The 2022 1st quarter Health sector dashboard summarizes the progress made by Health sector partners involved in the Lebanon Crisis Response Plan (LCRP), identifies key challenges and priorities, and highlights trends affecting people in need. The Health sector in Lebanon is working to:

OUTCOME 1) Improve access to comprehensive primary healthcare (PHC);
OUTCOME 2) Improve access to hospital (incl. Emergency Room (ER) care) and advanced referral care (advanced diagnostic laboratory & radiology care);
OUTCOME 3) Improve outbreak & infectious diseases control;
OUTCOME 4) Women, men and youth (children, boys and girls, Person with Disabilities (PWD)) have their fundamental rights respected and have access to basic services and information.

### 2021 population figures by cohort

### Progress against targets

#### Key Achievements

- **# of subsidized primary healthcare consultations**: 830,580 / 4,953,363
- **# of patients who received chronic disease medication**: 137,196 / 230,000
- **# of Children under 5 receiving routine vaccination**: 123,122 / 445,809
- **# of cases receiving financial support for improved access to hospital care among targeted population**: 21,369 / 230,747
- **# of PHCCs within MoPH-PHC network**: 263 / 250
- **# of primary health care staff receiving salary support at MoPH - PHCCs level**: 21 / 30
- **# of functional EWARS centres**: 829 / 800
- **Number of beneficiaries receiving TB medication through NTP**: 409 / 1200
- **Number of beneficiaries receiving ARV medication through NAP**: 1,832 / 2,000
In 2022, the Health sector under the LCRP) remains committed to ensuring an equitable continuation of quality healthcare for displaced Syrians, vulnerable host Lebanese community, Palestinian refugees from Syria (PRS), Palestine refugees in Lebanon (PRL), and displaced populations from other nationalities.

**PRIMARY HEALTH CARE**

In the first quarter of 2022, vulnerable populations continued to benefit from a comprehensive package of primary healthcare that includes consultations, medications for acute and chronic diseases, vaccination, sexual and reproductive health, mental health (including medications), and nutrition services, as well as dental services and basic laboratory testing and imaging.

### Subsidized Consultations

- **Lebanese**: 830,580 reached (61% out of total)
- **Non-Lebanese**: 493,363 reached (42% out of total)

### Reproductive Health

- **Lebanese**: 48,119 reached (52% out of total)
- **Non-Lebanese**: 247,668 reached (48% out of total)

### Mental Health

- **Lebanese**: 13,803 reached (36% out of total)
- **Non-Lebanese**: 990,673 reached (64% out of total)

### Vaccination

- **Total**: 123,122 reached (28% of total

### Chronic Disease Medications

- **Lebanese**: 137,196 reached (60% out of total)
- **Non-Lebanese**: 230,000 reached (40% out of total)

### Nutrition

- **Lebanese**: 59,333 reached (1.5% out of total)
- **Non-Lebanese**: 3,901,307 reached (49% out of total)

The national SMART nutrition survey has been published in 2021.

Compared to the same reporting period in 2021, the subsidized consultations including antenatal care and mental health consultation sharply increased by 58%. The higher numbers are more likely caused by several factors including the ease of lockdown and COVID-19 preventive measures (strict lockdown was implemented during this period in 2021), the increased demand for public and subsidized services across populations, and the increased awareness about the availability of the services at the primary healthcare centers level. The percentage of children under five receiving routine vaccination decreased compared to the same period in 2021, believed to be related to households de-prioritizing non-urgent preventive services because of the increased financial hardship. The number of patients who received chronic disease medication is not comparable to previous years. Starting 2022, the Health sector is reporting on the number of active patients receiving medications and not only the registered ones. Nevertheless, a 30 per cent stock disruption of the total molecules is negatively affecting the access of the vulnerable population to chronic disease medications in the 481 primary healthcare facilities.

The percentage of Lebanese benefitting from subsidized consultations out of total is the highest since the beginning of the crisis (48% in 2021, 38% in 2020, 31% in 2019, 17% in 2018) which is reflecting the increased vulnerability among the host community and the need to maintain and expand support to the people in need.

The Health sector continued to contribute in 2022 to strengthen the national health system by carrying out and supporting inter-related functions in human resources, finance, governance, capacity building, and health information systems. Support for procuring vaccines, essential medications, reproductive health commodities, as well as other medical supplies and equipment for facilities including Primary Health Care Centres (PHCCs) within the MoPH network and health dispensaries continues to be prioritized.

Eight PHCCs were added to the MoPH network in the first quarter of 2022. The number of MoPH-PHCCs reached 263 across Lebanon in 2021. 60% out of the total are supported by Health sector partners to provide a comprehensive package of primary health care services.

HOSPITAL CARE
A total of 21,369 individuals received obstetric and emergency/life-saving care or nine per cent of the yearly target of 230,747. Some 998 individuals out of the target of 123,580 are from vulnerable host Lebanese communities. Through UNRWA, around 373 PRS and 4,768 PRL received hospital care. Overall, women and girls benefitted from 82 per cent of supported hospitalization, and men and boys benefited from 18 per cent of supported hospitalization.

OUTBREAK & INFECTIOUS DISEASE CONTROL
The Health sector supported the national outbreak and infectious diseases control through the expansion and reinforcement of the National Early Warning and Response System (EWARS) and the strengthening of the National Tuberculosis and Acquired Immunodeficiency Syndrome (AIDS) Programmes (NTP & NAP). In this regard, 829 out of 906 EWARS centres were functional in Q1, contingency stocks were made available at MoPH warehouses, 409 beneficiaries received tuberculosis medications through NTP (out of a target of 1,200), and 1,832 beneficiaries received antiretroviral (ARV) medications through NAP (out of a target of 2000).

HEALTH AWARENESS & INFORMATION
Health sector partners expanded efforts to ensure women, men, and youth (children, boys, and girls, PWD) have their fundamental rights respected and have access to health awareness and information. Out of the total number of PHCCs, 49 were engaged in health promotion and outreach activities (out of the target of 246). At the community level, 74,738 caregivers were reached with integrated health awareness messages out of a yearly target of 1,114,659.

2. KEY CHALLENGES OF THE SECTOR

In general, vulnerable populations faced barriers to accessing healthcare in the first quarter of 2022 due to the multi-faceted crises. Accessibility barriers included all different four pillars of approachability: financial, geographical, availability, and acceptability from both the supply and demand sides and at the individual and institutional levels. The deteriorating situation and the subsequent challenges impacted the business continuity of Health sector interventions across the country. Access was particularly difficult for persons with disabilities, older persons, adolescent girls and boys, survivors of sexual and gender-based violence, and female-headed households. Among the Lebanese host community, middle-income households were affected as well. An increasing number of people have been driven to seek services from the public sector, which has increased demand and added additional strain to the public health system, while resources remained the same or even decreased.

On the supply side, challenges were particularly noticed with the importing of medications and medical supplies, and in covering maintenance costs for all health facilities. Due to the economic and fuel crises, primary healthcare centres were forced to reduce their working hours, and hospitals cut down their bed capacity by 50 per cent. Human resources also declined considerably as health personnel emigrated in search of better employment opportunities. Access to dialysis and blood disease support is hindered in 2022 due to the lack of funding and the increased price of service in the country.

On the demand side, direct and indirect costs of services remains the main challenges to accessing healthcare. Vulnerable populations, particularly people with disabilities and older persons, continue to face challenges to access needed primary healthcare and hospital care, as many are unable to afford treatment and transportation costs. In addition, households are deprioritizing non-urgent healthcare services and hospital admissions including preventive primary healthcare (i.e., vaccination, antenatal and postnatal care, and mental health services).

The Health sector is challenged to maintain the same level of funding in all of the supported primary healthcare centers. There remains an urgent need to expand support for the comprehensive care package amid the deteriorating economic situation as growing numbers of people seek access to public healthcare.

3. KEY PRIORITIES FOR THE FOLLOWING QUARTER

The sector will prioritize support to MoPH at the primary healthcare level with complementarity models that offer more coverage for people in need and match existing services while implementing infection, prevention, and control measures to prevent the spread of COVID-19. The Sector will encourage Health partners to implement the National Unified Long-term Primary Healthcare Subsidization Protocol (LPSP) in the supported centers and to continue exploring in detail how to further optimize the package of services offered. Special attention will be given to maintaining routine vaccination activities and ensuring an adequate distribution of acute and chronic disease medications in the primary healthcare centers across the country.

At the secondary and tertiary healthcare levels, the sector will focus on improving access to hospital care for displaced Syrians and PRS. Partners will remain committed to sustaining and increasing financial support for hospital care, while decreasing the patient cost share given the current economic situation. Improved access to hospital care for vulnerable host Lebanese community will also be prioritized and the sector will aim in 2022 to develop a protocol across all frameworks that partners can follow to support hospital care for the vulnerable Lebanese population. The sector will also increase advocacy for dialysis and blood disease support that is interrupted due funding limitations and increased prices in the country. As the economic situation deteriorates, the Health sector will keep its focus on prioritizing sustainable life-saving services for vulnerable displaced Syrians and Lebanese.
