**STRATEGIC OBJECTIVES**

1. Enable refugees to live dignified lives in secure settlements with opportunities for self-reliance.
2. Enhance refugee access to adequate housing and improved living conditions.
3. Engage refugee and host communities in provision and design of shelter solutions.
4. Work with development partners and private sector to ensure better housing and living conditions.

**PROGRESS / MAIN ACHIEVEMENTS**

- **A Shelter Strategy 2021-2024** has been developed to enhance community engagement, design shelter solutions, and move towards integrated sites within hosting communities.
- Currently, 325,679 individuals are living in adequate dwelling with 1,180 new transitional shelters constructed, and 1,307 shelters improved.
- Over 15,000 new arrivals were provided with 3,107 emergency shelters in 13 camps, including in Assosa, Gambella, Shire, and Melkadida.
- Support provided to over 306 families through cash assistance, enabling them to construct and improve their own shelters.
- Development of new refugee sites, including Alemwach in Amhara Region, in collaboration with regional and local authorities, to accommodate refugees affected by conflict.
- Consultations with woman, girls, and other at-risk groups to protect against Gender-based violence (GBV) risks in the building, design, and maintenance of shelters.
- Support to internally displaced people (IDPs) through provision of emergency shelter assistance to 96,134 individuals and distribution of core relief items (CRIs) to more than 575,251 individuals, across 9 regions.

**CHALLENGES**

1. Only 45 % of the population have access to adequate dwelling. More than 400,000 refugees stay in old shelters and temporary emergency shelters.
2. The established refugee camps and sites are in need of basic improvements, including improvement of access roads and public facilities.
3. Urgent shelter response is needed for refugees and IDPs affected by conflict as well as those awaiting shelter solutions in reception centers, including in the Somali Region.

**WAY FORWARD**

- Strengthen collaboration with RRS, national authorities, UN-Habitat, and other partners to provide better housing and settlement solutions, in line with national plans.
- Development of a detailed settlement database for all refugee sites through site mapping exercise.
- Scale up the use of cash-based intervention (CBI) for shelter provision and strengthen a community-based approach to shelter solutions.
- Mainstream GBV prevention, risk mitigation, and response through shelter interventions.
