D. WASH

WATER SUPPLY

- Water supply is on-going and stable, delivering on average 3,530m3 from the three internal boreholes
- WASH did some preventive maintenance on BH2 that led to compensatory external trucking for four days. This is now up and running.
- A training on the operation of installed pumps (as part of the network) is scheduled for today. This will also lead to a day of compensatory external trucking to allow for operation of internal installations only for the training.
- The WASH sector is planning a rapid assessment on the water needs and consumption patterns of institutions (schools, centres, offices...) in the camp in order to better support the camp. The sector will therefore appreciate cooperation from all institutions. The assessment tool and related details will be shared once finalized.
- The selection process of international consultants for water and wastewater construction management is in progress, technical evaluation completed.

SANITATION

- Desludging is on-going, but still with significant challenges with catching up with the needs
- Decommissioning of public WASH blocks is completed, except for a few blocks that are maintained pending the completion of private WASH facilities in the locations. All decommissioned sites, once reinstated, automatically transferred to Site planning and any future needs for those spaces must be coordinated directly with site planning.
- Private toilets project is being scaled up to include the upgrade of existing private facilities, with 631 units completed and in use
