

HARSH WEATHER CONDITION EMERGENCY RESPONSE

INTERSOS

- IRBID
- AMMAN
- MADABA
- KARAK
- TAFILEH
- MA'AN

ACTED

- MAFRAQ

- JORDAN VALLEY

LOCATION

Urban Settings

ITS

MECHANISM

Phone contacts of the focal points distributed through INTERSOS activities and other NGOs to Community Focal Points previously identified and trained.

Affected individuals contact INTERSOS focal point to request help because of HWC .

Pre-assessment over the phone to understand the entity of the emergency.

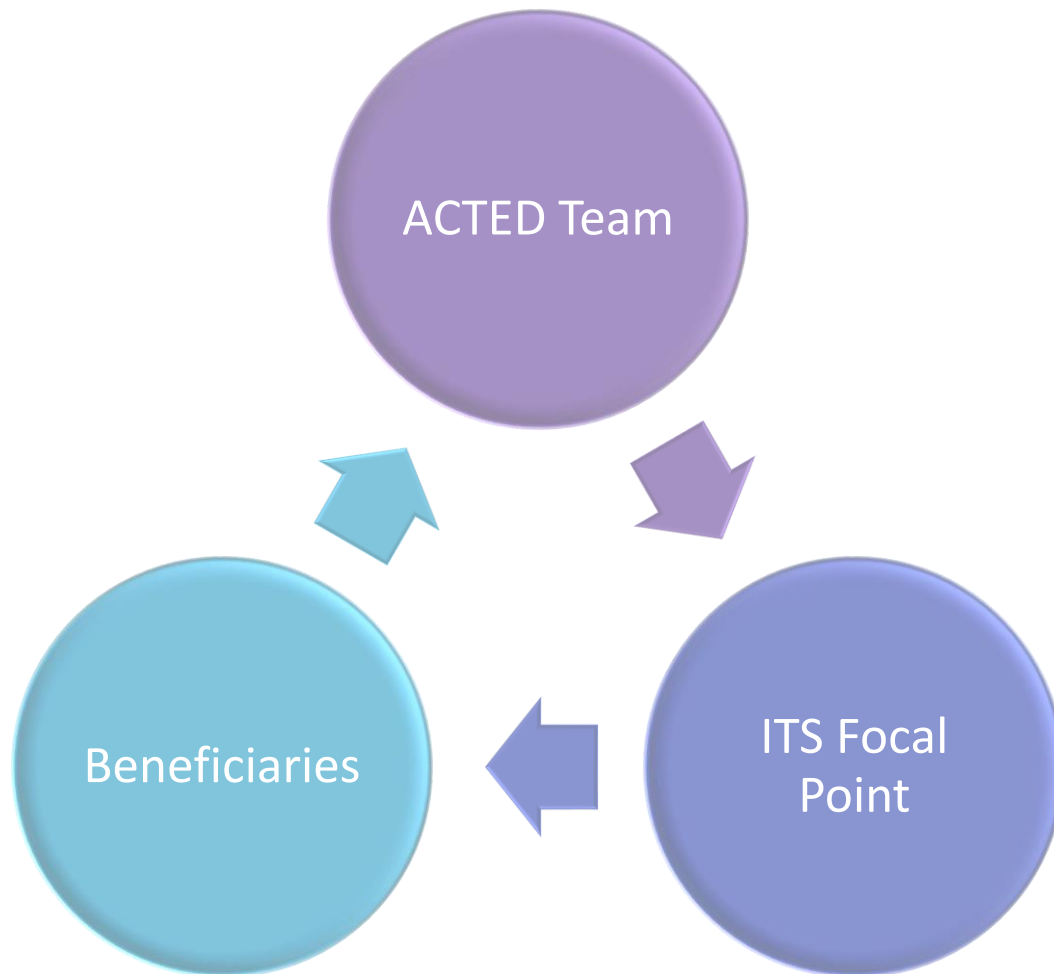

Quantities and type of items are selected according to the pre-assessment.

Once approached the site of the emergency, the situation is rapidly re-assessed.

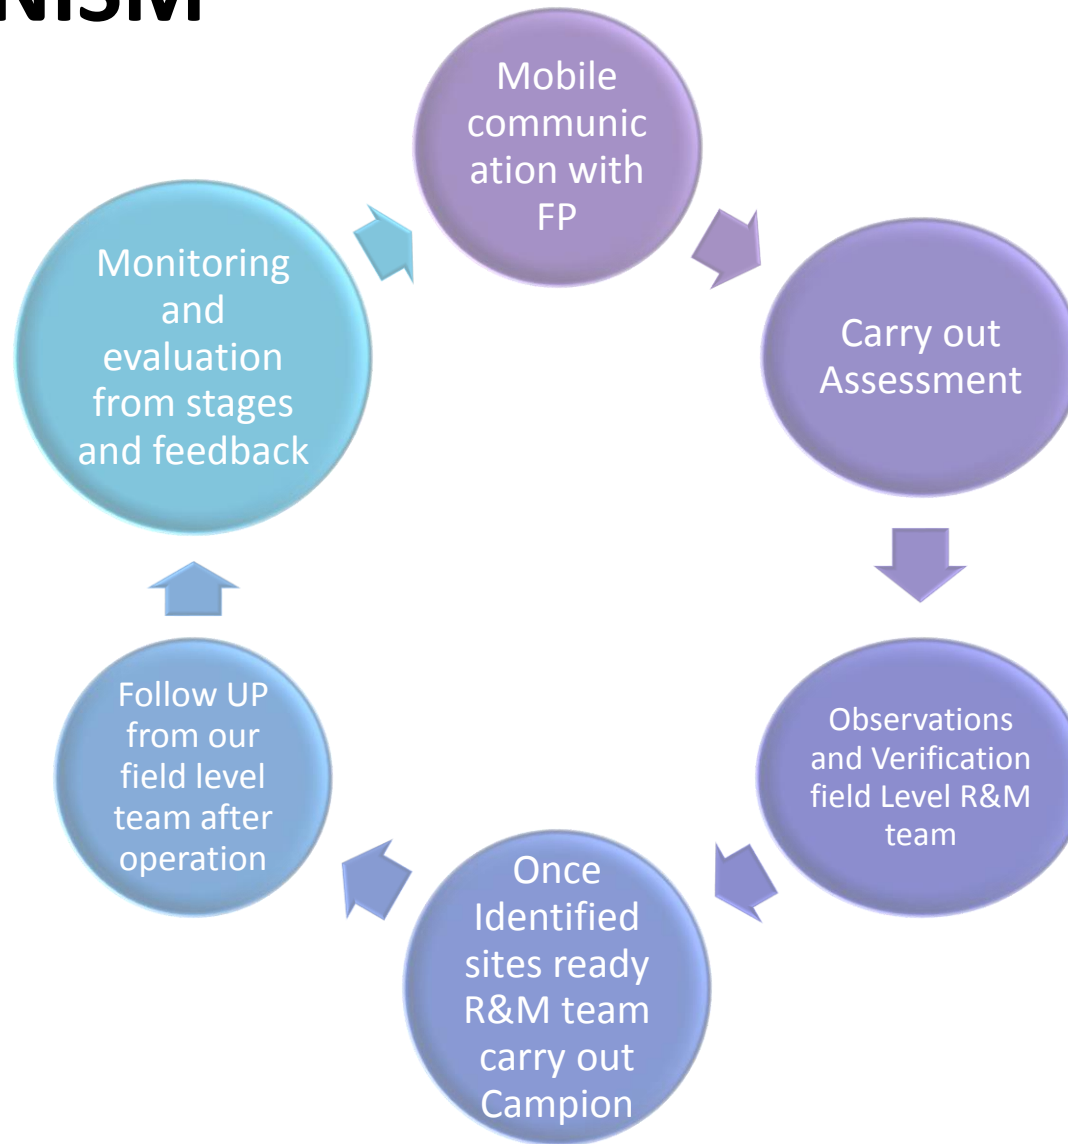

Materials are distributed according the need taking into consideration particular vulnerabilities.

Conduction of PDM at the end of Winter time.

CHALLENGES

- Transportation and hard-to access sites and roads
- Late emergencies (+weekend emergencies) and lack of coordination with other NGOs working in same areas
- New arrivals allocated in ITSs and beneficiaries movements due harsh weather
- Lack of resources and expertise , awareness in vulnerable areas VOCs, ITSs from beneficiaries side
- Emergency Response measures to be started before the Winter HWC.

BEST PRACTICES

- Engagement with the community ongoing – building trust
- Max waiting time to receive assistance 24h
- Synergies with other INTERSOS projects

ACHIEVEMENTS

- Raise the spirit of confidence between beneficiaries and NGOs.
- Alleviate the suffering of vulnerable beneficiaries and help Them to overcome the crisis.
- Participatory groups , sharing knowledge , Experience empower beneficiaries to effectively respond to emergency response.

Questions?

Thanks
