In 2022, the CCCM cluster noticed an increase of population from January to June. Since June the trend is a light decrease of population in sites, with only 2.3%.

52% of the population in sites are covered by CCCM site management approaches, when only 31% of the sites are covered. These site management approaches are mainly under mobile team. From the Sites Typology guidelines, approved by the CCCM SAG, CCCM partners should focus their intervention to the largest sites and not put the priority to IDP locations under 20 households, unless this could be covered under Mobile Teams Area Based Approach. IDP locations represent 20% of the number of Sites in Yemen but only 2% of the IDPs in sites.
Situation Report:

1. General Information:

- The food gaps across Sana’a governorate are still pending despite being a priority need for IDPs in the sites. In addition, the water gap in Hamdan and Bani Hushaysh districts of Sana’a governorate continues since September hindering IDPs access to water in 4 sites. The gaps were referred to the WASH partner to resume water provision project permits. On the other hand, and after a six-month service cut in Ibb, GARWAPS resumed water provision to most of the IDP sites in Ibb and Taiz Governorates.
- An outbreak of skin diseases in sites across Dhamar governorate, and in Al-Mahm sites in Amran governorate, was reported by CCCM partners SDF and YRCS.
- An OCHA-led joint mission to Matwalah sub-district of Abs district in Hajjah resulted in facilitating access to humanitarian partners who assessed the needs of flood-affected IDPs. Following that, JAAHD started constructing 700 transitional shelters in IDP sites of the sub-district, while ZOA provided 520 affected families with cash assistance. Qatar Charity also confirmed their capacity to support several families in Abs who were affected by the floods that took place last September. A fire incident affecting one family was also reported in the sub-district by the Area-Based coordinator. Liaison is ongoing with the shelter cluster for response.
- RADF’s community center in Hajjah reported the new arrival of 14 families from Midi district to Al Maqaishah site in Abs district. RADF conducted a rapid need assessment for these families and 6 other families arriving in Al Kasarah IDP site in Abs district. Coordination is ongoing with service providers to support these families.

2. Achievements:

- In Ibb governorate, IOM distributed hygiene kits and cleaning tools in the sites under their management. IOM also installed latrines in Al-Salam Camp, rehabilitated the sanitation networks and constructed drainage channels in Al Lahaj and Ibn Aqeel school sites. In Dar Al-Sharaf site, IOM selected and trained 4 skilled and 20 unskilled community members to do plumbing and minor fixtures through cash-for-work modalities. For environmental risk mitigation, IOM finished the building a retaining wall in Dar Al-Sharaf site.
- In Mustaba district of Hajjah, YGUSSWP completed the Jabal Abeed water scheme which will provide water to IDPs and host community in the district under their CCCM maintenance activities. In Abs, RADF is implementing two maintenance projects to rehabilitate a school and a water scheme in the district.
- In Al Hodeidah, JAAHD started construction in the Al-Mansar health facility in Al Marwah district and the flood mitigation project in Jabal Alshaeeef IDP site in Bajil district. JAAHD is also supporting a community-led portable stove production activity, which aims to make 135 stoves for displaced families in Az Zuhra district. Furthermore, JAAHD conducted a focused-group discussion with the community about a livestock project before distributing 100 goats to 25 displaced families.
• In the West Coast of Al Hodeidah, the IOM CCCM team started training 50 women in weaving Azaf as an income-generating activity. Moreover, IOM started the improvement works of cooking spaces used by 213 families to reduce for fire risks. IOM also distributed and installed solar panels for 600 families in Sheb Naba site. Similarly in the West Coast, DRC is planning to install 104 solar light poles in Al Khokha DRC-managed sites. In addition, community meetings are ongoing for implementing safe cooking spaces for 250 families in Asabieah, Almarashida, and Atta’a sites. As part of site infrastructure activities, DRC team will conduct some repair in Al-Mogel to improve access to Hays IDP sites.

• Through a cash-for-work modality, YRCS is constructing 9 community spaces in IDP sites under their management. Likewise, YGUSSWP is currently constructing community spaces in 5 sites in Sana’a governorate.

• IOM CCCM team in Ibb governorate, and SDF team Dhamar and Al Bayda governorates, conducted trainings on the basic modules of CCCM for community committee. A specific session on protection and referral of violence cases was delivered to woman committee representatives by SDF’s team in Al Jadad site, Dhamar governorate. In Maslahat Al-Toroqat site, IOM and YWU conducted an intentions focused-group discussion with the site residents as relocation may be the only viable solution to mitigate the high risk of recurring flooding in the site. To sensitize site residents about the risks of landmines, YEMAC delivered mine risk awareness sessions in Almoroor and Almusala IDP sites. SDF’s CCCM team also delivered 26 awareness campaigns in IDP sites in Dhamar and Al Bayda governorates on education, fire safety, CFM, and hygiene. DRC is in the process of forming a first aid committee in Asaad and Abadi and Alwarah sites in the West Coast as part of their community-led project support.

• Deem Provided 435 families with emergency shelter kits in 9 sites in Ibb governorate.

• In Abs district of Hajjah, DRC provided 18 newly arriving families in 2 sites with shelters and non-food items. DRC also provided shelters and non-food items to 12 families affected by eviction and fire referred by RADF in Abs. In addition, DRC referred a list of IDPs in need for food assistance in their sites in Hajjah, and the FSAC cluster mobilized Save the Children to provide food assistance to these families. Also, in Hajjah, YGUSSWP distributed 458 bedding kits to flood-affected families through the Shelter Cluster contingency stock, in Khayran Al Muhraq, Mustaba, and Washah districts. SDF in Dhamar also coordinated the distribution of 38 emergency shelter and non-food item kits in Mwna site. In five sites in the West Coast, IOM distributed plastic sheets for 168 families whose shelters were partially damaged by strong winds. YGUSSWP shelter team provided 101 families in 7 sites with emergency shelters in Bani Matar district of Sana’a. Additionally, YGUSSWP, with support from IOM, provided 80 families with emergency shelters in Bani Al Harith district in the same governorate. SCI provided cash for nutrition to 10 families in RADF-managed sites in Abs.

• RADF CCCM team assessed the critical water gaps in six sites in Abs. In Al Haijah IDP site in Abs, RADF coordinated with OXFAM to assess a damaged water scheme and maintenance of the scheme will be implemented soon.

• CCCM partners in Dhamar, SDF, coordinated a visit by the health office to Jahran and Dawran districts to provide medicines and vaccinate children in 5 IDP sites. Similarly in Amran, YRCS coordinated
with the health cluster to conduct a mobile clinic visit to Al-Mahm site for response and awareness on infection skin diseases. To complement that, YRCS carried out a cleaning campaign in the site to remove solid waste.

- NRC, through their local partner, has started implementing their CCCM activities in Hajjah and Al Hodeidah and trained the newly established community committees 11 IDP sites on camp management. Similarly, DRC conducted a CCCM training for its new local partner, LMMPO, who started implementing CCCM activities in Abs district of Hajjah.

3. Challenges:

- Shortage of shelter stocks in Ibb hub continue to affect partners response to emergency shelter needs in sites. In Al Hudaydah hub, delays were reported for eviction and fire incident response. In many areas of the country, such as Mawiyah district, Dhamar and Al Bayda governorates, severe lack of service providers in general is worsening the situation in IDP sites there. In Sana’a, food and WASH pending gaps have increased IDPs vulnerability to negative coping mechanisms in absence of sustainable income. Availability of education services to children in sites across the entire Ibb hub remains a huge gap. Similarly in Al Hudaydah hub, many gaps identified by CCCM partners remain pending due to lack of resources.
- SDF reported limited mobility of their CCCM team due to reduction of vehicles which is also limiting their Area-Based support to unmanaged sites.
- Due to scarcity of available land in Ibb, authorities are facing a challenge in identifying a suitable land to relocate IDPs in sites affected by eviction threats.
- The Area-Based Coordinator in the West Coast reported a high number of IDPs without national IDs. A list is being prepared before coordination is initiated with the protection cluster.
- IOM and DRC teams in the West Coast are unable to access to Al Haima area, At Tuhayta district to conduct day to day activities in the IDP sites as checkpoints are not allowing any NGOs in the area.

4. Recommendations:

- Advocacy for service provision and multi-purpose cash assistance to IDPs in sites across Ibb hub and in Dhamar and Al Bayda governorates to alleviate critical shortages in service provision.
- Continued advocacy for emergency assistance and durable shelter solutions for IDPs that are recurrently affected by torrential rain and floods.
- National Cluster to hold workshops with SCMCHA, CCCM partners, and the Cluster Coordination Team to discuss the new strategy and agree on updated mechanisms of collaboration.
- Advocacy with local authorities to allow IOM CCCM team access to their managed sites in Al Haima area, At Tuhayta district of Al Hodeidah. In these sites, there are 2,000 families in critical need for basic humanitarian services.

Training of community committees inside the community center – AL Tarbiah Site
Rayan is one of the residents of AL-Kahraba site who volunteered and was paid to work for one day CFW to install CCCM community space in his site with a high level of enthusiasm noticed on his face, as this space will enhance his participation in site’s related issues, decision and activities, provide suitable space for accommodating actors and humanitarian activities in the site without exposing to heavy sun rays.

((Rayan ... Life in IDP hosting site is not easy)) Rayan tells his life story:
"I’m 20 years old, was displaced in 2020 with my mother and four brothers after my father passed away, we were stranded and we resorted to the AL-Kahraba site in Raydah district. I am from Taiz Governorate and I help my mother support my brothers by working on the daily wage".

The photo was taken by CCCM, Abeer Al Wesabi @ YRCS 31. 10.2022

This photo describes installing nine community spaces in IDP sites in Harf Sufyan, Al-Qaflah, Al Madan, and Raydah districts in Amran governorate, CCCM team @YRCS.
