

EUROPE REFUGEE & MIGRANTS EMERGENCY RESPONSE

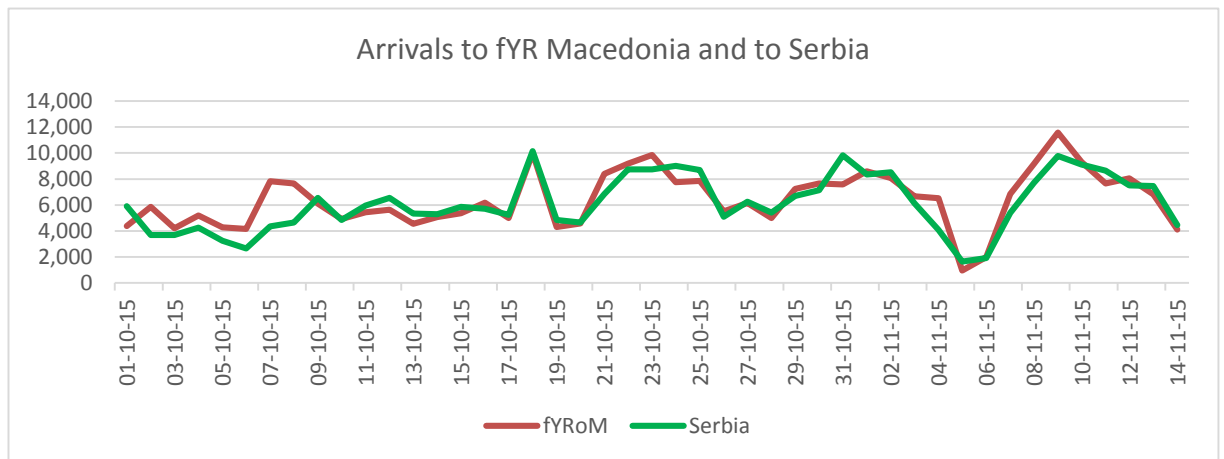

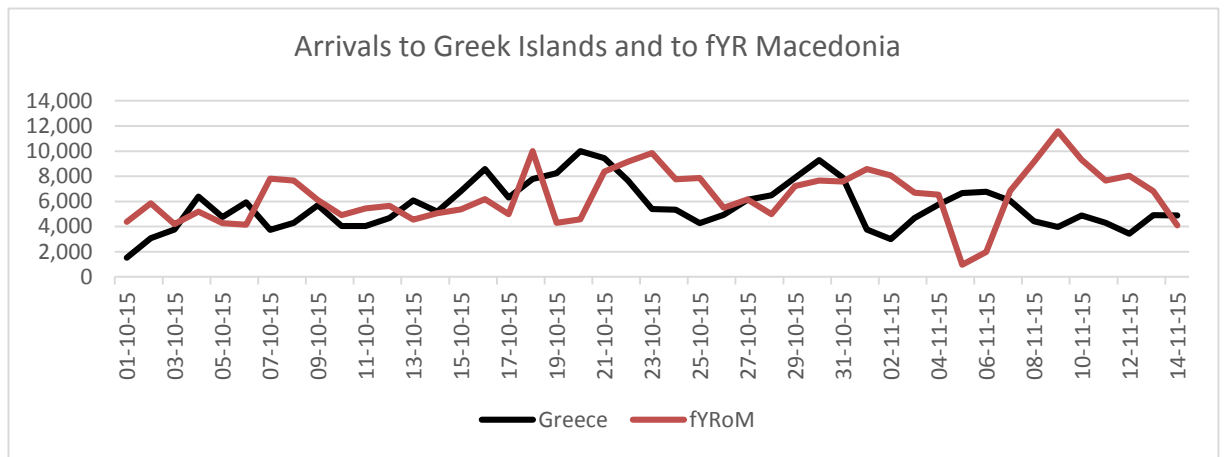

FLOWS THROUGH WESTERN BALKANS ROUTE

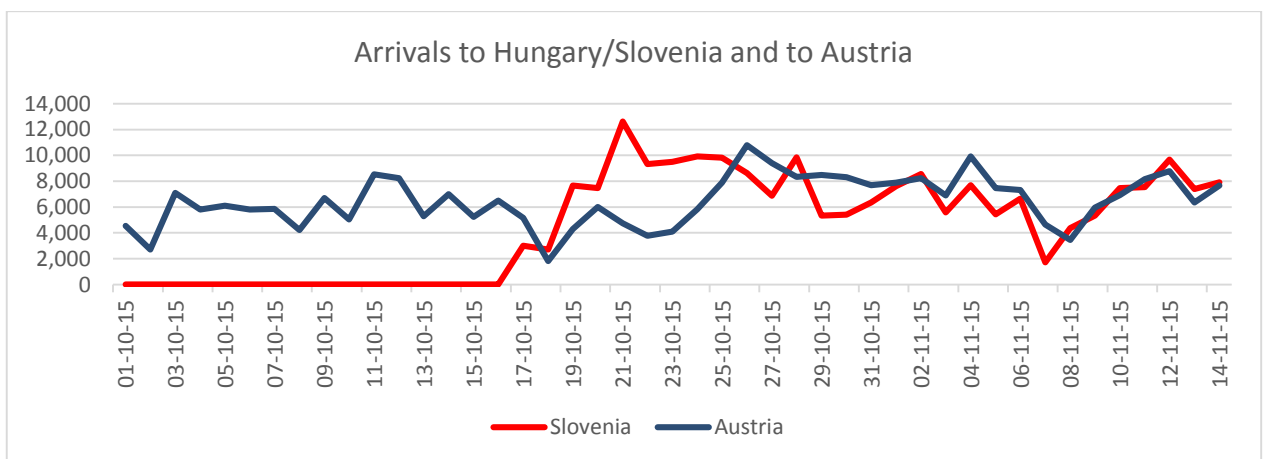

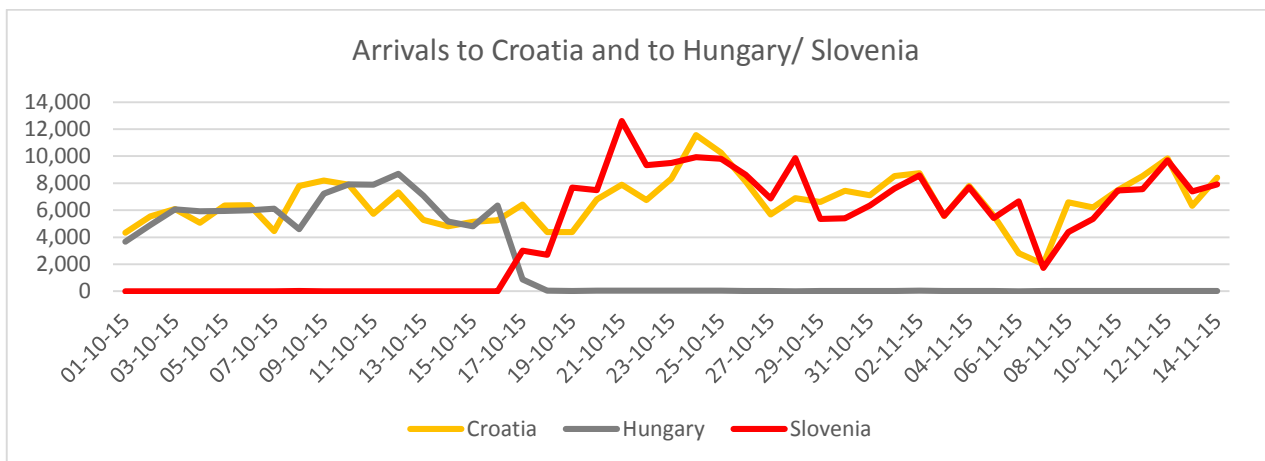

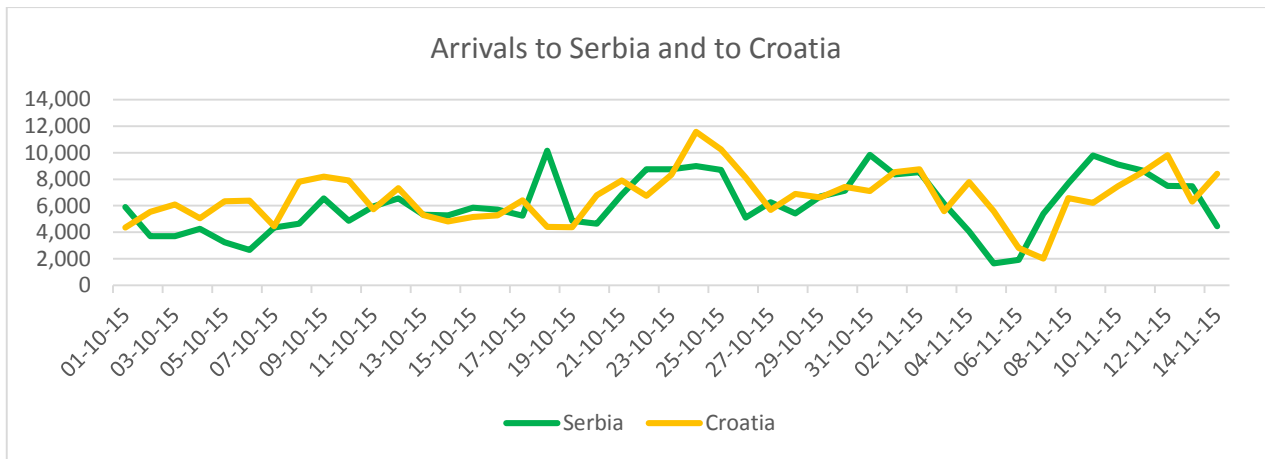

Daily estimated arrivals 1 October – 14 November 2015

The charts represent the daily estimated arrivals to each of the countries crossed by the refugee flow through the Western Balkans route, until Austria.

A large number of refugees continue their journey after Austria, towards Germany, Sweden and other European Countries.

More than 200,000 refugees are estimated to have arrived in Greece and used the Western Balkan Route since 1 October 2015.

Sources & Disclaimer:
 Reported figures are estimates by UNHCR on daily arrivals from each country from one or more borders. UNHCR estimates are based on the most reliable information available per country, including information from UNHCR border teams, authorities, and humanitarian partners.
 Daily arrivals figures to each country cannot be added, as the largest majority of refugees going through the mentioned countries are the same who arrived through the Mediterranean to Greece. However, the arrivals to Serbia from Bulgaria represent mostly land arrivals (not through the Mediterranean Sea).
 These estimates cannot be considered final and might change. Estimates are sometimes corrected on following days, and the representation of past days can be visualized by scrolling over the timeline on UNHCR Web Portal: data.unhcr.org/mediterranean.
