

Emergency Transit Mechanism, Rwanda

August 2023

Since the inception of the Emergency Transit Mechanism (ETM), **1,737 people were** evacuated from Libya in **14 evacuation flights** to the ETM. They came from **10 countries**: Eritrea, Sudan, South Sudan, Somalia, Ethiopia, Nigeria, Chad, Cameroon, Guinea and Mali.

While **625** people are still waiting at the ETM, **1,152** people have departed the ETM, resettled to third countries including Norway, Sweden, Canada, France, Belgium, the Netherlands, Finland, and the USA.

The ETM remains a life-saving mechanism to allow critical assistance and protection, as well as case processing for durable solutions.

ETM OVERVIEW

Libya is a major transit route for refugees hoping to reach Europe through the Mediterranean Sea. The unstable situation combined with periodic fighting has and caused widespread suffering. Many refugees and asylum seekers in the country have been held under dire conditions, including detention, where abuse is rife and violence a potent threat. UNHCR has been at the forefront in efforts to assist the most vulnerable, including relocating the refugees and asylum seekers to safe and secure places outside Libya.

Through the Memorandum of Understanding (MoU) signed in 2019, and valid to 31 December 2023, UNHCR in collaboration with the Government of Rwanda (GoR) and the African Union (AU) established an ETM Centre in Gashora Sector, Bugesera District, Rwanda. The ETM can currently support up to 700 refugees and asylum seekers at any given time. Its main aim is to temporarily host refugees and asylum seekers who have undertaken voluntary evacuation from Libya. While in the ETM, the asylum seekers go through refugee case processing undertaken by UNHCR to determine if they meet the requirements for durable solutions. Three durable solutions of return to their countries, integration within Rwanda and resettlement are on offer to refugees at the ETM. To date, all refugees have opted for resettlement from the ETM.

Partners and Coordination

UNHCR's Office in Nyamata oversees the ETM operation with a workforce of 43 persons including 21 international and 22 national staff.

UNHCR and the Ministry in charge of Emergency Management (MINEMA) coordinate together the refugee response operation in Rwanda, including at the ETM Centre in Gashora. At the ETM, UNHCR works in partnership with MINEMA and seven NGOs who deliver life-saving protection, basic assistance, and essential services to the refugees and asylum seekers. These include:

MINEMA: camp coordination, management, and security.

ADRA: food security (catering), warehousing and distribution management of non-food items (NFIs).

World Vision International: water, sanitation and hygiene (WASH), as well as vocational/skills training.

African Humanitarian Action (AHA): healthcare services, reproductive health and HIV services as well as nutritional wellbeing.

Humanity & Inclusion: support for persons with specific needs and psychosocial support.

Prison Fellowship Foundation: legal assistance, and civil documentation/registration; and community-based protection.

Save the Children International: prevention of gender-based violence (GBV) and child protection (CP).

Rwanda Red Cross/International Committee of the Red Cross (ICRC): family reunification and first aid.

Focus group discussions are conducted with the community about revising the food menu at the ETM in

Main Activities

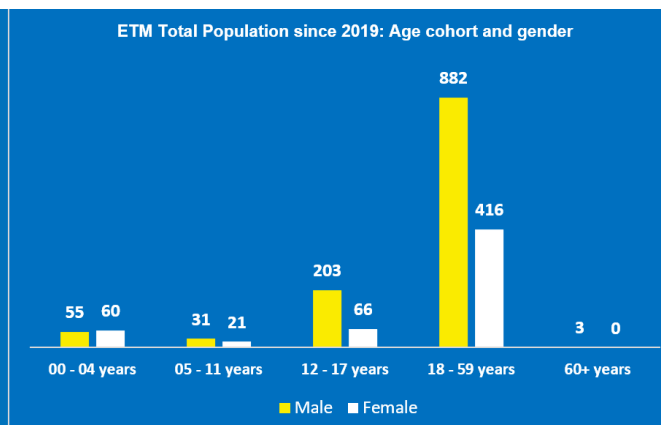

PROTECTION

Protection Delivery: UNHCR mainstreams protection principles throughout all the humanitarian services it provides at the ETM. The key activities to ensure the protection of refugees and asylum seekers include registration, documentation, community engagement, psychosocial support (PSS), legal assistance, child protection (CP) case management, protection monitoring, youth inclusion, and activities to prevent the occurrence of gender-based violence (GBV).

Registration and Documentation: Since the opening of the ETM in 2019, UNHCR has registered 1,737 people evacuated from Libya, and 43 babies born at the ETM. Documents were provided for all registered refugees and asylum seekers. Upon arrival, UNHCR conducts a verification exercise for all refugees and asylum seekers and assists them in obtaining the proof of registration. These documents allow the refugee status determination process to subsequently begin.

Gender-based violence (GBV): UNHCR and its partners undertake ETM community GBV prevention, mitigation, and response activities, including ensuring that victims/survivors are referred to and have access to services in a timely and sustained manner. In this regard, interagency standard operating procedures have been established to support GBV and other partners to coordinate and implement safe and accessible GBV response, risk mitigation and prevention interventions. GBV incidents faced by individuals in the ETM include intimate partner violence, early child pregnancy, denial of resources and rape. 80% of incidents occurred while in Libya or country of origin. As a result, UNHCR and partners conduct regular GBV awareness campaigns, follow-up on case management, examine GBV trends to inform advocacy and future programming on potential gaps.

Child Protection: Together with partners, UNHCR has ensured that Best Interest Assessment (BIA) and Best Interest Determination (BID) procedures are operational to identify the best course of action in child protection cases. In addition, UNHCR and partners ensure that children at risk, including those under foster care arrangements, are identified, supported, and assisted. All services offered are designed to create an enabling environment that respect the rights of children and ensure that child-centred programming is integrated in all sectors. In addition, a Child Friendly Space is in operation at the ETM providing a safe space for children of all ages to learn, play and receive tailored support. In August, a child protection mainstreaming workshop was organized by SCI and UNHCR which different partners participated in.

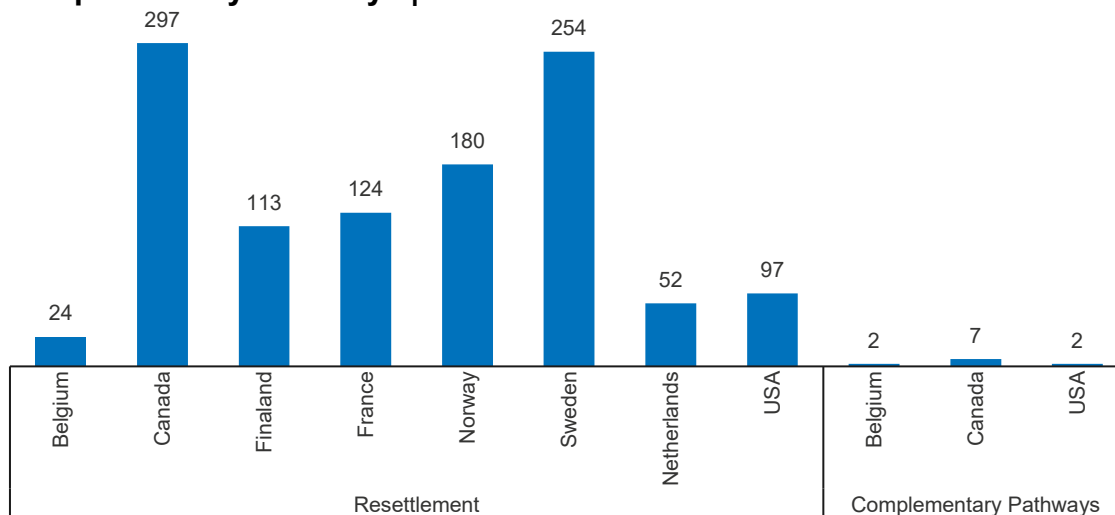

CASE PROCESSING FOR SOLUTIONS

Refugee Status Determination (RSD): All refugees and asylum seekers evacuated from Libya undergo case processing for solutions starting with the RSD process. UNHCR determines whether they meet the refugee criteria in accordance with the 1951 Convention Relating to the Status of Refugees. Granting of refugee status is an important mechanism to enable resettlement to third countries and prevent refoulement of refugees to their countries of origin. To date, RSD has been carried out for 1,692 individuals.

Country of Origin	Female	Male	Grand Total
Cameroon	1	0	1
Chad	0	1	1
Eritrea	327	671	998
Ethiopia	48	26	74
Guinea	4	0	4
Nigeria	1	1	2
Somalia	43	51	94
South Sudan	7	11	18
Sudan	115	385	500
Grand Total	546	1146	1,692

Resettlement: Since the opening of the ETM in 2019, a total of 1,152 individuals departed through resettlement and complementary pathways to eight resettlement countries (Finland, Belgium, France, Norway, Canada, Sweden, the Netherlands, and the USA). UNHCR continues to advocate for increased resettlement opportunities for the most vulnerable groups as resettlement remains the most viable durable solution for refugees evacuated from Libya to the ETM in Rwanda. In August, 111 individuals were interviewed for resettlement and 33 individuals departed the ETM (15 to Norway and 18 to USA). In total, there are currently 68 cases who were previously submitted for resettlement and are at different stages of the resettlement process.

Departures from the ETM through Resettlement and Complementary Pathways | 2019 - 2023

**BASIC NEEDS AND ESSENTIAL SERVICES**

- **Basic assistance** is provided to ETM refugees and asylum seekers, including shelter, bedding, food, electricity, clean water, hygiene essentials, core relief items as well as cash assistance to help them purchase essential items shortly after arrival in Rwanda. Following their registration and enrolment in the cash assistance systems, basic needs assistance is provided through cash-based interventions (CBI), where each refugee receives 50,000 RWF (~50\$) to meet their daily non-food basic needs.
- **Healthcare services, including reproductive health, nutrition and HIV services**, are accessible, free of charge on 24/7 basis for all refugees and asylum seekers at the health clinic run by AHA. Where individuals may require secondary or tertiary healthcare services, UNHCR and the health partner (AHA) refer those cases to secondary and tertiary level hospitals – 32 individuals were assisted in August. In addition, two births were assisted during the month. The health clinic also operates ambulance services for emergency cases and referrals cases. In addition, mental health services are provided and supplementary feeding is provided to 26 children under two and 75 adults with special nutrition needs. Regular nutrient deficiency screenings are also conducted.
- For **food assistance**, refugees, and asylum seekers at the ETM receive three meals a day provided by UNHCR and ADRA. In August 2023, 656 refugees and asylum seekers were fed through this programme. UNHCR also supports people with special needs through the provision of gas (LPG) and dry food to supplement their nutritional needs and enable cooking at home with dignity.
- **Water, Sanitation and Hygiene (WASH) services:**
 - **Water** is supplied to the ETM from the main national water grid, through the government run Water and Sanitation Cooperation (WASAC). The average water consumption per person per day in August was 84 l for both drinking and domestic use. Moreover, as the UNHCR's WASH partner, WVI conducts regular monitoring of water quality to ensure proper free chlorine levels prior distribution.
 - **Sanitation** services are regularly provided by WVI. The ETM counts 40 shower rooms and 30 modern bathrooms, as well as 68 drop-holes. Solid and liquid waste is also regularly collected and disposed.
 - **Hygiene promotion** activities take place regularly with hygiene promoters from the community encouraging their fellow refugees adopt best hygiene practices.
- **Infrastructure:** Since its opening, UNHCR has expanded the availability, accessibility and quality of accommodation provided at the ETM. The key infrastructure developments include a two-storey building (the *Ikaze Residence* Apartment) with the capacity to host 360 persons. There are also 30 accommodation houses that can host 340 individuals. In addition, UNHCR constructed a health clinic, and office block in previous years which are all currently fully operational. Construction of a one-stop community multipurpose center has also been completed and started being used by UNHCR and partners in August for psychosocial support and learning services. To manage rainwater and prevent soil erosion/degradation, UNHCR previously constructed a drainage system for the whole of the ETM of 2,495 m. Repairs and maintenance of diverse offices, community spaces and accommodations are regularly conducted. These developments have been critical to enable safe shelter and a conducive environment to deliver services.

VOCATIONAL AND SKILLS TRAINING

- UNHCR and partners deliver a range of vocational and skills-based trainings at the ETM to empower the refugees and ensure that they gain useful skills. Based on proposals and feedback from the community, trainings are delivered to both the refugees and the host community. Activities aim to boost the resilience as well as encourage peaceful coexistence.
- Courses provided in August 2023 included hairdressing, tailoring and ICT skills. Language classes in English, French and Kinyarwanda are also delivered by WVI. A total of 191 refugees, asylum seekers and host community members benefited trainings in August with an additional 91 refugees and asylum seekers who attended language classes.
