

SITUATION UPDATE

Pakistan has been generously hosting millions of Afghans for over 40 years with significant movements of Afghans in both directions. Currently, Pakistan hosts over 3 million Afghans and provides open access to both public health and education services. The majority of refugees have exercised their freedom of movement and 68.4 per cent of refugees live in outside refugee villages. Given that most Afghan refugees and other Afghan nationals in Pakistan live in urban or semi-urban areas and their daily lives intersect with members of the host community many of whom are also from the most vulnerable sections of society, this response plan targeted 2.6 million Afghan refugees and Afghans of other status, and 0.8 million host community members.

In view of the significant presence of Afghan refugees and other Afghan nationals in Pakistan, the RRP 2022, which was the outcome of interagency consultations, including also with the GoP, sought to increase support to the Government's ongoing efforts and people of Pakistan with an aim to safeguard the protection and build the self-reliance of the Afghan populations, as well as to further assist host communities. Existing and new programmes focused on health interventions, education, livelihoods, food security, water and sanitation, protection and provisions of green energy, were encompassed in this multi-sectoral plan in a manner that bridged humanitarian and development assistance.
