

The overarching goal of the WASH Sector is to enhance more sustainable and cost-effective WASH services for the Syrians living in camps/settlements and having more efficient, cost-effective and equity-driven service providers in areas with a significant proportion of Syrians living in host communities.

With the sector only 16 per cent funded as at the end of the first quarter of 2017, WASH Partners were able to reach over 100,000 people with hygiene promotion awareness sessions and messaging, and to assist over 275,000 people to access appropriate sanitation facilities. Over 458,000 individuals benefited from access to adequate quantity of safe water through improved longer-term water systems.

As an example of these longer-term interventions, construction works for Phase II of the the Zaatari camp water and wastewater network project commenced in Jordan. The works include the main sewer lines and infrastructure of the wastewater network, and the secondary and tertiary lines. Azraq water network improvement works continued with planned completion, and subsequent end of water tankering, expected in May.
