¹Actual capacity is calculated as the addition of occupied places plus available places.

The number of places that cannot currently be used because of damages/repairs, protection issues, family size, end of contract, etc. is the natural loss.

²Occupancy rate is calculated as the percentage of current population over actual capacity.

The available capacity is 666 places (mainland: 489 / islands: 177).

Out of them, 316 places are reserved (mainland: 306 / islands: 10).

308 individuals are to be transferred to ESTIA Accommodation Scheme (mainland: 296 / islands: 12), including internal transfers.

The remaining available places are 350 (mainland: 183 / islands: 167).

*This is the final report for ESTIA Accommodation Programme with the full capacity managed by UNHCR. Future reports will reflect the joint Ministry of Migration and Asylum (MMA)/UNHCR management and apportionment of capacity.
