

Inter-Agency Referral Analysis

Report covering April- June 2022 (Q2 2022)
Livelihoods

This analysis provides an overview of referral trends across all sectors, and in such a way informing the understanding of people's needs in order to strengthen the humanitarian response in Lebanon. The Inter-Agency Referral Analysis is designed to foster greater efficiency of referral pathways and contains recommendations for improved coordination and access to services for vulnerable communities. It guides sectors in the identification of any gaps and blockages in the response, and contributes to the discussion on how to respond to the affected populations, as well as how people's needs are changing with the current context.

This dashboard presents data compiled from two data sources: Inter-Agency Referral Monitoring System (developed by the Inter-Agency Coordination) and Referral Information Management System (RIMS, developed by the Danish Refugee Council). It is a product of collaboration of partners in the field, the Danish Refugee Council, UNHCR and the Inter-Agency Coordination.

Total number of Referrals to All Sectors

38,792

Total number of Referrals to **Livelihoods**

577 (1% of total)
