This infographic presents information on individuals registered through Individual Registration and Receptions in the Population Registration and Management Ecosystem (PRIMES) through March 31, 2022. The data presents demographic and geographic information, the identification of Specific Protection Needs, and the assistance provided by UNHCR to the persons of concern.

Number of registered individuals
54% of the cases registered in PRIMES correspond to women.

Total individuals
649,767**

Women 54%
Men 46%

Geographic distribution of registrations by department*

Age ranges'
The average age range of people registered in PRIMES is between 18 and 59 years old.

Evolution of PRIMES registrations*
Between the period 2020 – 2022, 576,573 individuals were registered in PRIMES, representing more than 95% of the total number of registrations since 2018.

PRIMES partners and users in 2022
- 40 partners use the PRIMES ecosystem: 30 local, 8 national and 2 governmental partners.
- 599 active users, of which 478 (80%) are partners and 121 (20%) UNHCR.
Evolution of PRIMES* registrations in 2022
Throughout 2022 there has been a slight increase in the trend of monthly records in PRIMES, with a particular emphasis in the first quarter of the year, which exceed the number of records in 2018 and 2019.

Guidance and assistance provided
45% of the requests were about access to humanitarian assistance, followed by requests to access protection services (13%).

Specific Protection Needs (SPN)
The Specific Protection Needs make it possible to identify the vulnerabilities that people present and the protection risks they face. In this sense, people may have one or several SPNs, and these may change during a given period.

Average group size
More than 50% of the registered groups are from 1 to 3 persons.

Country of origin
Most people (91%) report Venezuela as their country of origin followed by Colombia (9%).

Evolution of PRIMES* registrations in 2022

- More than 50% of the registered groups are from 1 to 3 persons.
- Most people (91%) report Venezuela as their country of origin followed by Colombia (9%).

Communication categories

- Assistance: 45%
- Protection: 13%
- Health: 10%
- People of interest: 9%
- Documentation: 6%
- RSD*: 6%
- Legal orientation: 5%
- Education: 2%
- Other: 2%
- Child protection: 1%

Main subcategories of SPNs registered in PRIMES

- Without legal documentation: 27%
- Unmet basic needs: 26%
- Children at risk of not attending school: 8%
- Without access to services: 8%
- Father/mother or single caregiver in charge of the household: 7%

Among the local number of SPN, 27% of people are without legal documentation, meaning that they either do not possess any documentation or are in an irregular situation; some might be at risk of statelessness. 26% have unmet basic needs, with difficulties in achieving a adequate standard of living, including access to food, clothing, housing, water, sanitation and health care.
