Introductions and Updates from members and co-leads

- No updates were provided due to the early stage of the year.
- PSEA Focal Points of new RRP partners in 2025 were introduced.

Presentation of the SEAH Harmonizing Reporting Scheme by the CHS Alliance

- An in-depth presentation of the SEAH Harmonizing Reporting Scheme of the CHS Alliance was given by the coordinator, Mathilde Belli. The SEAH [Harmonised Reporting Scheme](#) is a global system that simplifies SEAH reporting and collects comparable data on SEAH incidents. This enables us to analyze trends and patterns, providing a clearer understanding of the issue to prioritize corrective actions and resource mobilization. Incidents are reported on an secure online platform, allowing participating organisations to access real-time data and visual trends at the country, global, and organizational level. Watch this [short video](#) to learn more about this initiative and its added value!
- The presentation was organized by the PSEA Network in Romania with a view to strengthen survivor-centered approaches and raise awareness on the importance of effective, accessible, and safe reporting mechanisms.

Planning for the PSEA Network Action Plan 2025-2026

- A draft timeline on the planning for the PSEA Network Action Plan 2025-2026 was presented. It will cover a period of approximately 1.5 months involving submission of a needs assessment, consultation on a draft version and endorsement by the network of the final version.

AOB

- No AOB were mentioned at this time.

Next Steps

- The needs assessment form to feed the action plan will be sent out by 24 January 2025.
- Next meeting will take place on 20 February 2025.
