If the site is muddy how people with limited mobility (elderly, people with disability, pregnant, etc.) can move within the site?

The IDPs in the site face difficulties moving within the site especially elderly, They can only move around the camp with the help of others or stay in their place and some use Special latrine.

If Wash facilities are damaged; Available water source and its distance from site, what will women/girls do until latrines fixed?

Female IDPs has to use open defecation/the neighbors latrines/ emergency latrines.

The main source of water is a well in the site, Borehole or They bring water from nearest water point (2-3 KM) So females has to walk to their, and some has to purchase water trucks.
