Challenges to be addressed

• Data on refugees with disabilities
• Mainstreaming disability in all sectors (including needs assessment, types of support and impact assessment)
• Healthcare (medications and diagnostic services) for persons with disabilities and chronic diseases
• Assistive equipment based on needs (wheelchairs, walkers, glasses, ear implants etc.)
• Social and rehabilitation services for refugees with disabilities
• Support services and assistive equipment for better integration of children with disabilities refugees in schools
• Support services for better inclusion of persons with disabilities refugees in open labor market
