Summary of discussions and action points

1. SGBV TF South working documents

A 2 hour interim meeting of SGBV TF members was held on 31 January during which input was provided to TORs and workplan. No further comments – the documents are endorsed with the opportunity to review regularly.

2. Referral pathway dissemination workshops

Dissemination workshops at hub level for SGBV referral pathways have commenced; noted that participation should be enhanced for future workshops, since the first one was not well attended from other sectors.

3. South specific Information Sharing Protocol

Agreed to develop a South specific information sharing protocol, as long as this is complementary to national reporting requirements and does not generate too much additional work.

Follow ups / Next steps

1.	Proactive invitation of staff from other sector organisations to forthcoming dissemination workshops.
2.	Meeting with GBVIMS and non-GBVIMS users signed up to national ISP to agree modalities for South specific ISP.
3.	Next meeting 13 March 2014
