| <b>Review coordination monitoring performance (CMP) survey findings;</b> | <p>The ISWG Coordinator shared with the group findings from the CMP. It was noted that the findings are for sectors use and consumption and aimed to be used within the sectors to identify and discuss areas for improved performance. It was noted some 32 actors responded but coverage was only limited to 5 out of 10 provinces. This highlights the need to better strengthen coordination efforts and representation across the different provinces. Findings highlight general positive feedback in terms of coordination, but emphasis and priority areas are recommended in information management especially for what related to the collection and analysis of data to identify operational needs and plan of actions. It was noted most of the findings are aligned with the ISWG operational priorities in 2016. It is recommended another CMP is conducted end of June as a mid-year review.</p> |  |
