

HEALTH Sector Achievements

January to September 2014

ACHIEVEMENTS

- 178,325 primary health care consultations provided (97,365 in camps; 80,960 out of camps)
- 54,456 mental health consultations provided
- 362 community health volunteers trained in psychological first aid
- 1,354 health workers (government, CBOs and national NGOs) trained
- 100 % of deliveries in the first half of 2014 in Zaatari camp attended by a skilled health worker
- 34,455 caregivers/mothers reached with infant and young child feeding services

NEEDS

- 1 Non-communicable disease management is not always satisfactory, with inadequate monitoring, lack of a multidisciplinary approach and shortage of medications.
- 2 Routine immunization needs to be strengthened for both Syrian and Jordanian children, especially for those outside camps, including in informal tented settlements.
- 3 Limited specialized services, advice and support for refugees with intellectual and physical impairments (25.9% of total population).
- 4 Major gaps in medium to longer term post-operative/ convalescent care, home nursing, functional rehabilitation (assistive devices/prosthesis) and community-based rehabilitation for refugees with injuries (8% of total population), including war wounded.
- 5 Public health facilities are overcrowded with long waiting times and overworked staff especially in areas that are hosting large numbers of refugees.

CHALLENGES

- Background health status of newly arriving Syrians as Syria is a country in epidemiological transition with a relatively long life expectancy and a high burden of non-communicable diseases, where there was access to a high level of medical and surgical care pre-conflict, with a need for ongoing care in country of asylum placing high demands on the secondary and tertiary care budgets.
- Health needs arising from the direct effects of the conflict resulting in a high level of injuries and disabilities as well as psychosocial distress, compounded by the lack of a pre-existing system in Jordan for managing large numbers of injured in the post-acute phase. This has resulted in a large informal network of providers who are working outside the formal health care or social development system.
- Health needs arising from the indirect effects of the conflict with breakdown of health and social services inside Syria including immunization programmes with subsequent poor immunization coverage and increased risk of cases of vaccine preventable disease; interruption of treatment for tuberculosis and HIV with increased risk of treatment failure, MDR-TB and morbidity and mortality.
- Huge burden on the national health system which has responded well but will find it increasingly difficult to maintain this level of support.

RECOMMENDATIONS

There is a need to maintain humanitarian programming and continue to meet the immediate health needs of individual refugees whilst also undertaking health systems strengthening and promoting resilience. As a result a key strategy of the health sector is support to Ministry of Health with medicines and other consumables, medical equipment, logistic and some staffing support provided in-kind.

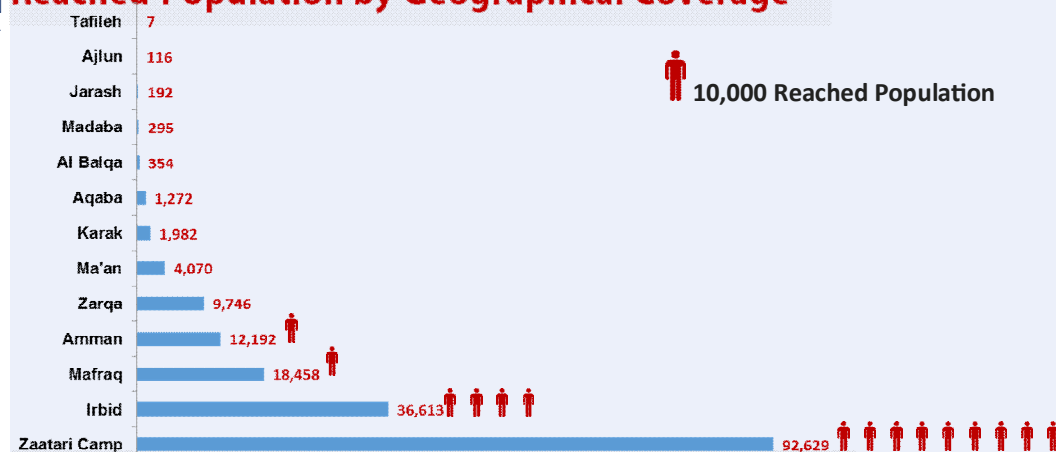

KEY FIGURES

AFFECTED POPULATION	REACHED CAMP	REACHED OUT-OF-CAMP	REACHED HOST COMMUNITY
BOYS	48,772	9,977	775
GIRLS	46,910	9,174	621
MEN	1,275	5,464	2,716
WOMEN	1,744	9,367	4,372
TOTAL	98,701	33,982	8,484

* Camp population figure reflects camp arrival population.

* Population figure represents the highest population assisted as reported in ActivityInfo.

Reached Population by Geographical Coverage

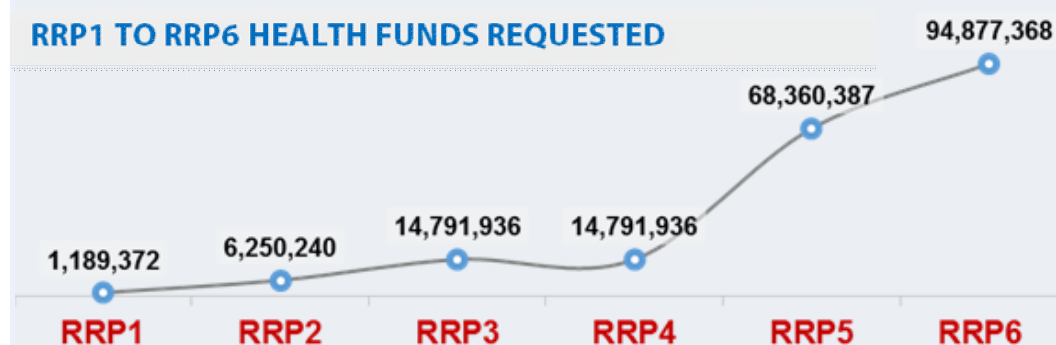

KEY OUTPUT INDICATORS ACHIEVEMENTS

OUTPUT INDICATORS	PLANNED	ACHIEVED	%
Capacity building: Number of female and male health workers (government, CBOs and national NGOs) trained	1,450	1,354	93%
MHPSS: Number of clinical secondary mental health consultations provided to women, boys, girls and men	75,000	54,456	73%
Reproductive Health: Number of antenatal consultations provided to women and girls	44,600	26,433	59%
Nutrition: Number of caregivers/ mothers reached with IYCF services	85,460	34,455	40%
Immunization: Number of boys and girls under 18 receiving measles vaccine (including new arrivals)	480,000	30,047	6%
Number of primary healthcare consultations	300,000	178,325	59%
Number of rehabilitation sessions	69,150	20,866	30%

HEALTH FUNDING STATUS

RRP1 TO RRP6 HEALTH FUNDS REQUESTED

RRP6 ALLOCATION SUMMARY

TOTAL REQUESTED	\$94,877,368	
FUNDS RECEIVED	\$38,402,358	40%
REQUESTED BUT NOT FUNDED	\$56,475,010	60%
