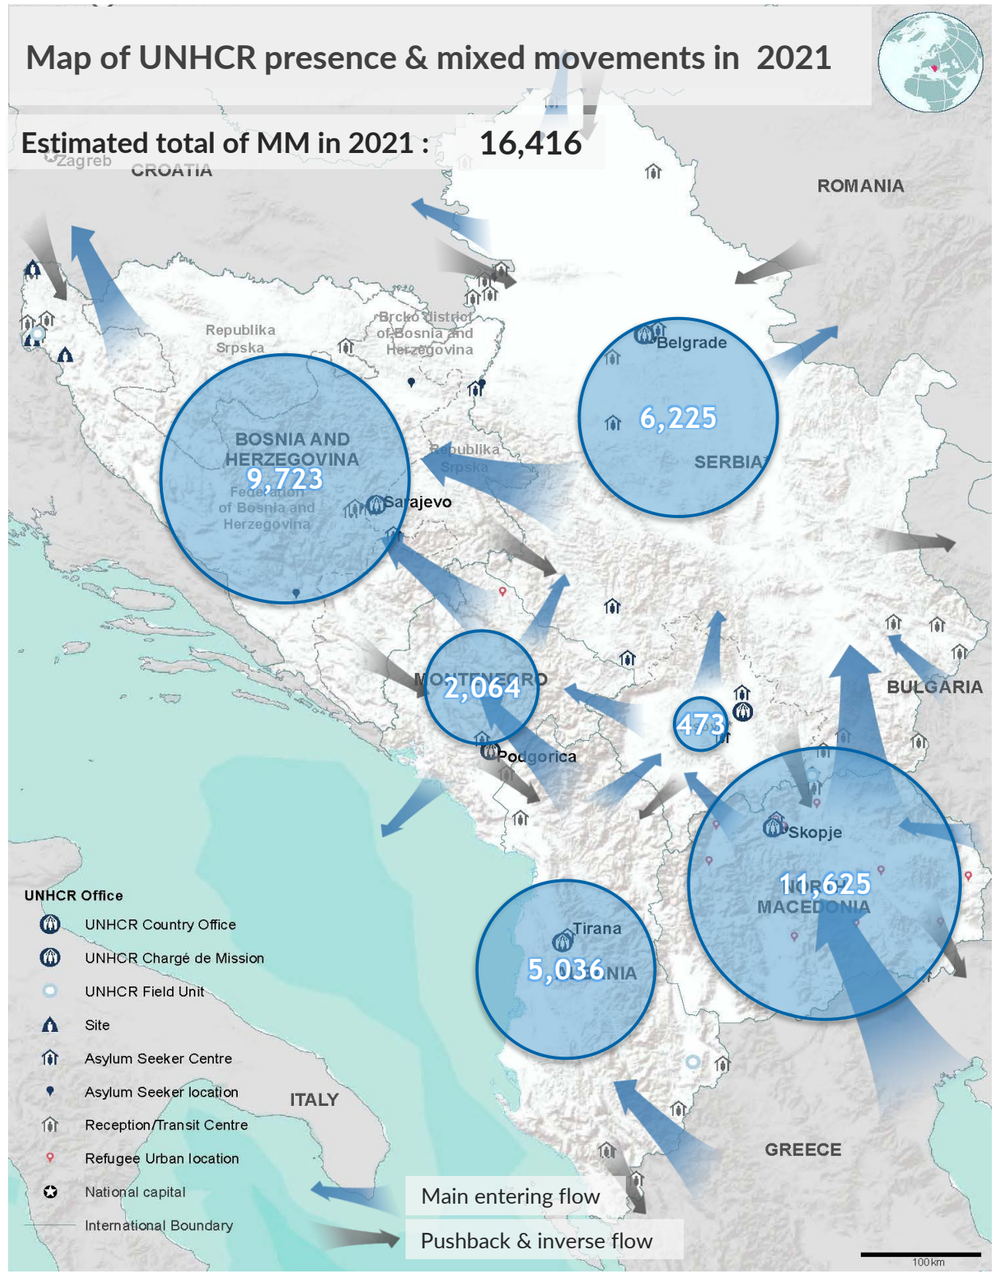
Map of UNHCR presence & mixed movements in 2021



This dashboard contains data and information collected by the UNHCR in the South Eastern Europe (S.E.E.) based on several databases for the moment reporting on Western Balkan countries. Data sources also include Public Information focal points at UNHCR country offices in the region. Relevant information was also collected through Border Protection Monitoring (**BPM**), as well as from Asylum monthly statistics, as provided by official sources in each country. The information presented in the dashboard can change, in line with the latest updates made available by the authorities in charge, as the official figures are released at the end of each month. Mixed Movement (**MM**) are considered as "new arrivals". Arrivals in the region are not registered by UNHCR. Partners gathering information for the BPM are receiving information on the MM through direct contact/communication. UNHCR aims to collect, at regional level, accurate information, from agreed and official sources. Asylum procedures in the region differ. In order to compare them, if a country is not applying an intention procedure before, the applications are considered as intentions as well.

**** Security Council Resolution 1244 (1999) / ** for North Macedonia, data on arrivals are not official government data, they are UNHCR estimation based on different sources and do not imply official endorsement by UNHCR.***
