Gap

Shelter Partners' Reconstruction Programs

NFI Stock/Pipeline Analysis and Remaining Gap⁵

Response

1. Distribution of emergency shelter and NFI materials to both displaced and returnee populations
2. Construction of communal shelters for displaced populations
3. Shelter reconstruction programmes for returnee populations with severely damaged or destroyed houses
4. Housing, Land and Property support to ensure the respect of ownership rights of displaced populations

Challenges

- Humanitarian access to affected populations continues to be restricted by security concerns, especially in the Ouham Pende, Nana-Gribizi and Ouaka Prefectures;
- Continued displacements caused by the ongoing conflict result in unpredictable and often sudden movements of population;
- Significant logistical challenges exist for operating in CAR due to an underdeveloped road network and a lack of warehousing capabilities.

UNHCR/CRS distribution of NFI Items in Bossangoa in February 2014 / Photo Credit: A. Greco

¹ Composition of NFI Kit: 1 tarpaulin (4x5m), 1 bucket (10l-20l with lid), 1 jerrycan (10l semi-collapsible), 1 kitchen set (UNHCR type B), 2 mosquito nets, 2 blankets (medium thermal) and 2 mats / ² More kits than this have been distributed, most do not contain the 10 NFI items requested by the cluster, therefore this is the analysis of the equivalent complete kits distributed / ³ Represents Bangui and the Sub-Prefecture of Bimbo / ⁴ The summary of all the assessments done in conflict-affected areas, as the assessments are still ongoing this figure is expected to rise / ⁵ Gap calculated based on the target of 703,975 beneficiaries from the Strategic Response Plan for CAR of January 2014.
