Application vs. Intention***

Between January and May 2022, some 8,900 refugees and migrants were estimated to have transited through the Western Balkans subregion as part of mixed movements. Given the nature of movement of these persons, including as a result of pushbacks and/or reverse flow, UNHCR’s uses data on arrivals to estimate how many persons are a part of mixed movements (MMs) in a given time period.

Note: To explore asylum statistics for the Western Balkan region, use our interactive PowerBi dashboard here

Estimation of Persons of concern in Mixed Movement in the region as of 31 May:

8,901

* Includes Serbia and Kosovo (S/RES/1244 [1999]). The boundaries and names shown, and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

** For North Macedonia, data on arrivals are not official government data; they are UNHCR estimation based on different sources and do not imply official endorsement by UNHCR.

*** 4 countries are having an asylum policy with a procedure including Intention before the application to asylum (Albania, Bosnia and Herzegovina, Montenegro, and Serbia).

Includes Serbia and Kosovo (S/RES/1244 [1999]). The boundaries and names shown, and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Note: Data presented in this dashboard is collected by UNHCR in the Western Balkans subregion, including data collected by UNHCR Public Information focal points, data collected through Border Protection Monitoring (BPM), as well as monthly arrival and asylum statistics provided by authorities in each country. This data should not be considered final and may change as per the latest updates made available by the authorities. Persons in Mixed Movements (MMs) are considered ‘new arrivals’ as a part of irregular flow. Data on irregular arrivals and transit of persons through the countries in the Western Balkans may contain double counting of the same persons. It is, therefore, advised not to use the sum of these figures.
Some 8,718 persons were present in the Western Balkans subregion as of end May 2022, including 223 unaccompanied and separated children (UASC). Of these, 69 per cent were present in Serbia, followed by Bosnia and Herzegovina (24 per cent), Albania, Kosovo and Montenegro (2 per cent each) and North Macedonia (1 per cent). This also includes estimated number of persons present outside those government-run centres.

Persons of concern present in the Western Balkans countries are accommodated in government-run centres; IOM-run centres, asylum-seekers and persons granted international protection in asylum centres and persons on the move in transit centres.

**Persons of concern present at the end of May in each country:**
