

The Shelter Sector priority remains to ensure adequate, affordable and sustainable housing options, primarily for refugees living in urban, peri-urban and rural areas, but also for vulnerable host community members. The Sector continues to move towards support to refugees in urban locations being based upon the inter-agency vulnerability analysis of families.

In the region, only 10 per cent of the Syrian refugees live in camps while the majority (90 per cent) live in urban settings, in non-functional public buildings, collective centres, and informal types of settlements. Shelter assistance for the vulnerable families also form a major component of the assistance provided during the winter months.

With just over a quarter of the required funding recieved, the Shelter Sector during the first three months of the year reached almost 11,000 households inside and outside camps with shelter assistance and shelter upgrades.
