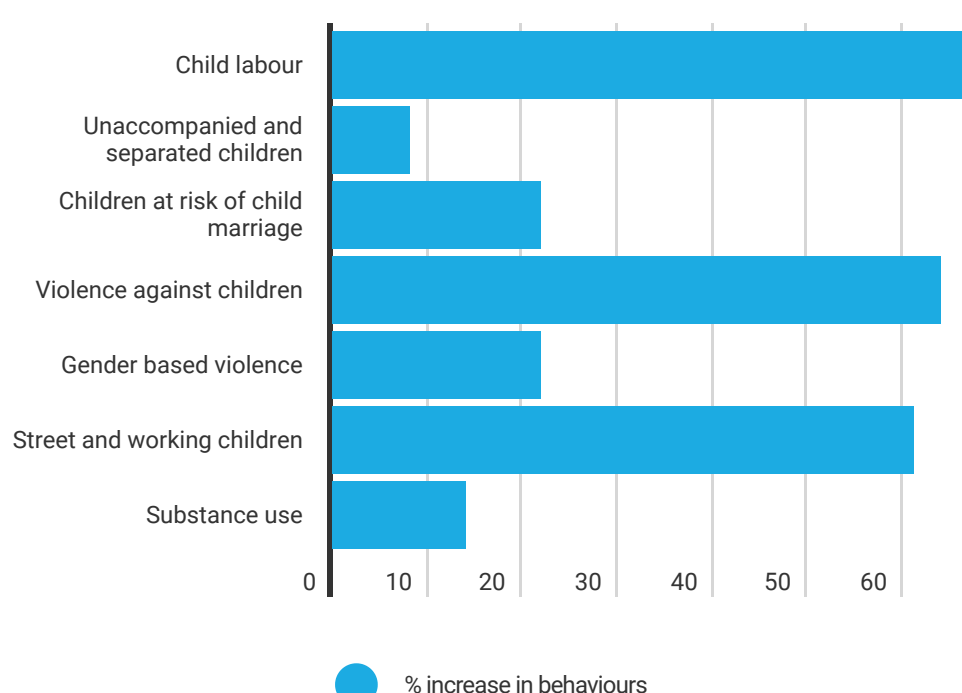

## Requests for assistance

At level of new requests for assistance received by partners during February 2020, a total of 6,000 requests were recorded and disaggregated by type of assistance and by nationality. While the majority of requests came for Non-Lebanese (71%, 4,258 requests), however a significant number of requests came for Lebanese (29%, 1,749 requests)

## Trends and Behaviours

At level of negative behaviors affecting children, partners have identified the presented risks and vulnerabilities:

## Conclusion

Worrying trends show an increase in requests for social services and increase in negative behaviours affecting children. This survey will be repeated monthly to track the trends and pressing child protection needs facing children in Lebanon.
