

● Adequate/ meets min. standard   
 ● Partially adequate/ over 70% of min. standard   
 ● Inadequate/ below standard   
 ● Non-existent/ not provided  
↑ Service improved since last month   
 ↓ Service declined since last month

Category	Item	Status	
Camp Management	Crowd management measures	Partially adequate	
	Burial assistance	Adequate	
	Community governance structures	Adequate	
	Predictable & timely information dissemination	Partially adequate	
	Diversity of voices and languages	Partially adequate	
	Complaints and Feedback Mechanism	Adequate	
	Site maintenance activities	Partially adequate	
Shelter & non-Food Items (NFIs)	Shelter living space	Partially adequate (improved)	
	Vulnerable families receiving essential NFIs	Partially adequate	
Protection	People receiving cash for protection	Partially adequate	
	Refugees and asylum seekers registered	Adequate	
	Referral pathways	Adequate	
	Protection monitoring	Partially adequate	
	Community-based protection mechanisms	Partially adequate	
Gender-Based Violence (GBV)	Medical care to survivors	Partially adequate	
	Prevention awareness	Adequate	
	Case management	Partially adequate	
	Women and Girls Safe Space	Partially adequate	
Child Protection	Support to identified unaccompanied & separated children	Partially adequate	
	Child-friendly spaces	Adequate	
	Psychosocial support to children	Partially adequate	
Food Security	Food - for 14 days	Adequate	
	Food - after 14 days	Non-existent	
	Cooking fuel options	Partially adequate	
	Functioning market	Adequate	
	Transportation to reach the market	Adequate	
Site Planning & Maintenance:	Public electricity	Non-existent	
	Elevation of critical infrastructure above flood levels	Partially adequate	
	Functional drainage system	Adequate (improved)	
	Lighting of outdoor areas	Partially adequate	
	Lighting inside shelters	Partially adequate	
	Roads and pathways	Partially adequate	
	Signage and wayfinding systems	Partially adequate	
	Fire safety	Partially adequate	
	Water, Sanitation, and Hygiene (WASH)	Clean water per person per day	Adequate
		Water supply accessibility	Partially adequate
Gender disaggregated latrines and showers		Adequate	
Number of latrines available		Partially adequate	
Number of showers available		Partially adequate	
Lighting inside latrines and showers		Partially adequate	
Nutrition	Hygiene promotion messaging	Adequate	
	WASH NFIs	Partially adequate	
	Waste disposal	Adequate	
	Malnutrition treatment programs	Partially adequate	
	Malnutrition prevention programs	Partially adequate	
Health	Supplementary nutrition services	Partially adequate	
	Primary healthcare	Adequate	
	Vaccination for children	Partially adequate	
	Secondary healthcare	Partially adequate	
	Transportation/ambulance	Inadequate	
	Essential medicines and medical supplies	Adequate	
	Preparedness for disease outbreaks	Partially adequate	
	Care to individuals with severe mental health conditions	Partially adequate	
Mobility devices for persons with physical disabilities	Partially adequate		

Transit Center two (TC2), also known as the extension Site, was opened in January 2, 2024 to ease congestion in Transit Center one (TC1) in Renk. The transit center, with a current capacity of 2,695 individuals, is now accommodating 7,230 refugees and returnees, which puts it at 270% of its intended capacity. This situation requires the substantial increase on No of communal shelters.

While most services are relatively consolidated, however mainly linked with the protracted situation of the site, associated protection risks are noted due to the overcrowded tap stands, insufficient lighting in WASH facilities (showers, latrines), lack of lighting along partial sections of TC2, limited food assistance and lack of dignified spaces/overcrowded shelters for both men and women. Concurrently, the nutrition overall situation is judged to deteriorate.

**Existing Gaps**

- **Safety & Security:** while it has been noticed an increase in shelters with internal lighting, most latrines and showers are completely dark.
- **Health:** The two centers have only one ambulance to cater to a population of roughly 13,000 refugees and returnees.
- **Food Scarcity:** As transit site, no food is provided after 14 days of arrivals and this posing a threat to the refugees and returnees who prefer to stay in the transit center for extended period of time. Despite available nutrition service capacity, the malnutrition rate among children remains at 25%.
- **Accessibility:** There has been an improvement within internal accessibility however there are still gaps requiring attention.
- **WASH:** The ratio of access to latrines and showers is 43:1, within the minimum standards of 50 persons per facility.
- **Disability Inclusion:** There is a limited availability of mobility aids and equipment for people with disabilities.
