

Overwiew

UNHCR's operation in Burundi supports refugees, two-thirds of whom live in camps in the eastern part of the country. Nearly 90,000 refugees and asylum seekers are registered in our database. Durable solutions are sought for vulnerable cases in parallel, UNHCR is assisting the government of Burundi to facilitate the voluntary repatriation of Burundian refugees. About 200,000 refugees have been repatriated since 2017. In collaboration with other humanitarian actors, UNHCR supports the protection of internally displaced persons in Burundi.

BURUNDI OPERATIONAL ACTIVITIES Burundian voluntary repatriation

as of 30 Sep 2022

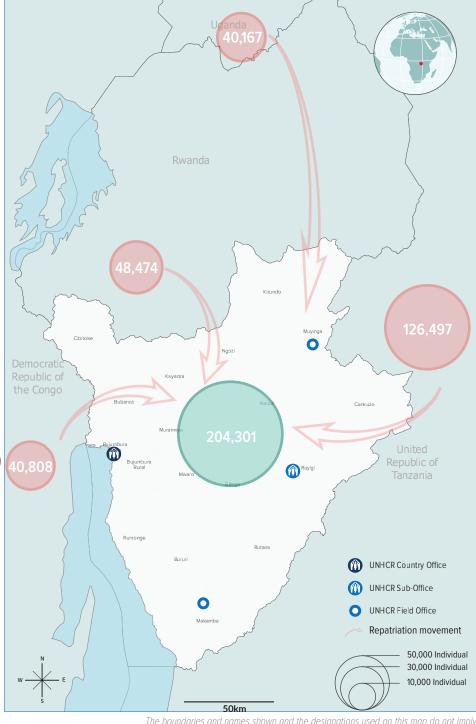

HIGHLIGHTS

UNHCR and partners have been facilitating the voluntary repatriation of Burundian refugees who make a free and informed decision to return home since this time. More than 200,000 Burundian refugees have returned to Burundi as of the end of September 2022, the majority from Tanzania, followed by Rwanda, the Democratic Republic of the Congo, Kenya and other countries in the region. These repatriations take place under the framework of the Tripartite Agreements between the Government of Burundi, the Governments of countries of asylum, and UNHCR, with all parties having committed to respect the voluntary nature of these returns.

Context

Under the MYMP strategy 2021-23, resettlement activities targeting 4,100 refugees were undertaken in response to assigned quotas from Canada (100 persons) and the USA (4,000). As the end of September 2022, the operation had submitted 2,142 persons to the Resettlement countries representing 54% of submissions while referrals stood at 2,210 persons. Departures were facilitated for 1,037 persons. With the delayed roll out of P2 Group resettlement for Burundi, where 3,000 persons of the 4,000 were to be submitted to the USA, the office has already surpassed the 1,000 persons that was the expected to be submitted under the P1 processing modality. In accordance with the objectives of the Global Compact for Refugees (GCR) and the Comprehensive Refugee Response Framework (CRRF), UNHCR will continue efforts to broaden refugee access to solutions in third countries, by seeking complementary pathways such as family reunification, humanitarian corridors, education and labor mobility programs.

HIGHLIGHTS

Since 2017, UNHCR has supported the voluntary repatriation of over 199,000 returnees, including 65,000 in 2021 and 16,621 in 2022. Upon arrival of returnees in their area of return, UNHCR and its partners conduct follow-up activities to review their level of reintegration. Monitoring data indicate a low capacity of returnees to access basic social services, which makes some refugees reluctant to return. Despite efforts by the government of Burundi with support from humanitarian and development actors, access to housing, land, and employment remain major challenges. An example, over 70 percent of returnees are not satisfied with their level of food security. Nevertheless, there have been improvements in the security and justice sectors (land dispute resolution) compared to previous years.

MEASURABLE RESULTS BY SECTOR

PROTECTION	68% of respondents reported that the adults in the household can have a national ID card. 62% of children in 2022 have a birth certificate, compared to 48% in 2021. This is a significant improvement following registration outreach in the return areas.
EDUCATION	34% of children who arrived this year, compared to 50% in 2021, are enrolled in school. This decrease is explained either by birth certificates or by the fact that some children arrived towards the end of the year (second semester).
HEALTH	73% of returnee households do not have a health insurance card compared to 65% in 2021. 83% of returnee children arriving in 2022 are vaccinated against measles from asylum countries. The major challenge is access to health services in the return areas.
WATER, HYGIENE AND SANITATION	82% of households in 2022 reported having access to safe water. More than 50% of them find water within two kilometers. During the drought period, there is an increased need for containers to store sufficient quantities of water at the household level.
SHELTER	27% of returnees live in their own homes. 49% lived in rented houses; 73% of this group are in the northeastern provinces (Muyinga, Kirundo, and Cankuzo). The returnee community is in great need of support in terms of shelter kits and building materials.
FOOD SECURITY	61% of returnee households eat only once a day. And 71% of the returning households reported never having received food aid after the one they received upon arrival at the transit center.
ACCESS TO LAND	61% of returnees in 2022 spent their cash allowance to buy land (fields). 73% of those who have lands cannot be cultivated them due to lack of seeds and farming tools.
LIVELIHOODS	71% of returnee households report living on less than \$0.5 per day on average. 61% of returnees were employed as agricultural labor- ers in the host community's fields. Many returnees living in border areas cross the border back and forth to engage in temporary labor.
