Topic	Discussion points	Action points
National cluster co-coordinator	An introduction for Miss Eleanor Alice Goldney (DRC), who just joined the National Yemen CCCM team as a cluster co-coordinator. And she will arrive to Yemen soon.	
Situation updates	<p>ADEN HUB</p> <ul style="list-style-type: none"> • The CCCM cluster received a paper from the Ex.U in Lahj, mentioning that for those IDPs who have travelled to spend Eid in their origins they are not supposed to be called IDPs if they come back and not supposed to have any assistance. CCCM had a meeting with the protection cluster and raised this issue to the ExU main office and waiting position or any action. • Due to the IDPs increase in the west coast there are food and wash gaps occurred which still needed to be covered. • For IDPs who spend their Eid vacation on their origin, we understand that it is not the ExU Main office position, and that was applied in Lahj only because of some escalations from the communities surrounding these sites. It seems also there is no military or security factors derived from ExU Lahj to do so. Host Community considers those IDPs as migrant workers not IDPs, and they are pushing ExU to have an action against. However, this has been escalated to ExU Main office and awaiting their position from that, additionally NRC/DRC partners got engaged with ExU to resolve the issue, where it was agreed to continue the provision of assistance to those IDPs with monitoring them for the coming 6 months/ Eid Al Adha Holidays. <p>Sa'adah Hub:</p>	

CCCM Cluster meeting 18-05-2022 – minutes

- conducted verification exercise for 21 IDPs sites "unmanaged by CCCM partner" in Sa'ada Hub, and the tool been entered info kobo .
- ongoing 3 maintenance activities in Al-Jawf - Barat Al-Anan district.
- maintenance activities
- identified the maintenance needs at managed IDPs sites and shared with partners to response or advocate .
- NFDHR CCCM project in Sa'ada ended on 30 April 2022, which add extra gap to the uncovered IDPs sites by CCCM partners

Hodeida hub:

- Around 123 IDP families have been affected by heavy rains in four IDP sites in Aslam district. As a result, CCCM partners, RADF and YGUSSWP, have already conducted flood needs assessments identifying the actual needs related to shelter/NFIs, WASH (water tanks and latrines), and food ones, and I have shared them with relevant clusters and followed up with them to cover.
- The WASH gaps are considered the biggest issues for us as around 10,000 families do not have latrines, and although we have been coordinating with the WASH cluster and its partners, no one has been able to cover them so far. However, UNICEF confirms they can cover around 54,0000 families with BHKs. Thus, we will follow up with them to ensure they cover the identified gaps in 2020 and 2021.
- CCCM partners, RADF and JAAHD, have assessed the high-risk IDP sites based on REACH analysis and are planning to carry out flood mitigation activities, including flood awareness sessions.
- YGUSSWP has got the YHF and relevant clusters' approval to carry out 40 site maintenance/community projects within 35 IDP sites under their management in Hajjah Governorate.

Marib Hub

- Due to the temperature, there are a lot of fire incidents happened in different IDPs sites, 46 and only 34 in Marib due to an electrical issues. However, CCCM, CCCM/ABAC and partners continue responding and providing the needed assistants in timely manner. Also, there was a

CCCM Cluster meeting 18-05-2022 – minutes

	<p>dissection with the clusters and will have a working group with ICGW IF POSSIBLE</p> <p>Sana’a Hub;</p> <ul style="list-style-type: none"> • CCCM SNCC mentioned the impact of the last flood and the response delivered for some IDP sites in Sana’a hub, where IDPs’ shelters and some belongings have been affected, CCCM IPs visited flood -affected IDP sites and reported and referred all damages to respective partners for their kin responses. • CCCM IPs started conducting awareness campaigns and sharing more information about CCCM flood mitigation measures. As well as encouraging sites’ IDP to do some improvement for sites infrastructures through using site maintenance kits that were distributed by CCCM IP last year to reduce the potential risks of flooding. • During the meeting CCCM SNCC presented the status of pending responses for sectors’ gaps that have been identified, referred, and coordinated with respective clusters to be covered. • CCCM SNCC presented a new CCCM IP/YGUSSWP/YHF that covers 9 IDP sites with CCCM activities in Marib. • CCCM SNCC presented planned site maintenance projects for 2022 that aim to cover critical sectors’ gaps as the last resort. 	
<p>•Bani Odhabi rapid needs assessment – NRC</p>	<ul style="list-style-type: none"> • Updates about subdistrict in Abs, the IDPs there are stuck for more than years between the 2 conflicted parties, a rapid need assessment was conducted successfully by NRC for them, there are gaps in all sectors, we are trying to response by the RRM cash CCCY, the verification phase is in progress for 1837 case to receive the cash. Will be included in 3 round according to the criteria. • For Shelter/NFI NRC has 800 NFI shelters and 300 ESKs, a support from SCMCHA was requested, they said they don’t have the capacity to cover these gaps. The gaps were coordinated among available partners in the area. 	

CCCM Cluster meeting 18-05-2022 – minutes

<p>Flood preparedness</p>	<ul style="list-style-type: none"> As a preparedness measurement for the rain seasons in Yemen, the CCCM cluster is collecting data on the Projects required for highly flooding risked sites. The list of the suggested products was presented, and the data needs to be collected, partners contribution is highly needed. 	<ol style="list-style-type: none"> The CCCM National Cluster IM to collect the required data as presented. For site management agencies: Provide the details at site level for the preparedness For CCCM at ABA and Hub: Coordinated with partners and authorities for “evacuation sites” and stocks For: CCCM at National level <ul style="list-style-type: none"> Coordinateion with SCMCHA and EXU Coordination with shelter cluster for early warning system Based on preparedness advocate for fund
<p>1. Preparation for the upcoming Standard Allocation</p>	<ul style="list-style-type: none"> The Cluster discussed the importance to prepare ahead this year for the upcoming Standard Allocation to have a better cluster representation for it, 	<ol style="list-style-type: none"> For CCCM to have the latest Master List analyzed by sectors to generate scoring and identify some priority areas (with same methodology as for the 2021YHFS A2)
<p>Update from IM (REACH)</p>	<ul style="list-style-type: none"> REACH presented an overview of Site report submissions from January - April 2022 REACH introduced the new Site Monitoring System, which will be comprised of an updated Site Report Tool (for non-managed sites) and the new Site Manager Tool (for managed sites). As part of the new monitoring system Site Report data collection will be halted in June & July 2022 A Pilot for the Site Manager Tool will be implemented in June & July, for which 2-3 partners are needed In August, it is planned to start official data collection through the updated Site Report and new Site Manager Tool 	<ol style="list-style-type: none"> Partners should finalize sending all reporting tool assessment by the end of May, as the site assessments would be held after that to start rolling the new monitoring tools assessment.

CCCM Cluster meeting 18-05-2022 – minutes
