

RRP6 Output 1.
Vulnerabilities of children and caregivers reduced and their resilience strengthened

Indicator 1: # of boys and girls benefiting from psychosocial support

Definition: # of girls and boys benefitting from psychosocial support, defined as: promoting well-being and establishing normalcy through the following: recreational activities (indoor and outdoor play, sport, dance, art, theatre, music, puppets, cultural events, story-telling; learning activities, including lifeskills, literacy and numeracy, vocational training, awareness raising sessions, conflict resolution skills; information and orientation sessions: orientation sessions on different topics related to their well-being such as registration, distribution, information on day to day needs (for basic services) within the family, key messages on GBV and child protection; emotional and social support activities: such as group therapy, group counselling sessions, home/family visits, Psychological First Aid. Child protection actor must interact directly with the child.

Sex

Male - # of boys benefiting from psychosocial support
Female - # of girls benefiting from psychosocial support

Age

Male Age 0 to 5 - # of boys benefiting from psychosocial support
Female Age 0 to 5 - # of girls benefiting from psychosocial support
Male Age 6 to 11 - # of boys benefiting from psychosocial support
Female Age 6 to 11 - # of girls benefiting from psychosocial support
Male Age 12 to 17 - # of boys benefiting from psychosocial support
Female Age 12 to 17 - # of girls benefiting from psychosocial support

Cohort

Syrian Refugees - # of Syrian refugee boys and girls benefiting from psychosocial support
Palestinian Refugees from Syria - # of Palestinian refugee boys and girls from Syria benefiting from psychosocial support
Affected Lebanese - # of Lebanese host boys and girls benefiting from psychosocial support
Lebanese Returnees - # of Lebanese returnee boys and girls benefiting from psychosocial support
Other - # of Palestinian refugee boys and girls from Lebanon benefiting from psychosocial support

Indicator 2: # of caregivers benefitting from psychosocial support

Definition: # of caregivers benefiting from learning activities; information and orientation sessions; and emotional and social support activities.

Sex

Male - # of Male caregivers benefiting from psychosocial support
Female - # of Female caregivers benefiting from psychosocial support

Cohort

Syrian Refugees - # of Syrian caregivers benefiting from psychosocial support
Palestinian Refugees from Syria - # of Palestinian refugee caregivers from Syria benefiting from psychosocial support
Affected Lebanese - # of Lebanese host caregivers benefiting from psychosocial support
Lebanese Returnees - # of Lebanese returnee caregivers benefiting from psychosocial support
Other - # of Palestinian refugee caregivers from Lebanon benefiting from psychosocial support

RRP6 Output 2.
Child Protection Violations are mitigated and addressed

Indicator 3: # of girls and boys at risk of harm or survivors of violence individually assisted with specialised services

Definition: # of girls and boys at risk of harm (*all* risk levels: high, medium, low) individually assisted with specialised services (through case management). Reporting begins at the **start** of service provision. See case level definitions below or refer to the Practical Guidance for case management.

Risk Level

Female high - # of girls at high risk of harm individually assisted with specialised services
Male high - # of boys at high risk of harm individually assisted with specialised services

Sex

Male - # of boys at risk of harm or survivors of violence individually assisted with specialised services
Female - # of girls at risk of harm or survivors of violence who have been individually assisted with specialised services

Age

Male Age 0 to 5 - # of boys at risk of harm or survivors of violence who have been individually assisted with specialised services
Female Age 0 to 5 - # of girls at risk of harm or survivors of violence who have been individually assisted with specialised services
Male Age 6 to 11 - # of boys at risk of harm or survivors of violence who have been individually assisted with specialised services
Female Age 6 to 11 - # of girls at risk of harm or survivors of violence who have been individually assisted with specialised services
Male Age 12 to 17 - # of boys at risk of harm or survivors of violence who have been individually assisted with specialised services
Female Age 12 to 17 - # of girls at risk of harm or survivors of violence who have been individually assisted with specialised services

Cohort

Palestinian Refugees from Syria - # of Palestinian refugee boys and girls from Syria at risk of harm or survivors of violence who have been individually assisted with specialised services
Syrian Refugees - # of Syrian refugee boys and girls at risk of harm or survivors of violence who have been individually assisted with specialised services
Affected Lebanese - # of Lebanese host boys and girls at risk of harm or survivors of violence who have been individually assisted with specialised services
Lebanese Returnees - # of Lebanese returnee boys and girls at risk of harm or survivors of violence who have been individually assisted with specialised services
Other - # of Palestinian refugee boys and girls from Lebanon at risk of harm or survivors of violence who have been individually assisted with specialised services

Cases Closed

Closed - # of children that complete case management process and whose cases are closed.

TYPE OF RISK & DEFINITION	HIGH RISK (Level 1)	MEDIUM RISK (Level 2)	LOW RISK (level 3)	NO RISK (level 4)
Follow up time frame	(Recommended response within 24-48 hours and bi-weekly follow up)	(Recommended response within 3-5 days and weekly follow up)	(Recommended response within 10 days and fortnightly to monthly follow up)	(No action required, Case closure recommend)
Definition of Risk/ Harm level	<i>Child significantly harmed or at immediate, serious risk of harm;</i> <i>Urgent response and frequent follow up required</i>	<i>Child harmed or at risk of serious future harm;</i> <i>Response and follow up required</i>	<i>Child at risk of harm;</i> <i>monitoring required</i> <i>Or child no longer a level 2 but monitoring required to ensure harm removed and positive well-being of the child</i>	<i>Child no longer at risk.</i> <i>No further monitoring required</i>
TYPE OF HARM/ RISK:				
Violence (physical abuse)	Serious injury Infant or toddler injured in Domestic Violence (DV) incident Child attempted to suicide	Excessive corporal punishment Threats to injure Dangerous and reckless behaviour Child is self-harming	Threats to injure Non injurious, occasional corporal punishment	No violence present (factors causing the harm have been addressed or removed) Person causing harm no longer has contact with the child
Abuse (sexual and emotional abuse)	Any sexual contact between a child and an adult (where person causing harm has access to the child) Child is being persistently belittled, isolated, or humiliated by a significant caregiver Child is promised to be married in the following days or child promised to married and will move out of the area (e.g. back to Syria) in the following days	Child is promised to be married in the future The child has been sexually violated in the past and not received any support Significant caregivers approach to the child is harmful (occasional belittling, isolation or humiliation)	Child is treated differently than other siblings and parent/caregiver or other relevant person is negative towards the child	The child and family have received support and there are no sexual harm factors present Factors causing the emotional harm have been addressed (parent received support) Person causing harm no longer has contact with the child

TYPE OF RISK & DEFINITION	HIGH RISK (Level 1)	MEDIUM RISK (Level 2)	LOW RISK (level 3)	NO RISK (level 4)
Neglect	Serious injury or illness due to neglect (malnutrition with no apparent causal factors)	Lack of supervision Inadequate basic care Failure to protect The child is often left to look after themselves, or is undertaking tasks beyond his/her developmental capacity	Caregivers are emotionally distant	The child's basic needs are being met and the caregiver
Exploitation	Child involved in worst forms of child labour, including sexual exploitation.	Child under 14 forced to work Child over 14 forced to work in dangerous or harmful circumstances	Parents are threatening to send the child to work Child over 14 is working in a safe environment with little exposure to harm	The child is no longer working, supports have been put in place to ensure the child does not return to work
Psychosocial distress (parent not coping, or not protective and/or no services involved)	The child has attempted suicide Child has stopped communicating/speaking The child's sense of reality is affected The child has intense violent behaviours	The child's social skills, ability to self-care and retain school attendance is significantly impaired The child is using drugs and/or alcohol The child becomes frequently absent minded The child has distressing flash-backs The child is bed-wetting The child is often crying and/or sad The child has unexpected and intense fears, phobias and anxiety The child has sleeping and concentration problems The child is suddenly behaving much younger than his/her age The child is self-harming	The child is sad and withdrawn The child is displaying anger	The child's psychosocial wellbeing is restored; the child is engaged in a range of activities and is not displaying behaviours of concern

TYPE OF RISK & DEFINITION	HIGH RISK (Level 1)	MEDIUM RISK (Level 2)	LOW RISK (level 3)	NO RISK (level 4)
<p>Highly vulnerable children</p> <p>Unaccompanied and Separated Children</p>	<p>Unaccompanied child under 15 Separated child under suspicious care, abuse or neglect UASC with level 2 harm factors Pregnant teenage girls Child parent</p>	<p>Unaccompanied child over 15 Child alone under 13 Separated child under 12 with unknown family Child headed household UASC (female) with unknown family</p> <p>Unaccompanied child with difficulties reintegrating the community</p>	<p>UASC who have had BIA and BID completed, who have caregivers, and their needs are being met</p>	<p>The child is being adequately cared for and the situation has been monitored for several weeks with no issues arising</p> <p>The child is being adequately cared for and no harm or vulnerability factors are present</p>
<p>Adolescent pregnancy/ Child parent</p>	<p>Unaccompanied adolescent pregnancy/child parent Adolescent pregnancy/child parent with level 2 harm factors</p>	<p>Adolescent pregnancy/child parent with psychosocial distress and difficulties with community and family reactions or low levels of support</p>	<p>Adolescent pregnancy/child parent with family support</p>	<p>Adolescent pregnancy/child parent with significant family support and network</p>
<p>Child disabled or chronically ill</p>	<p>Child under 5 with level 2 harm factors</p>	<p>Child and family are not accessing the support that they need</p>	<p>Child disabled or chronically ill with challenging behaviours</p>	<p>Child disabled or chronically ill but has significant family support and the child and family are accessing all the supports that they need</p>
<p>Domestic violence present in the home</p>	<p>Child under 5 Child is witnessing domestic violence and there are level 2 harm factors Significant injuries to the parent suffering the violence</p>	<p>Child is displaying emotional distress and difficulties learning and socializing</p>	<p>There has been sporadic disputes and violence, but the child is over 15 and has support networks</p>	<p>No violence present (factors causing the harm have been addressed or removed) Person causing harm no longer has contact with the child</p>

RRP6 Output 3.

Mainstreaming of child protection and capacity building of child protection actors/sectors

Indicator 4: # of service providers trained on child protection services and referral pathways

Definition: # of service providers undergoing technical, skills-oriented trainings in child protection in emergencies knowledge and services (ex. CPiE core training, CP MS training), including training on case management and referral pathways.

Sex

Male - # of Male service providers trained on child protection services and referral pathways

Female - # of Female service providers trained on child protection services and referral pathways

Cohort

Palestinian Refugees from Syria - # of Palestinian refugee service providers from Syria trained on child protection services and referral pathways

Syrian Refugees - # of Syrian refugee service providers trained on child protection services and referral pathways

Affected Lebanese - # of Lebanese host service providers trained on child protection services and referral pathways

Lebanese Returnees - # of Lebanese returnee service providers trained on child protection services and referral pathways

Other - # of Palestinian refugee service providers from Lebanon trained on child protection services and referral pathways
