Meeting Note and Action Points

The Inter-Sector Coordinator welcomed participants and discussed the main agenda points:

- **JRP status & update:**
  - MoPIC started receiving inputs from line ministries; however, the quality of inputs is below expectations and there is a need to reach out to agencies, partners, and stakeholders to start the consultation
  - ISWG will follow-up on the JRP timeframe and to provide updates for 2023 by the next ISWG meeting
  - **2022 August MONITOR database** is open for partners to finalize their reporting by the 11th of September COB.

- **3RP brief by Regional Bureau:**
  - Regional bureau presented an update on the tools that the Bureau is working on, including the regional evaluation related to the 3RP structure, focusing on a central level
  - The evaluation was conducted between November 2021-June 2022 by an independent consulting company called “Tango”
  - The report was shared widely, and the Bureau in coordination with partners will frame the conceptual operational framework around the 3RP
  - Preparation is ongoing for a regional planning workshop from the 13th-15th of September that will focus on the region. The invitation will be shared with RTC members through coordinators and with partners at the country level
  - The Bureau will be working at the regional level on an advocacy roadmap that reflects the situation at the country level where parties are leading efforts in terms of government, donors, etc.
  - A joint UNHCR-UNDP technical secretary country visit will take place at the country levels (between September and October) to meet with partners and strengthen the regional and country relationships
  - Regional bureau presented to members the planning process of the 3RP; showing the activities that need country support
  - The annual 3RP planning process usually starts around September and runs up to December or January when the regional strategic overview document would be finalized
  - The drafting process for the regional strategic overview will start around the end of September/October when countries need to provide population figures for the planning for the 2023 plan, and the preliminary figures that will be required around the end of October
Therefore, partners are encouraged to work towards this deadline since the first draft of the RSO will be circulated around November.

Feedback from country coordinators, sector leads, and 3RP partners is required and the regional bureau will provide the needed support in a timely manner.

Bilateral discussions will help better understand and enhance the coordination between the regional office and the country-level team.

The Bureau is currently reviewing a guidance kit to be shared with country coordinators, sector leads, and partners to facilitate their work.

The kit contains information on technical components and minimum requirements from countries to inform the regional response plan.

Planning for a regional level Information management workshop for UNHCR and other partners is ongoing.

3. 3RP 2022 Monitoring Dashboard-IM Presentation:

IACU IM presented the first draft of the 3RP MONITOR dashboard 2022 (Consisting of three sections)

The first dashboard reflects the beneficiaries disaggregated by WGBN, users will find pillars (Refugee, Resilience, and COVID-19), sectors, objectives, projects, organizations, population/location, and indicators.

An interactive dashboard where filters can be used based on the needed information.

Worth noting that the number of beneficiaries is not unique (since most beneficiaries are benefited from different services and sectors)

The second dashboard shows the beneficiaries per location in the country including urban and camps.

The third includes all the indicators and the achievements per indicator, the location of the project, the population location, and the pillar.

Members were encouraged to share their feedback on the dashboard to strengthen the reporting mechanism.

Participants raised some concerns regarding the sensitivity of the data and the external communication of these figures (duplication, not unique figures, etc.), namely our accountability towards the government and donors.

A dedicated session will be planned to further discuss the above as to ensure the dashboard can be used externally including for advocacy with donors.

Comments and questions:

UNICEF:

- Raised concerns regarding the fact that the number of beneficiaries is not unique, and the need to ensure/have clear communication with the users as this might lead to discrepancies between the information in the dashboard and other reports.
- UNICEF is willing to have further discussions and provide help if needed to avoid this.

IM:

- The dashboard doesn’t identify individuals, it only shows the number of beneficiaries assisted based on the indicator, organization, population location, and geographical location, therefore the calculation method was provided by sectors on each indicator.

JIF:

- **Expressed concerns regarding feasibility and accountability to** present this data as is to the government and donors and the need to review the methods of calculating/counting beneficiaries.

4. AOB

WFP:

- Reduced the transfer value to beneficiaries for the September program.
- Sector coordinators were asked to keep an eye on beneficiaries’ reactions and share any impact.
- IACU will compile inputs and share them with members during the next ISWG.

Mobile wallets:

- UNHCR and other agencies are promoting mobile wallets as the humanitarian cash assistance modality. There have been questions about whether UNHCR is promoting a single financial service provider (FSP) mobile wallet (i.e., UMNIAH/ Uwallet) for its caseload. To clarify, UNHCR provides refugees with an opportunity to open a Uwallet mobile wallet account after completing a financial/digital literacy training. However, basic needs cash assistance eligible refugees will continue to receive their UNHCR cash assistance regardless of their chosen modality (virtual bank accounts through CAB, ATM cards, or mobile wallet (whether from UMNIAH/Uwallet or any other FSP).
UNICEF
- Requested to share the assessment on gender that was carried out with the support of GenCap
- The report is almost finalized and is being validated by the HPF Co-chair
- The Next ISWG to provide an update on GenCap/inception report.

One refugee approach:
- It is one of the topics that are being discussed with MoPIC noting that we don’t want to create a separate/parallel plan
- The one refugee approach is on the agenda for the next meeting with MoPIC
- Another topic to be discussed with MoPIC is to advocate for closer coordination with all partners.

Health sector:
- Under the theme of development, the health sector has been working under the multi-donor account with the Ministry of Health on the inclusion of refugees in the national health system.

SGFPN:
- A request for nomination of a focal point to attend a sequence of training on gender mainstreaming and programming shared with sectors/sub-sector coordinators
- Members were encouraged to share names of two focal points per sector, to attend the training that will take place in September.

SRH sub-sector working group
- In process of implementing a nationwide emergency abstracting and newborn care assessment in Jordan and so far, various activities were implemented including:
  - kickoff workshop of the assessment
  - In June, SRH with the participation of national stakeholders, including the Ministry of Health, Maternal and Child Health Directorate, Academia, and the Public Health directors reviewed the global assessment models and adapted them to the Jordan context
  - The next phase will include the digitalization of those questionnaires and the use of tablets.

JIF:
- Planning to organize a seminar between INGOs and MOPIC next week to improve the process.

IACU:
- Planning to engage field coordinators to attend the ISWGIs and provide their updates.
