To strengthen and promote an evidence-based protection response, UNHCR and its partners in **Slovakia** have been implementing a Protection Profiling and Monitoring exercise to regularly collect and analyze data about the profiles, protection risks and needs of refugees from Ukraine and monitor changes over time. In October 2024 a revised questionnaire was rolled out. This dashboard presents the main findings based on **463** interviews conducted between **Oct 2024 and Dec 2024**

**Sample by country**

**Methodology**

Individual interviews are conducted in different locations, including transit centers, reception centers, and UNHCR office premises. Trained enumerators collect data digitally using the Kobo Toolbox, which is then safely stored in UNHCR's server.

While respondents are randomly selected to reduce bias, non-probability sampling is used. Results cannot necessarily be extrapolated to all refugees from Ukraine. The data for this dashboard has not been weighted.

**KEY FINDINGS**

**Nationality**

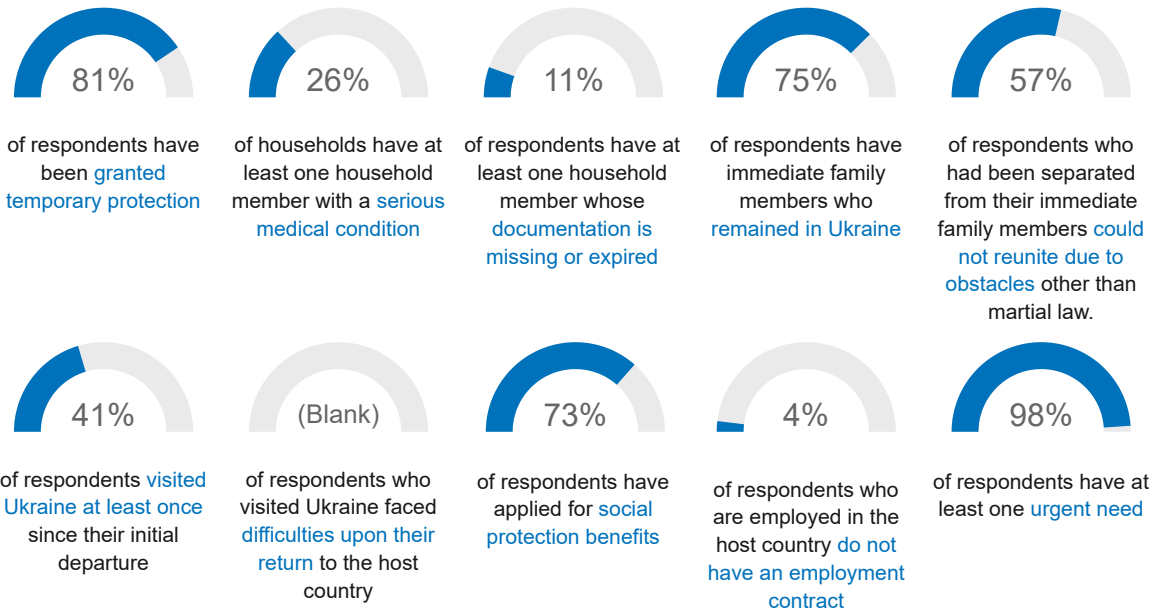

**Gender**

**Age**

**Household size**

**Acknowledgements**

We are grateful for the extensive involvement and support of UNHCR's partners, Human Rights League, Mareena, People in Need, and Slovak Humanitarian Council.

We are also grateful for the support of local authorities, civil society, international organizations and donors. Most importantly, UNHCR would like to acknowledge the resilience and strength of refugees from Ukraine, who continue to share with us their challenges, fears and hopes.

## HOUSEHOLD CHARACTERISTICS

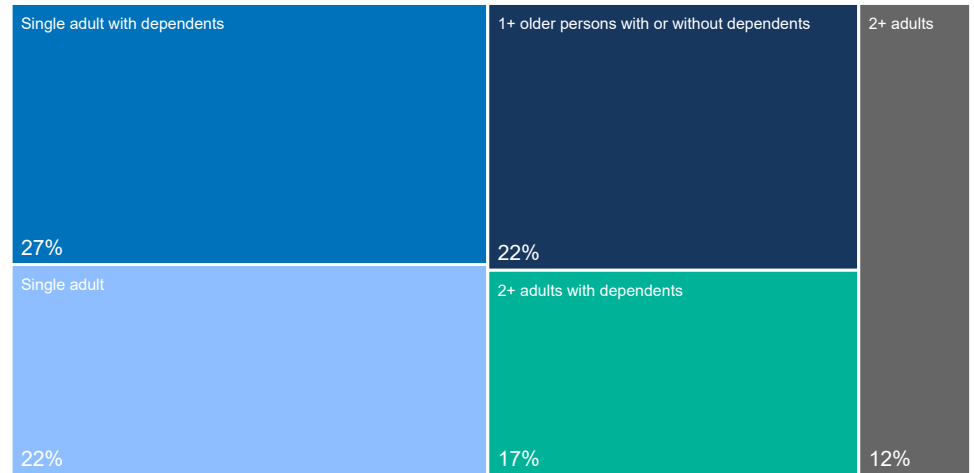

### Household members by age group and gender\*\*

● Female ● Male

Note: including the respondent

### Household type \*\*

## SPECIFIC NEEDS

# 3%

of households have children who are separated from both parents

# 26%

of households have at least one family member with a serious medical conditions

# 9%

of households have at least one family member with a disability

## RESPONDENT PROFILE

### Education level\*\*

### Main activity in Ukraine\*\*

### Top languages spoken\*

### Top Nationality\*

\* Multiple responses were possible, so percentages can go over 100% when added.

\*\* Due to rounding some percent totals do not add up to 100%.

Note: PWSN refers to households that include at least one person with a disability, a serious medical condition, or an older person (aged 60 or above).
